Handbook of Research on Social, Cultural, and Educational Considerations of Indigenous Knowledge in Developing Countries Ngulube, Patrick, 2016-09-29 Knowledge systems are an essential aspect to the preservation of a community's culture. In developing countries, this community-based knowledge has significant influence on such things as decision making and problem solving. The Handbook of Research on Social, Cultural, and Educational Considerations of Indigenous Knowledge in Developing Countries is an authoritative reference source for the latest scholarly research on the importance of knowledge and value systems at the community level and ways indigenous people utilize this information. Highlighting impacts on culture and education in developing nations, this book is ideally designed for researchers, academicians, policy makers, students, and professionals interested in contemporary debates on indigenous knowledge systems.

The SAGE Handbook of Geographical Knowledge John A. Agnew, David N. Livingstone, 2011-02-17 A refreshingly innovative approach to charting geographical knowledge. A wide range of authors trace the social construction and contestation of geographical ideas through the sites of their production and their relational geographies of engagement. This creative and comprehensive book offers an extremely valuable tool to professionals and students alike.

Victoria Lawson, University of Washington. A Handbook that recasts geography's history in original thought provoking ways. Eschewing the usual chronological march through leading figures and big ideas, it looks at geography against the backdrop of the places and institutional contexts where it has been produced and the social cum intellectual currents underlying some of its most important concepts.

Alexander B. Murphy, University of Oregon. The SAGE Handbook of Geographical Knowledge is a critical inquiry into how geography as a field of knowledge has been produced, re-produced, and re-imagined. It comprises three sections on geographical orientations, geography's venues, and critical geographical concepts and controversies. The first provides an overview of the genealogy of geography. The second highlights the types of spatial settings and locations in which geographical knowledge has been produced. The third focuses on venues of primary importance in the historical geography of geographical thought.

Orientations includes chapters on Geography: the Genealogy of a Term; Geography's Narratives and Intellectual History; Geography's Venues includes chapters on Field Laboratory; Observatory; Archive; Centre of Calculation; Mission Station; Battlefield; Museum; Public Sphere; Subaltern Space; Financial Space; Art Studio; Botanical; Zoological; Gardens; Learned Societies. Critical concepts and controversies includes chapters on Environmental Determinism; Region; Place; Nature and Culture; Development; Conservation; Geopolitics; Landscape; Time Cycle of Erosion; Time; Gender; Race; Ethnicity; Social Class; Spatial Analysis; Glaciation; Ice Ages; Map; Climate Change; Urban; Rural. Comprehensive without claiming to be encyclopedic, textured and nuanced, this Handbook will be a key resource for all researchers with an interest in the pasts, presents, and futures of geography.

The Knowledge Landscapes of Cyberspace David Hakken, 2004-03-01 How is

knowledge produced and used in cyberspace David Hakken a key figure in the anthropology of science and technology studies approaches the study of cyberculture through the venue of knowledge production drawing on critical theory from anthropology philosophy and informatics computer science to examine how the character and social functions of knowledge change profoundly in computer saturated environments He looks at what informational technologies offer how they are being employed and how they are tied to various agendas and forms of power Knowledge Landscapes will be essential for both social scientists and cultural studies scholars doing research on cyberculture *Testing Women, Testing the Fetus* Rayna Rapp, 2004-11-23 Rich with the voices and stories of participants these touching firsthand accounts examine how women of diverse racial ethnic class and religious backgrounds perceive prenatal testing the most prevalent and routinized of the new reproducing technologies Based on the author s decade of research and her own personal experiences with amniocentesis *Testing Women Testing the Fetus* explores the geneticization of family life in all its complexity and diversity **Impotent Warriors** Susie Kilshaw, 2009 From September 1990 to June 1991 the UK deployed 53 462 military personnel in the Gulf War After the end of the conflict anecdotal reports of various disorders affecting troops who fought in the Gulf began to surface This mysterious illness was given the name Gulf War Syndrome GWS This book is an investigation into this recently emergent illness particularly relevant given ongoing UK deployments to Iraq describing how the illness became a potent symbol for a plethora of issues anxieties and concerns At present the debate about GWS is polarized along two lines there are those who think it is a unique organic condition caused by Gulf War toxins and those who argue that it is probably a psychological condition that can be seen as part of a larger group of illnesses Using the methods and perspective of anthropology with its focus on nuances and subtleties the author provides a new approach to understanding GWS one that makes sense of the cultural circumstances specific and general which gave rise to the illness **Fishers and Scientists in Modern Turkey** Ståle Knudsen, 2009 Through the ethnography and history of fish production seafood consumption state modernizing policies and marine science this book analyzes the role of local knowledge in the management of marine resources on the Eastern Black Sea coast of Turkey Fishing science and other ways of knowing and relating to fish and the sea are analyzed as particular ways of life conditioned by history ideology and daily practice The approach adopted here allows for a broader analysis of the role knowledge plays in the management of common pool resources CPR than is provided in much of the contemporary CPR debate that tends to have a somewhat narrow focus on institutions and rules By contrast the author argues that also local knowledge and the larger historical and ideological context of production as manifest in state modernization policies and consumption patterns should be taken into account when trying to explain the current management regime in Turkish Black Sea fisheries **Women, Science, and Technology** Mary Weyer, Mary Barbercheck, Donna Cookmeyer, Hatice Ozturk, Marta Wayne, 2013-09-11 *Women Science and Technology* is an ideal reader for courses in feminist science studies This third edition fully updates its predecessor with a new introduction and twenty

eight new readings that explore social constructions mediated by technologies expand the scope of feminist technoscience studies and move beyond the nature culture paradigm **Investigating Local Knowledge** Paul Sillitoe, 2019-05-23

Originally published in 2004 Local knowledge reflects many generations of experience and problem solving by people around the world increasingly affected by globalizing forces Such knowledge is far more sophisticated than development professionals previously assumed and as such represents an immensely valuable resource A growing number of governments and international development agencies are recognizing that local level knowledge and organizations offer the foundation for new participatory models of development that are both cost effective and sustainable and ecologically and socially sound This book provides a timely overview of new directions and new approaches to investigating the role of rural communities in generating knowledge founded on their sophisticated understandings of their environments devising mechanisms to conserve and sustain their natural resources and establishing community based organizations that serve as forums for identifying problems and dealing with them through local level experimentation innovation and exchange of information with other societies These studies show that development activities that work with and through local knowledge and organizations have several important advantages over projects that operate outside them Local knowledge informs grassroots decision making much of which takes place through indigenous organizations and associations at the community level as people seek to identify and determine solutions to their problems Mathematics Across Cultures Helaine Selin, 2012-12-06

Mathematics Across Cultures A History of Non Western Mathematics consists of essays dealing with the mathematical knowledge and beliefs of cultures outside the United States and Europe In addition to articles surveying Islamic Chinese Native American Aboriginal Australian Inca Egyptian and African mathematics among others the book includes essays on Rationality Logic and Mathematics and the transfer of knowledge from East to West The essays address the connections between science and culture and relate the mathematical practices to the cultures which produced them Each essay is well illustrated and contains an extensive bibliography Because the geographic range is global the book fills a gap in both the history of science and in cultural studies It should find a place on the bookshelves of advanced undergraduate students graduate students and scholars as well as in libraries serving those groups *Plural Medicine, Tradition and Modernity, 1800-2000* Waltraud

Ernst, 2002-11-01 Research into colonial or imperial medicine has made considerable progress in recent years whilst the study of what is usually referred to as indigenous or folk medicine in colonized societies has received much less attention This book redresses the balance by bringing together current critical research into medical pluralism during the last two centuries It includes a rich selection of historical anthropological and sociological case studies that cover many different parts of the globe ranging from New Zealand to Africa China South Asia Europe and the USA **Troy Duster** John F.

Gallagher, 2015-12-03 This book is a biography of University of California Berkeley sociology professor Troy Duster Troy Duster received an MA and PhD in sociology from Northwestern University in Evanston IL Duster is a black man who was born in

South Chicago His maternal grandmother is the famous Ida B Wells He initially had a research interest in the sociology of law and later in human genetics He worked with approximately 100 graduate students at Berkeley all minority students Each of his research interests had a special slant given that Troy Duster is an African American Troy Duster has always been firmly committed to the idea that race is a sociological not a biological concept **The Fate of Knowledge** Helen E.

Longino,2018-06-05 Helen Longino seeks to break the current deadlock in the ongoing wars between philosophers of science and sociologists of science academic battles founded on disagreement about the role of social forces in constructing scientific knowledge While many philosophers of science downplay social forces claiming that scientific knowledge is best considered as a product of cognitive processes sociologists tend to argue that numerous noncognitive factors influence what scientists learn how they package it and how readily it is accepted Underlying this disagreement however is a common assumption that social forces are a source of bias and irrationality Longino challenges this assumption arguing that social interaction actually assists us in securing firm rationally based knowledge This important insight allows her to develop a durable and novel account of scientific knowledge that integrates the social and cognitive Longino begins with a detailed discussion of a wide range of contemporary thinkers who write on scientific knowledge clarifying the philosophical points at issue She then critically analyzes the dichotomous understanding of the rational and the social that characterizes both sides of the science studies stalemate and the social account that she sees as necessary for an epistemology of science that includes the full spectrum of cognitive processes Throughout her account is responsive both to the normative uses of the term knowledge and to the social conditions in which scientific knowledge is produced Building on ideas first advanced in her influential book *Science as Social Knowledge* Longino brings her account into dialogue with current work in social epistemology and science studies and shows how her critical social approach can help solve a variety of stubborn problems While the book focuses on epistemological concerns related to the sociality of inquiry Longino also takes up its implications for scientific pluralism The social approach she concludes best allows us to retain a meaningful concept of knowledge in the face of theoretical plurality and uncertainty **Ethnic and Cultural Dimensions of Knowledge** Peter Meusburger,Tim Freytag,Laura

Suarsana,2015-10-28 This book presents theoretical and methodical discussions on local knowledge and indigenous knowledge It examines educational attainment of ethnic minorities race and politics in educational systems and the problem of losing indigenous knowledge It comprises a broad range of case studies about specifics of local knowledge from several regions of the world reflecting the interdependence of norms tradition ethnic and cultural identities and knowledge The contributors explore gaps between knowledge and agency address questions of the social distribution of knowledge consider its relation to communal activities and inquire into the relation and intersection of knowledge assemblages at local national and global scales The book highlights the relevance of local and indigenous knowledge and discusses implications for educational and developmental politics It provides ideas and a cross disciplinary scientific background for scholars students

Ellen Langer this provocative volume explores the implications of critical mindfulness for making psychology more responsive and its practice more meaningful. Powerful critiques take the discipline to task for positioning therapists as experts over their clients and focusing on outcomes to the detriment of therapeutic process. Contributors use the principles of Langerian mindfulness to inform self understanding and relationships areas such as athletic performance and consumer decision making and basic and complex forms of cognitive engagement. The mindfulness demonstrated here is not only critical but also creative inclusive and humane with the potential to transform the consciousness of psychology and other mind based fields. Included in the coverage: Critical mindfulness of psychology's mindlessness. The construct of mindfulness amidst and along conceptions of rationality. Understanding confidence its roots and role in performance. Mindfulness in action the emergence of distinctive thought and behavior. Langerian mindfulness and optimal sport performance. Health and the psychology of possibility. Critical Mindfulness is bracing and insightful reading for undergraduate and graduate students psychologists psychiatrists physicians clinicians neurologists and educators within and outside positive psychology. These pages challenge the wider community of professionals to rethink their perspectives on practice as well as their long held tenets of living.

Constructing the Pluriverse Bernd Reiter, 2018-08-23. The contributors to *Constructing the Pluriverse* critique the hegemony of the postcolonial Western tradition and its claims to universality by offering a set of pluriversal approaches to understanding the coexisting epistemologies and practices of the different worlds and problems we inhabit and encounter. Moving beyond critiques of colonialism the contributors rethink the relationship between knowledge and power offering new perspectives on development democracy and ideology while providing diverse methodologies for non Western thought and practice that range from feminist approaches to scientific research to ways of knowing expressed through West African oral traditions. In combination these wide ranging approaches and understandings form a new analytical toolbox for those seeking creative solutions for dismantling Westernization throughout the world. Contributors: Zaid Ahmad, Manuela Boatcă, Hans Jürgen Burchardt, Raewyn Connell, Arturo Escobar, Sandra Harding, Ehsan Kashfi, Venu Mehta, Walter D Mignolo, Ulrich Oslender, Issiaka Ouattara, Bernd Reiter, Manu Samnotra, Catherine E Walsh, Aram Ziai.

Shifting Cultivation and Environmental Change Malcolm F. Cairns, 2015-01-09. Shifting cultivation is one of the oldest forms of subsistence agriculture and is still practised by millions of poor people in the tropics. Typically it involves clearing land often forest for the growing of crops for a few years and then moving on to new sites leaving the earlier ground fallow to regain its soil fertility. This book brings together the best of science and farmer experimentation vividly illustrating the enormous diversity of shifting cultivation systems as well as the power of human ingenuity. Some critics have tended to disparage shifting cultivation sometimes called swidden cultivation or slash and burn agriculture as unsustainable due to its supposed role in deforestation and land degradation. However the book shows that such indigenous practices as they have evolved over time can be highly adaptive to land and ecology. In contrast scientific agricultural solutions imposed from outside can be far

more damaging to the environment and local communities The book focuses on successful agricultural strategies of upland farmers particularly in south and south east Asia and presents over 50 contributions by scholars from around the world and from various disciplines including agricultural economics ecology and anthropology It is a sequel to the much praised Voices from the Forest Integrating Indigenous Knowledge into Sustainable Upland Farming RFF Press 2007 but all chapters are completely new and there is a greater emphasis on the contemporary challenges of climate change and biodiversity conservation
