Exploration is mankind s imperative Since the beginnings of civilization men and women have not been content to build a wall around their settlements and stay within its con nes They explored the land around them climbed the mountains and scanned the horizons The boldest among them pushed exploration to the most distant frontiers of the planet As a result much of the Earth was inhabited well before the days of the renowned European th th plorers of the 15 and 16 centuries  
Exploration did not cease after the circumnavigation of the globe it continued to the present Today explorers are going in new directions not just east and west north and south They explore backward in time and upward in space Arc ology explores the shorter time scales and geochemistry the longer time scales of geophy cal events asteroidal and cometary collisions magnetic reversals continental formation and more However on Earth we cannot go back inde nitely for much of the evidence of the very earliest days has been lost     The Solar System David G. Fisher,Richard R. Erickson,2010 Covers 180 features of Earth s solar system including every major body and phenomenon offering detailed basic information on all major aspects     **Doing Business with NASA.** ,1996     **Best Books for Children** Catherine Barr,2006 Contains more than 25 000 titles of books recommended for children in grades K 6     **Spinoff** ,     *Space Exploration* Kimberly Masters Evans,2005     **Astronomy** Mark Antony Garlick,2004 An introductory illustrated and comprehensive guide to observing and understanding the night sky This book provides a survey of science s growing understanding of space and includes details of

the latest space probes The most recent photographs from the world's finest observatories and space based cameras capture the wonder and beauty of the universe Astronomy covers a wide variety of heavenly phenomenon Distant stars Planets of the Solar System Comets and shooting stars Eclipses Black holes Vivid cross sections of the planets with a concise description and a chart of their relative distance from the sun provide at a glance information A series of monthly sky charts point out constellations star clusters galaxies nebula and more The sky maps use easy to read symbols to identify open and globular star clusters galaxies and planetary nebula The constellations are labeled and diagramed Spectacular images of space phenomenon are further explained with colorful digital graphics Nebula clusters galaxies etc are profiled with color images and short descriptions A pictograph tells whether binoculars or a telescope is required Astronomy is a fascinating and easy to use illustrated reference for amateur astronomers of all levels
