Myths in Education Arthur Wright Combs,1979 **Myths in Education** Arthur Wright Combs,1979 **Trends in Education** ,1979 **Empowerment through Multicultural Education** Christine E. Sleeter,1991-01-01 This book reframes questions about student diversity by probing the extent to which society serves the interests of all and by examining the empowerment of members of oppressed groups to direct social change It examines the empowerment of children who are members of oppressed racial groups lower class and female based on the ideas of multicultural education A series of ethnographic studies illustrates how such young people view their world their power to affect it in their own interests and their response to what is usually a growing sense of powerlessness as they mature The authors also conceptualize contributions of multicultural education to empowering young people and report investigations of multicultural education projects educators have used for student empowerment Issues in teacher education are also discussed **The Future of Ubiquitous Learning** Begoña Gros,Kinshuk,Marcelo Maina,2015-07-28 This book explores emerging pedagogical perspectives based on the design of new learning spaces supported by digital technologies and brings together some of the best research in this field The book is divided into three themes foundations of emerging pedagogies learning designs for emerging pedagogies and adaptive and personalized learning The chapters provide up to date information about new pedagogical proposals and examples for acquiring the requisite skills to both design and support learning opportunities that improve the potential of available technologies **The Teacher as Expert** Robert Welker,1992-01-01 At a time of increasing pressure for teachers to become more professional and more technically competent this book examines in a critical fashion whether teachers should be considered experts Written in straightforward and accessible prose Welker examines the concept of expertise through the ideas of notable educational thinkers in the twentieth century beginning with E P Cubberley and George S Counts and concluding with a chapter on critical theory and the ideas of Maxine Greene and Henry Giroux Other chapters examine such thinkers as Willard Waller Daniel Lortie Alan Tom Philip Jackson and Ivan Illich Each chapter establishes an historical and ideological context and evaluates how the social character of the expert matches the responsibilities While the idea of the teacher assuming the role of educational expert is gaining increased credibility in the current reform movement this book shows that the concept fails to describe the senses of moral and social competence required of the teacher Also the notion of the expert teacher might stand in the way of teachers forming the type of public partnerships necessary for them to complete their tasks adequately **Smart Technologies.
