Narrative And Consciousness Literature Psychology And The Brain:

Narrative and Consciousness Gary D. Fireman, 2003 The evocation of narrative as a way to understand the content of consciousness has sparked truly interdisciplinary work among psychologists philosophers and literary critics The research presented in this volume should appeal to the general reader and researchers enmeshed in these problems

Narrative and Consciousness Gary D. Fireman, Ted E. McVay, Owen J. Flanagan, 2003-06-12 We define our conscious experience by constructing narratives about ourselves and the people with whom we interact Narrative pervades our lives conscious experience is not merely linked to the number and variety of personal stories we construct with each other within a cultural frame but is subsumed by them The claim however that narrative constructions are essential to conscious experience is not useful or informative unless we can also begin to provide a distinct organized and empirically consistent explanation for narrative in relation to consciousness Understanding the role of narrative in determining individual and collective consciousness has been elusive from within traditional academic frameworks This volume argues that addressing so broad and complex a problem requires an examination from outside our insular disciplinary framework Such an open examination would be informed by the inquiries and approaches of multiple disciplines Recognition of the different approaches to examining personal stories will allow for the coordination of how narrative seems its phenomenology with what mental labor it does its psychology and how it is realized its neurobiology Only by overcoming the boundaries erected by multiple theoretical and discursive traditions can we begin to comprehend the nature and function of narrative in consciousness Narrative and Consciousness brings together essays by exceptional scholars and scientists in the disciplines of literary theory psychology and neuroscience to examine how stories are constructed how stories structure lived experience and how stories are rooted in material reality the human body The specific topics addressed include narrative in the development of conscious awareness autobiographical narrative fiction and the construction of self trauma and narrative disruptions narrative memory and identity and the physiological and neural substrate of narrative It is the editors hope that the multidisciplinary nature of this collection will challenge the reader to move beyond disciplinary confines and toward a coherent interdisciplinary dialogue

Revisiting Loss Wojciech Drąg,2014-07-03 Loss is the core experience which determines the identity of Kazuo Ishiguro s narrators and shapes their subsequent lives Whether a traumatic ordeal an act of social degradation a failed relationship or a loss of home the painful event serves as a sharp dividing line between the earlier meaningful past and the period afterwards which is infused with a sense of lack dissatisfaction and nostalgia Ishiguro s narrators have been unable to confine their loss to the past and remain preoccupied by its legacy which ranges from suppressed guilt to a keen sense of failure or disappointment Their immersion in the past finds expression in the narratives which they weave in order to articulate justify or merely understand their experiences Their reconstructions of the past are interpreted as exercises in misremembering and self deception which enable them to sustain their illusions and save them from despair Revisiting Loss is the first book length study of memory encompassing Ishiguro s entire novelistic output It adopts a highly interdisciplinary approach combining a selection of philosophical Jacques Derrida Paul Ricoeur and Jean Starobinski and psychological perspectives Sigmund Freud Frederic Bartlett Jacques Lacan and Daniel L Schacter The book offers a thoroughly researched critical survey drawing on all published critical monographs and collections of academic articles on Ishiguro s work

Handbook of Philosophy of Management Cristina Neesham, Markus Reihlen, Dennis Schoeneborn, 2022-12-01 The Handbook of Philosophy of Management addresses the philosophical foundations of management in theory and practice It covers established branches of philosophy such as aesthetics epistemology moral philosophy political and social philosophy philosophy of education philosophy of practice and philosophy of science The

Handbook's broad scope maps out the field and provides a forum where philosophy can be meaningfully applied to the study of management in all its forms. As philosophy provides a meta-framework for moving beyond paradigm fragmentation within management research and education, this allows researchers and practitioners to find harmony and discord in the perspectives revealed by a philosophical lens.

Privileging the visual as the main method of communication and meaning-making, this book responds critically to the worldwide discussion about the Arctic and the North, addressing the interrelated issues of climate change, ethics, and geopolitics. A multi-disciplinary, multi-modal exploration of the Arctic, it supplies an original conceptualization of the Arctic as a visual world encompassing an array of representations, imaginings, and constructions. By examining a broad range of visual forms, media, and forms such as art, film, graphic novels, maps, media, and photography, the book advances current debates about visual culture. The book enriches contemporary theories of the visual, taking the Arctic as a spatial entity and also as a mode of exploring contemporary and historical visual practices, including imaginary constructions of the North. Original contributions include case studies from all the countries along the Arctic shore, with Russian material occupying a large section due to the country's impact on the region.
