Annual Report of the Director, U.S. Coast and Geodetic Survey U.S. Coast and Geodetic Survey, 1879 **The Late Medieval Landscape of North-east Scotland** Colin Shepherd, 2021-10-31 The landscape of the north east of Scotland ranges from wild mountains to undulating farmlands from cosy quaint fishing coves to long sandy bays This landscape witnessed the death of MacBeth the final stand of the Comyns earls of Buchan against Robert the Bruce and the last victory in Britain of a catholic army at Glenlivet But behind these momentous battles lie the quieter histories of ordinary folk farming the land and supping their local malts Colin Shepherd paints a picture of rural life within the landscapes of the north east between the 13th and 18th centuries by using documentary cartographic and archaeological evidence He shows how the landscape was ordered by topographic and environmental constraints that resulted in great variation across the region and considers the evidence for the way late medieval lifestyles developed and blended sustainably within their environments to create a patchwork of cultural and agricultural diversity However these socio economic developments subsequently led to a breakdown of this structure resulting in what Adam Smith in the 18th century described as oppression The 12th century Renaissance the Protestant Reformation and the Industrial Revolution are used here to define a framework for considering the cultural changes that affected this region of Scotland These include the dispossession of rights to land ownership that continue to haunt policy makers in the Scottish government today While the story also shows how a regional cultural divergence recognized here can undermine big theories of socio political change when viewed across the wider stage of Europe and the Americas Mediterranean Pilot Great Britain. Hydrographic Department, 1913 **Merchant Vessels of the United States** , 1989 Second Infantry Regiment, Fifth Infantry Division United States. Army. 2d Infantry, 1946
