**The Bomb** Beatrice Heuser, 2014-09-25 This tightly argued and profoundly thought provoking book tackles a huge subject the coming of the nuclear age with bombing of Hiroshima and Nagasaki in August 1945 and the ways in which it has changed our lives since Dr Heuser sets these events in their historical context and tackles key issues about the effect of nuclear weapons on modern attitudes to conflict and on the ethics of warfare Ducking nothing she demystifies the subject seeing the bomb not as something unique and paralysing but as an integral part of the strategic and moral context of our time For a wide multidisciplinary and general readership

**Apocalyptic Crimes** Ronald C. Kramer,2025-03-11 In 2023 the Bulletin of the Atomic Scientists set the iconic Doomsday Clock to ninety seconds to midnight the closest to midnight or civilization ending apocalypse it has ever been Designed at the onset of the Cold War amid new fears of atomic weapons the Doomsday Clock is a symbolic countdown to annihilation Now a generation later the world is more vulnerable than ever to the nuclear weapons it sought to warn against In Apocalyptic Crimes Ronald C Kramer reconsiders the immense danger these weapons pose to humanity examining the use threat to use and continued possession of nuclear weapons from a criminological perspective Kramer argues that any country holding on to its nuclear arsenal including the United States is committing a criminal act Offering a sharp rebuke to the common claim that nuclear stockpiles serve to deter the escalation of conflict Apocalyptic Crimes emphasizes the harm caused by the mere possession of these deadly weapons It further considers the culpability of political officials acting as representatives of the state whose threatening statements about nuclear weapons contain actions or omissions that violate specific international laws But Kramer also shows how a nuclear apocalypse might be averted and offers a pathway to disarmament Through critical analysis and a specific criminology of nuclear weapons Kramer outlines the political actions

necessary to rewind the Doomsday Clock and pull the world back from the brink of destruction before the clock strikes midnight

**Life and Times of the Atomic Bomb** Albert I Berger, 2016-02-05 *Life and Times of the Atomic Bomb* takes up the question of how the world found itself in the age of nuclear weapons and how it has since tried to find a way out of it. Albert I Berger charts the story of nuclear weapons from their origins through the Atomic Age and the Cold War up through the present day, arguing that an understanding of the history of nuclear weapons is crucial to modern efforts to manage them. This book examines topics including nuclear strategy, debates, weapon system procurement decisions, and arms control conferences through the people and leaders who experienced them. Providing a chronological survey, *Life and Times of the Atomic Bomb* starts with the major scientific discoveries of the late 19th century that laid the groundwork for nuclear development. It then traces the history of nuclear weapons from their inception to the atomic bombings of Hiroshima and Nagasaki in 1945 and the reaction to them by key players on both sides. It continues its narrative into the second half of the twentieth century and the role of nuclear weapons throughout the Cold War, engaging in the debate over whether nuclear weapons are an effective deterrent. Finally, the closing chapters consider the atomic bomb's place in the modern world and the transformation of warfare in an age of advanced technology. This clear and engaging survey will be invaluable reading for students of the Cold War and twentieth-century history.

**The War in the Pacific** Duane Ryan, 1978 *The Enola Gay and the Smithsonian Institution* Charles T. O'Reilly, William A. Rooney, 2015-01-24 On August 6, 1945, the B-29 Enola Gay dropped an atomic bomb on Hiroshima, Japan, which ushered in the end of World War II. For the 50th anniversary of this major event in world history, the National Air and Space Museum of the Smithsonian Institution produced an exhibit. A controversy erupted, however, over the exhibit's historical authenticity. Veterans, for example, complained that the museum displayed a misrepresented version of history. After concisely covering the background of the Enola Gay and its mission, this study focuses on the controversy surrounding the museum exhibit. Issues covered include casualty figures, ethical questions, and political correctness, among others. The viewpoints of such groups as museum personnel, exhibit organizers, veterans, and historians are covered. Appendices offer information on content analysis of the National Air and Space Museum exhibit script, non-museum materials that were intended to complement the exhibit script, and the importance of full disclosure in research.

In spite of the alliances that bound many of the same participants, the war was essentially two separate but simultaneous conflicts: one involved Japan as the major antagonist and took place mostly in Asia and the Pacific, and the other initiated by Germany and Italy was contested mainly in Europe, North Africa, the Mediterranean, and the Atlantic. *The A to Z of World War II: The War Against Japan* traces the brutal conflict from Japan's seizure of Chinese

territory in 1931 through the onset of war with the Western Allies in 1941 to the use of atomic weapons by the United States in 1945 It also addresses the aftermath of the war including the formation of the United Nations and the American occupation of Japan As the first of two volumes covering World War II this volume concentrates on the war in Asia and the Pacific so the user benefits from the comprehensive explanations of the people places and events that shaped much of that region s 20th century history     **Bulletin of the Atomic Scientists** ,1986-06     **A Psychoanalytic Study of Political Leadership in the United States and Russia** Karyne E.
