Narratives Of Human Evolution:

Narratives of Human Evolution Misia Landau, 1993-01-01 Aims to uncover a hidden level of agreement among theories of human evolution Analyzing classic texts on evolution by Darwin and Keith as well as relatively recent accounts by Dart Robinson and Tobias the book reveals that they have a common narrative form based on the universal hero tale **Gender, Sexuality and Reproduction in Evolutionary Narratives** Venla Oikkonen, 2013-07-18 Since the early 1990s evolutionary psychology has produced widely popular visions of modern men and women as driven by their prehistoric genes In *Gender Sexuality and Reproduction in Evolutionary Narratives* Venla Oikkonen explores the rhetorical appeal of evolutionary psychology by viewing it as part of the Darwinian narrative tradition Refusing to start from the position of dismissing evolutionary psychology as reactionary or scientifically invalid the book examines evolutionary psychologists investments in such contested concepts as teleology and variation The book traces the emergence of evolutionary psychological narratives of gender sexuality and reproduction encompassing Charles Darwin s understanding of transformation and sexual difference Edward O Wilson s evolutionary mythology and the evolution creationism controversy Richard Dawkins molecular agency and new imaging technologies the connections between adultery infertility and homosexuality in adaptationist thought Through popular literary and scientific texts the book identifies both the imaginative potential and the structural weaknesses in evolutionary narratives opening them up for feminist and queer revision This book will be of interest to students and scholars of the humanities and social sciences particularly in gender studies cultural studies literature sexualities and science and technology studies **Stone Tools in Human Evolution** John J. Shea, 2017 An exploration of how the evolution of behavioral differences between humans and other primates affected the archaeological stone tool evidence [Narratives in Social Science Research](#) Barbara Czarniawska, 2004-03-27 *Narratives in Social Science Research* introduces students to the use of narrative methodology as a research tool It offers a rigorous framework for the application of these devices within qualitative research The book provides An historical overview of the development of the narrative approach within the social sciences A guide to how narrative methods can be applied in fieldwork An explanation of how to incorporate a narrative approach within a research project Guidelines for interpreting collected or produced narratives A student focused approach key arguments and methods are illustrated by case studies and lists of further reading Written in an accessible and engaging manner this detailed text will be a useful resource for researchers and students taking courses in qualitative research across a variety of social disciplines **The Earth Mysteries Workbook** John Michael Greer, 2024-09-24 A practical and investigative workbook to explore the timeless enigmas of the land on which we walk *The Earth Mysteries Workbook* invites readers to embark on a journey to understand and restore the ancient enchantments of the land as well as continuing to train the minds and spirits of those engaged in magical study The book follows forty eight lessons which span the course of one year It is not intended to be read cover to cover instead readers should take a lesson a week each of which provides material

for thought study and meditation Each week is divided into seven numbered paragraphs to be used as themes for the week s daily meditation The lessons include an introduction to the earth mysteries and natural philosophy exploration of different sites across the earth myths and legends phenomena and much more This fourth instalment of John Michael Greer s instructional workbook for members of the Golden Section Fellowship presents the scholarship of earth mysteries as a fundamental discipline of occult studies and as a spiritual discipline Greer situates the mysteries of the land as intrinsically linked to occult studies as they challenge the modern paradigm which ignores and belittles the sacred knowledges of ancient times sharing a belief in the importance of the past in understanding the subtle and spiritual dimensions of the earth This book can be read as an accompaniment to Greer s previous titles The Way of the Golden Section The Occult Philosophy Workbook and The Way of the Four Elements

Evolution and Popular Narrative , 2019-06-07 The contributors to this volume share the assumption that popular narrative when viewed with an evolutionary lens offers an incisive index into human nature In theory narrative art could take a near

infinity of possible forms In actual practice however particular motifs plot patterns stereotypical figures and artistic devices persistently resurface indicating specific predilections frequently at odds with our actual living conditions Our studies explore various media and genres to gauge the impact of our evolutionary inheritance in interdependence with the respective cultural environments on our aesthetic appreciation As they suggest research into mass culture is not only indispensable for evolutionary criticism but may also contribute to our understanding of prehistoric selection pressures that still influence modern preferences in popular narrative Contributions by David Andrews James Carney Mathias Clasen Brett Cooke Tam s David Barrett Tom Dolack Kathryn Duncan Isabel Behncke Izquierdo Joe Keener Alex C Parrish Todd K Platts Anna Rotkirch Judith P Saunders Michelle Scalise Sugiyama Dirk Vanderbeke and Sophia Wege Autobiographical Memory and Narrative in Childhood Robyn Fivush,2022-08-18 This Element delineates how the narrative expression of autobiographical memory develops through everyday interactions that frame the forms and functions of autobiographical remembering Narratives are both outward and inward facing providing the interface between how we perceive the world and how we perceive ourselves Thus narratives are the pivot point where self and culture meet To make this argument the author brings together literature from multiple perspectives including cognitive personality evolutionary cultural and developmental psychology To fully understand autobiographical memory it must be understood how it functions in the context of lives lived in complex sociocultural contexts *Screen Stories* Carl Plantinga,2018-04-06 The way we communicate with each other is vital to preserving the cultural ecology or wellbeing of a place and time Do we listen to each other Do we ask the right questions Do we speak about each other with respect or disdain The stories that we convey on screens or what author Carl Plantinga calls screen stories are one powerful and pervasive means by which we communicate with each other *Screen Stories Emotion and the Ethics of Engagement* argues that film and media studies needs to move toward an approach to ethics that is more appropriate for mass consumer culture and the lives of its citizens Primarily concerned with the relationship between media and viewers this book considers ethical criticism and the emotional power of screen stories that makes such criticism necessary The content we consume from television shows and movies to advertisements can significantly affect our welfare on a personal and societal level and thus this content is subject to praise and celebration or questioning and even condemnation The types of screen stories that circulate contribute to the cultural ecology of a time and place through shared attention they influence what individuals think and feel Plantinga develops a theory of the power of screen stories to affect both individuals and cultures asserting that we can better respond ethically to such media if we understand the sources of its influence on us **Religion, Language, Narrative and the Search for Meaning** Anthony Campbell,2009-08-09 This is a book about religion from a secular standpoint which nevertheless takes its subject seriously Anthony Campbell is a medical doctor who has long been interested in religion and spirituality and has written several books about it in the last 30 odd years including the first detailed examination of the philosophical ideas underlying Transcendental Meditation Seven States of

Consciousness published in 1973 He has also made a study of the Persian heretical Islamic sect known in the West as the Assassins The Assassins of Alamut available from Lulu In 2008 he published a personal account in Totality Beliefs and the Religious Imagination also available from Lulu of his own gradual abandonment of the search for religious truth The present book looks at a number of attempts to explain the existence of religious belief and concludes that religion will probably always appear naturally in human consciousness because of the way in which our minds have evolved Narrative Politics

Frederick W. Mayer, 2014-04-08 Narrative Politics explores two puzzles The first has long preoccupied social scientists How do individuals come together to act collectively in their common interest The second is one that has long been ignored by social scientists Why is it that those who promote collective action so often turn to stories Why is it that when activists call for action candidates solicit votes organizers seek new members generals rally their troops or coaches motivate their players there is so much story telling Frederick W Mayer argues that answering these questions requires recognizing the power of story to overcome the main obstacles to collective action to surmount the temptation to free ride to coordinate group behavior and to arrive at a common understanding of the collective interest In this book Mayer shows that humans are if nothing else a story telling story consuming animal We use stories to make sense of our experience and to imbue it with meaning our self narratives define our sense of identity and script our actions Because we are constituted by narrative we can be moved by the stories told to us by others That is why leaders who call a community to action seek to frame their invocations in a story in which tragedy and triumph hang in the balance in which taking part in the collective action becomes a moral imperative rather than a matter of calculated self interest Drawing on insights from neuroscience and behavioral economics political science and sociology history and cultural studies literature and narrative theory Narrative Politics sheds light on a wide range of political phenomena from social movements to electoral politics to offer lessons for how the power of story fosters collective action The Smart Neanderthal

Clive Finlayson, 2019-02-15 Since the late 1980s the dominant theory of human origins has been that a cognitive revolution 50 000 years ago led to the advent of our species Homo sapiens As a result of this revolution our species spread and eventually replaced all existing archaic Homo species ultimately leading to the superiority of modern humans Or so we thought As Clive Finlayson explains the latest advances in genetics prove that there was significant interbreeding between Modern Humans and the Neanderthals All non Africans today carry some Neanderthal genes We have also discovered aspects of Neanderthal behaviour that indicate that they were not cognitively inferior to modern humans as we once thought and in fact had their own rituals and art Finlayson who is at the forefront of this research recounts the discoveries of his team providing evidence that Neanderthals caught birds of prey and used their feathers for symbolic purposes There is also evidence that Neanderthals practised other forms of art as the recently discovered engravings in Gorham s Cave Gibraltar indicate Linking all the recent evidence The Smart Neanderthal casts a new light on the Neanderthals and the Cognitive Revolution Finlayson argues that there was no revolution and

instead modern behaviour arose gradually and independently among different populations of Modern Humans and Neanderthals Some practices were even adopted by Modern Humans from the Neanderthals Finlayson overturns classic narratives of human origins and raises important questions about who we really are

Narrative Intelligence Michael Mateas, Phoebe Sengers, 2003-02-27 Narrative Intelligence NI the confluence of narrative Artificial Intelligence and media studies studies models and supports the human use of narrative to understand the world This volume brings together established work and founding documents in Narrative Intelligence to form a common reference point for NI researchers providing perspectives from computational linguistics agent research psychology ethology art and media theory It describes artificial agents with narratively structured behavior agents that take part in stories and tours systems that automatically generate stories dramas and documentaries and systems that support people telling their own stories It looks at how people use stories the features of narrative that play a role in how people understand the world and how human narrative ability may have evolved It addresses meta issues in NI the history of the field the stories AI researchers tell about their research and the effects those stories have on the things they discover Series B

Posthuman Becoming Narratives in Contemporary Anglophone Science Fiction Zhang Na, 2022-09-02 This book explores the integration of narratology with posthumanism by examining a large scope of narratives in science fiction over nearly half a century in a range of major Anglophone countries Based on the rhizome of posthumanism analysis of the posthuman narrative embodiments in selected contemporary Anglophone science fiction it investigates Ursula K Le Guin's *The Left Hand of Darkness* 1969 Ian Watson's *The Jonah Kit* 1975 Iain Banks' *The Bridge* 1986 and Richard Powers' *Galatea 2.2* 1995 as exemplifying various aspects of posthuman becoming other The book shows that in the reactive logic of nihilism the becoming other posthuman rather than posing a threat proves to be the companion and savior of human beings whose apocalyptic sacrifice brings back the all too human humanity to the chaotic world of presence

Narratives in Times of Radical Transformation Toshio Kawai, Jonas Fahlbusch, Hans-Liudger Dienel, Ortwin Renn, Regina Renn, 2024-11-18 This book explores how narratives have been and can be used to facilitate radical transformations towards a more sustainable future Scholars from various disciplines have been increasingly utilizing social and cultural narratives to understand personal social and cultural transformations These narratives offer guiding principles for achieving personal social and cultural transformations Drawing on various fields such as psychoanalysis psychology sociology technology cultural studies and related areas this book presents different perspectives on narratives in situations of transformation exploring both commonalities and differences The interdisciplinary and transdisciplinary research that underpins this book emphasizes the co creation of knowledge between political academic and civil society actors and therefore necessitates shared narratives that can foster common problem solving strategies Shared narratives also play a crucial role in legitimizing goals by supporting pluralistic value and norm integration Offering new insights on how interdisciplinary research and therapeutic practice can assist individuals groups and even entire

cultures in facilitating radical transformations towards more peaceful and sustainable living conditions this book will be a key resource for scholars and researchers of sociology psychology technology cultural studies and related areas It was originally published as a special issue of Innovation The European Journal of Social Science Research Understanding the World Through Narrative Steve Bowkett, Tony Hitchman, 2023-10-02 While many educational books focus on creative and critical thinking skills this ground breaking work is the first to deal specifically with the ability to understand question and evaluate information presented broadly speaking in story form Story or narrative is central to our understanding of and interaction with the world around us We only have to think of the mini stories encapsulated in many advertisements the way that topics in science the story of human evolution for example in history and other subjects present themselves the power of myths and legends to act as guides to moral behaviour and the pervasive way that gossip rumour and superstition can spread to recognise the benefits of heightening such awareness in young learners Understanding the World Through Narrative explores the narrative structure of fiction but uses this as a template to show how the story form appears in mythology and modern urban folklore science history the media including advertising in our internal dialogues stories we tell ourselves about ourselves and others and how narrative structure can be used in curriculum planning to enhance children s learning The book contains over 160 thinking discussing researching activities for use in the classroom and as project work Chapters can be used independently although they are arranged with increasing degrees of sophistication and challenge This fascinating work is an essential resource for any teacher of upper primary and lower secondary students covering not only children s evolving intellectual ability and promoting curiosity and critical engagement but also enhancing their mental and emotional wellbeing
