The Loser Letters Mary Eberstadt, 2010-02-11 A wickedly witty satire *The Loser Letters* chronicles the conversion of a young adult Christian to atheism. With modern humor rivaling that of the media lampooning *Onion* found on college campuses all over America, A F Christian's open letters to the spokesmen of the New Atheism explain her reasons for rejecting God and the logical consequences of that choice. Along the way she offers pithy advice to famous atheists such as Richard Dawkins and Christopher Hitchens in the hope of helping them win over more Christians. Of course we score big time with the young guys who aren't responsible for anything and don't really care about anything besides spending most of their time in the basement playing video games and texting girls. A F Christian points out: But what about all those serious thoughtful people who are Christian believers? If the New Atheism is to make real headway she argues its advocates must do more to persuade intelligent theists living meaningful and fulfilling lives. Amid the many current books arguing for or against religion, social critic and writer Mary Eberstadt's *The Loser Letters* is truly unique: a black comedy about theism and atheism that is simultaneously a rollicking defense of Christianity. Echoing C. S. Lewis' *Screwtape Letters* and Dante's *Divine Comedy*, Eberstadt takes aim at bestsellers like *The God Delusion* and *God Is Not Great* with the sexual libertinism their authors advocate. In her loveable and articulate tragic comic heroine, A F Christian, Dawkins, Hitchens, and the other Brights have met their match.

Teaching Young Adult Literature Today Judith A. Hayn, Jeffrey S. Kaplan, 2012-03-15 *Teaching Young Adult Literature Today* introduces the reader to what is current and relevant in the plethora of good books available for adolescents. More importantly, literary experts illustrate how teachers everywhere can help their students become lifelong readers by simply introducing them to great reads: smart, insightful, and engaging books that are specifically written for adolescents. Hayn, Kaplan, and their contributors address a wide range of topics: how to avoid common obstacles to using YAL; selecting quality YAL for classrooms while balancing these with curriculum requirements; engaging disenfranchised readers; pairing YAL with technology as an innovative way to teach curriculum standards across all content areas. Contributors also discuss more theoretical subjects such as the absence of lesbian, gay, bisexual, transgender, and questioning LGBTQ young adult literature in secondary classrooms and contemporary YAL that responds to the changing expectations of digital generation readers who want to blur the boundaries between page and screen.

Methuselah's Zoo Steven N. Austad,2022-08-16 Stories of long lived animal species from thousand year old tubeworms to 400 year old sharks and what they might teach us about human health and longevity Opossums in the wild don t make it to the age of three our pet cats can live for a decade and a half cicadas live for seventeen years spending most of them underground Whales however can live for two centuries and tubeworms for several millennia Meanwhile human life expectancy tops out around the mid eighties with some outliers living past 100 or even 110 Is there anything humans can

learn from the exceptional longevity of some animals in the wild In Methusaleh s Zoo Steven Austad tells the stories of some extraordinary animals considering why for example animal species that fly live longer than earthbound species and why animals found in the ocean live longest of all Austad the leading authority on longevity in animals argues that the best way we will learn from these long lived animals is by studying them in the wild Accordingly he proceeds habitat by habitat examining animals that spend most of their lives in the air comparing insects birds and bats animals that live on and under the ground from mole rats to elephants and animals that live in the sea including quahogs carp and dolphins Humans have dramatically increased their lifespan with only a limited increase in healthspan we re more and more prone to diseases as we grow older By contrast these species have successfully avoided both environmental hazards and the depredations of aging Can we be more like them
