Narmada Dammed:

The Narmada Dammed Dilip D'Souza, 2002 Are Dams Political Symbols With Its 18 October 2000 Judgment The Supreme Court Allowed Construction To Resume On The Sardar Sarovar Dam But Controversy Still Rages Around The Dam And Any Chance Of Debate Between The Widely Differing Opinions On It Is Drowned In Angry Rhetoric Where Does That Leave The Common Man In The Affected States Or Even Elsewhere In The Country Seeking Answers Activist And Journalist Dilip D Souza Searches Beyond Polemics For An Understanding Of The Narmada Project Analysing Documents Put Out By The Dam Authorities Themselves The Author Builds His Simple Thesis That Regardless Of Conflicting Feelings On The Dam The Way It Has Been Conceived And Is Being Built Should Be A Matter Of Grave General Concern He Finds A Pervasive Haziness In The Way Key Issues Recurring In This Material Are Addressed The Statements Of Aims The Lifeline Of Kutch And Saurashtra The Numbers Of People Displaced The Benefits Claimed For The Dam Besides There Are Innumerable Contradictions In The Figures Presented Further D Souza S First Hand Experiences Among Affected People Only Underline This Gap Between Paper And Fact And The Inescapable Conclusion He Reaches Is That Dams Are Being Built Less For Solving The Problems Of Water Floods And Power And More For The Sake Of Politics Such Findings In Themselves Besides The Alternative Strategies Described Constitute The Strongest Case Against Dams Like The Sardar Sarovar Passionate And Incisive This Book Becomes A Searing Indictment Of The Type Of Development We Have Pursued Since Independence

The Sardar Sarovar Dam Project Philippe Cullet, 2017-03-02 The Sardar Sarovar Project has been one of the most debated development projects of the past several decades at both an international level and within India itself Cullet s volume brings together all the key documents relating to the project including those pertaining to World Bank loans the judicial pronouncements of the Supreme Court and documents relating to specific local level issues in particular environment and rehabilitation The work includes an introductory section focusing on the history of the project the involvement of the different actors the impacts on the local population and a general analysis of the controversy surrounding it In providing an easily accessible source for all the main documents relating to this landmark project this compilation will be a valuable resource for researchers and policy makers working in the areas of International Environmental Law and International Development Law

Mega-Dams in World Literature Margaret Ziolkowski, 2024-04-15 Mega Dams in World Literature reveals the varied effects of large dams on people and their environments as expressed in literary works focusing on the shifting attitudes toward large dams that emerged over the course of the twentieth century Margaret Ziolkowski covers the enthusiasm for large dam construction that took place during the mid twentieth century heyday of mega dams the increasing number of people displaced by dams the troubling environmental effects they incur and the types of destruction and protest to which they may be subject Using North American Native American Russian Egyptian Indian and Chinese novels and poems Ziolkowski explores the supposed progress that these structures bring The book asks how the human urge to exploit and

control waterways has affected our relationships to nature and the environment and argues that the high modernism of the twentieth century along with its preoccupation with development casts the hydroelectric dam as a central symbol of domination over nature and the power of the nation state Beyond examining the exultation of large dams as symbols of progress *Mega Dams in World Literature* takes a broad international and cultural approach that humanizes and personalizes the major issues associated with large dams through nuanced analyses paying particular attention to issues engendered by high modernism and settler colonialism Both general and specialist readers interested in human environment relationships will enjoy this prescient book

Alternatives Unincorporated George Zachariah, 2015-01-30 The victims of environmental destruction are often sidelined in eco theology and environmental discourse Movements for ecological justice fail to take into account the voice of those at the grassroots *Alternatives Unincorporated* presents an environmental ethics that begins with those on the margins Using the key example of the Narmada Dam in India and the popular resistance movement which built up against the project the book examines the collective action of subaltern communities in caring for their local environment The book frames these movements as theological texts that inform a life affirming earth ethics The aim of the book is to challenge prevailing social and ecological dynamics and to affirm the interconnectedness of social justice and environmental action

Stochastic Population Dynamics in Ecology and Conservation Russell Lande, Steinar Engen, Bernt-Erik Sæther, 2003 All populations fluctuate stochastically creating a risk of extinction that does not exist in deterministic models with fundamental consequences for both pure and applied ecology This book provides the most comprehensive introduction to stochastic population dynamics combining classical background material with a variety of modern approaches including new and previously unpublished results by the authors illustrated with examples from bird and mammal populations and insect communities Demographic and environmental stochasticity are introduced with statistical methods for estimating them from field data The long run growth rate of a population is explained and extended to include age structure with both demographic and environmental stochasticity Diffusion approximations facilitate the analysis of extinction dynamics and the duration of the final decline Methods are developed for estimating delayed density dependence from population time series using life history data Metapopulation viability and the spatial scale of population fluctuations and extinction risk are analyzed Stochastic dynamics and statistical uncertainty in population parameters are incorporated in Population Viability Analysis and strategies for sustainable harvesting Statistics of species diversity measures and species abundance distributions are described with implications for rapid assessments of biodiversity and methods are developed for partitioning species diversity into additive components Analysis of the stochastic dynamics of a tropical butterfly community in space and time indicates that most of the variance in the species abundance distribution is due to ecological heterogeneity among species so that real communities are far from neutral

Environmentalism and the Mass Media Graham Chapman, Caroline Fraser, Ivor Gaber, Keval Kumar, 2003-06-24 Drawing on interviews with journalists media pictures and

Water Management, Food Security and Sustainable Agriculture in Developing Economies M. Dinesh Kumar, M. V. K. Sivamohan, Nitin Bassi, 2013 This book addresses strategies for food security and sustainable agriculture in developing economies The book focuses primarily on India a fast developing economy whose natural resource base comprising land and water supporting agricultural production is not only under enormous stress but also complex and not amenable to a uniform strategy It critically reviews issues which continue to dominate the debate

on water management for agricultural and food production The book examines the validity of the claim that large water resources projects cause serious social and environmental damages using global and national datasets The authors examine claims that the future of Indian agriculture is in rain fed farming supported by small water harvesting They question whether water abundant eastern India could become the granary of India through a groundwater revolution with the right policy inputs In the process they look at the less researched aspect of the food security challenge which is land scarcity in eastern India The book analyzes the physical economic and social impacts of large scale adoption of micro irrigation systems using a farming system approach for north Gujarat Through an economic valuation of the multiple use benefits from tank systems in western Orissa it shows how value of water from large public irrigation systems could be enhanced The book also looks at the reasons for the limited success in bringing about the much needed institutional reforms in canal irrigation for securing higher productivity and equity using case studies of Gujarat Madhya Pradesh and Maharashtra Finally it addresses how other countries in the developing world particularly Sub Saharan Africa could learn from Indian experience *Managing Water in River Basins* M. Dinesh Kumar,2010-06-23 This book provides an in depth analysis of existing methods of water management and highlights the gaps in the use of water in various river basins Underlying the futility of quick fix solutions it puts forward various alternative strategies for water management Using illustrative case studies the author lists major challenges in water management productivity improvement in key use sectors inter sectoral allocation trans boundary resource management and availability in deficient regions Highlighting the opportunities for improving water productivity in agriculture he also provides methodologies for generating country and regional level water balance scenarios The volume also discusses the problems involved in allocating water in river basins Kumar gives a detailed account of some of the widely known economic tools He examines the institutional and policy measures for ensuring sustainable use of water and economic growth including the creation of new organizations *Water Management in India* M. Dinesh Kumar,2009 **Water Policy Science and Politics** M. Dinesh Kumar,2018-03-07 Water Policy Science and Politics An Indian Perspective presents the importance of politics and science working together in policymaking in the water sector Many countries around the developed and developing world including India are experiencing major water scarcity problems that will undoubtedly increase with the impacts of climate change This book discusses specific topics in India s water agriculture and energy sectors focusing on scientific aspects academic and political discourse and policy issues The author presents cases from the interrelated sectors of water resources supplies sanitation and energy and climate including controversial topics that illustrate how science and politics can work together Challenges the linear and conventional approaches to water management and water policymaking in India that are also applicable in developing countries across South Asia and Sub Saharan Africa Presents best practice ideas and methods that help science and politics work together Highlights a key gap of communication between science and policy in water research with solutions on how this can be addressed Politics and Policies for Water Resources

Management in India M. Dinesh Kumar, 2020-06-29 This comprehensive volume explores the interface between politics and policy making in the water management sector of India The authors discuss the nature of the political discourse on water management in India and what characterizes this discourse They also explore how this discourse has influenced the process of framing water related policies in India particularly through the academics bureaucrat politician nexus and the growing influence of the civil society groups on policy makers which are the defining feature of this process and which have produced certain policy outcomes that are not supported by sufficient scientific evidence The book reveals that the social and management sciences despite being increasingly relevant in contemporary water management are unable to impress upon traditional engineer dominated water administration to seek solutions to complex water problems owing to a lack of interdisciplinary perspective in their research The authors also examine the current deadlock in undertaking sectoral reforms due to existing water policies not being honoured This collection includes several research studies which suggest legal institutional policy alternatives for addressing the problems in areas such as irrigation rural and urban water supply flood control and adaptation to climate variability and change It was originally published as a special issue of the International Journal of Water Resources Development

Rural Water Systems for Multiple Uses and Livelihood Security M. Dinesh Kumar, Yusuf Kabir, A. J. James, 2016-05-03 Rural Water Systems for Multiple Uses and Livelihood Security covers the technological institutional and policy choices for building rural water supply systems that are sustainable from physical economic and ecological points of view in developing countries While there is abundant theoretical discourse on designing village water supply schemes as multiple use systems there is too little understanding of the type of water needs in rural households how they vary across socio economic and climatic settings the extent to which these needs are met by the existing single use water supply schemes and what mechanisms exist to take care of unmet demands The case studies presented in the book from different agro ecological regions quantify these benefits under different agro ecological settings also examining the economic and environmental trade offs in maximizing benefits This book demonstrates how various physical and socio economic processes alter the hydrology of tanks in rural settings thereby affecting their performance also including quantitative criteria that can be used to select tanks suitable for rehabilitation Covers interdisciplinary topics deftly interwoven in the rural context of varying geo climatic and socioeconomic situations of people in developing areas Presents methodologies for quantifying the multiple water use benefits from wetlands and case studies from different agro ecologies using these methodologies to help frame appropriate policies Provides analysis of the climatic and socioeconomic factors responsible for changes in hydrology of multiple use wetlands in order to help target multiple use water bodies for rehabilitation Includes implementable models for converting single use water supply systems into multiple use systems

The Geopolitics of Melting Mountains Alexander E. Davis, 2023-05-12 The book addresses the urgent need for rethinking the geopolitics and ecology in the Himalaya by emphasising the entanglements between these two factors Most international

relations analyses of the Himalaya emphasize the central role of the region's states and their great power struggles. By reducing the region to its state actors however we miss the intense more than human diversity of the region and the crucial role that the mountains play in the global environment. In doing so the book makes a major contribution to international relations theory by drawing on insights from international political ecology. It first theorises international political ecology and examines the Himalaya as a global region before moving looking at the international aspects of political ecology in the Himalaya through key areas of the mountains where international politics and ecology are deeply inextricably linked. It presents three detailed case studies of different environmental and political issues in the Himalaya: icecaps, the India China Pakistan boundary dispute in the western Himalaya foothills and forests, the Nepal Bhutan Sikkim borderlands and rivers, the India China Bangladesh dispute over the Brahmaputra River basin. Each case study draws on a mix of source materials including fieldwork, government sources, foreign policy discourse, Himalayan ethnographies and environmental and ecological sciences scholarship.
