Women and Family Life in Early Modern German Literature Elisabeth Wåghäll Nivre, 2004 A study of the discourse of gender in 16th century German popular literature Writers of sixteenth century German popular literature took great interest in describing debating commenting on and prescribing gender roles and discourses of gender can be traced in texts of all kinds from this period This book focuses on popular works by Georg Wickram Jakob Frey Martin Montanus and Johann Fischart all of whom published novels joke books plays and or moral treatises on marriage and family life in Strasbourg in the sixteenth century Their works express not only their own ideas on women s roles as wives and mothers but also societal values at a time of religious political and cultural change The view of gender issues provided by these writers is not a simple one as they ascribed widely varying characteristics to woman and her relationship to man The book thus analyzes the social and cultural construction of the concept of woman as indicated not only by the narrators comments but also by the relationships and roles of men and women characters in the narratives Overall the focus is on the disparities that persisted in the sixteenth century discourse of gender confusing all attempts to arrive at definitive gender roles In the end the study argues for something that can best be described as a flowing continuity or a continuous flow in the discourses that form the sixteenth century concepts of woman and man Elisabeth Wåghäll Nivre is associate professor of German at Växjö University Sweden

Ways of Knowing Mary Lindemann, 2021-10-01 Knowing itself is a problematic concept and what was once seen as the clear objective of knowing that is to discover truth or reality has become increasingly less certain This is even more the case when scholars move from the present to examine epistemology in the past Two fundamental questions arise What constituted knowledge in the context of early modern Germany and how was knowledge gathered assembled organized deployed and interpreted Ways of Knowing seeks to answer these questions Taking their cues from a range of interdisciplinary perspectives including art German literature social political medical and religious history the contributors offer readers a rich and insightful portrait of knowing and knowledge in early modern Germany Investigators look at what people knew in early modern Germany and how they knew it Four essays in part one consider how knowledge was created and organized In part two six authors examine how knowledge was evaluated and how it functioned especially in the realms of belief law politics and medicine Contributors include Robert Beachy Susan R Boettcher Jason Coy Pia F Cuneo Mitchell Lewis Hammond Mary Lindemann Francisca Loetz Terence McIntosh Janice L Neri Elisabeth W gh ll Nivre and Helen Watanabe O Kelly

In Search of the Culprit Lukas Rösli, Stefanie Gropper, 2021-12-06 Despite various poststructuralist rejections of the idea of a singular author genius the question of a textual archetype that can be assigned to a named author is still a common scholarly phantasm The Romantic idea that an author created a text or even a work autonomously is transferred even to pre

modern literature today This ignores the fact that the transmission of medieval and early modern literature creates variances that could not be justified by means of singular authorships The present volume offers new theoretical approaches from English German and Scandinavian studies to provide a historically more adequate approach to the question of authorship in premodern literary cultures Authorship is no longer equated with an extra textual entity but is instead considered a narratological inner and intertextual function that can be recognized in the retrospectively established beginnings of literature as well as in the medial transformation of texts during the early days of printing The volume is aimed at interested scholars of all philologies especially those dealing with the Middle Ages or Early Modern Period **Die Nachbarn** Fredrika Bremer, 1843

The Individualization of Fortune in the Sixteenth-century Novels of Jorg Wickram Cordula Politis, 2007 This book is an examination of the concept of Fortune in the narratives of the sixteenth century German writer Jorg Wickram Throughout the Middles Ages Fortune functioned as a representation of the experience of contingency and the human attempt to cope with a God given order The Renaissance saw the advent of the notion that an individual possessed the ability to control his or her life to a certain extent but the perception of Fortune as an external force acting on human agents remained intact Wickram however saw fortune not only as an external force acting in conjunction with or competing with divine agency but also as a force within the human mind it was this innovative understanding which set him apart from his contemporaries and lent originality to his literature **Diesseits der Epochenschwelle** Stefan Seeber, 2017-09-11 Der

Crime and Culture in Early Modern Germany Joy Wiltenburg, 2013-01-07 With the growth of printing in early modern Germany crime quickly became a subject of wide public discourse Sensational crime reports often featuring multiple murders within families proliferated as authors probed horrific events for religious meaning Coinciding with heightened witch panics and economic crisis the spike in crime fears revealed a continuum between fears of the occult and more mundane dangers In Crime and Culture in Early Modern Germany Joy Wiltenburg explores the beginnings of crime sensationalism from the early sixteenth century into the seventeenth century and beyond Comparing the depictions of crime in popular publications with those in archival records legal discourse and imaginative literature Wiltenburg highlights key social anxieties and analyzes how crime texts worked to shape public perceptions and mentalities Reports regularly featured familial destruction flawed economic relations and the apocalyptic thinking of Protestant clergy Wiltenburg examines how such literature expressed and shaped cultural attitudes while at the same time reinforcing governmental authority She also shows how the emotional inflections of crime stories influenced the growth of early modern public discourse so often conceived in terms of rational exchange of ideas
