revised to March 1861(-June 1885), with regulations for establishing and conducting science schools & classes Science and art department,1863 Directory, with regulations for establishing and conducting science and art schools and classes Education Ministry of,1900 **Genetic Improvement of Farmed Animals** Geoff Simm,Geoff Pollott,Raphael Mrode,Ross Houston,Karen Marshall,2020-11-26 Genetic Improvement of Farmed Animals provides a thorough grounding in the basic sciences underpinning farmed animal breeding Relating science to practical application it covers all the major farmed animal species cattle sheep goats poultry pigs and aquaculture species *Animals and Human Society* Aubrey Manning,James Serpell,2002-11 Modern society is beginning to re examine its whole relationship with animals and the natural world Until recently issues such as animal welfare and environmental protection were considered the domain of small idealistic minorities Now these issues attract vast numbers of articulate supporters who collectively exercise considerable political muscle Animals both wild and domestic form the primary focus of concern in this often acrimonious debate Yet why do animals evoke such strong and contradictory emotions in people and do our western attitudes have anything in common with those of other societies and cultures Bringing together a range of contributions from distinguished experts in the field *Animals and Society* explores the importance of animals in society from social historical and cross cultural perspectives

Hand-Rearing Wild and Domestic Mammals Laurie J. Gage,2008-06-02 Veterinarians technicians and wildlife caregivers are often called upon to have expertise in raising infant mammals This book provides clear guidance to raising and caring for a wide variety of domestic farm wildlife and zoo mammals from birth to weaning Over thirty veterinary technicians wildlife specialists and veterinarians from around the world have contributed their expertise to this useful book that covers over 50 mammalian species Some of the topics covered in each chapter of this book include Assessment of the neonate Specialised equipment Expected weight gains Formula selection and preparation Weaning techniques Housing Common medical problems Detailed chapters are devoted to the following animals Domestic animals puppies kittens ferrets sugar gliders and rabbits Farm animals foals kids llamas and piglets Wildlife squirrels opossums raccoons rabbits deer foxes bears bats and hedgehogs Zoo animals ungulates non domestic equids exotic felids polar bears elephants rhinoceroses macropods pinnipeds large and small primates lemurs and sloths Dr Laurie Gage is well known for her work and expertise in the rearing of seals sea lions and walruses and has experience in rearing many other mammalian species *Animal Ethics and Theology* Daniel Miller,2013-03-01 In this book Daniel K Miller articulates a new vision of human and animal relationships based on the foundational love ethic within Christianity Framed around Jesus parable of the Good Samaritan *Animal Ethics and Theology* thoughtfully examines the shortcomings of utilitarian and rights based approaches to animal ethics By considering the question of animals within the Christian concept of neighbourly love Miller provides an alternative narrative for understanding the complex relationships that humans have with other animals This book addresses significant theological questions such as Does being created in the image of God present a meaningful distinction between humans and other

animals What does it mean for humans to have dominion Gen 1 28 over animals Is meat eating a moral problem for Christians In addition to drawing out the significance of Christian theology for field of animal ethics this book also engages environmental and feminist ethics Miller brings a theological perspective to such questions as Should care for animals be distinguished from care for the environment and what role should human emotions play in our ethical dealings with other animals As the title suggests this book provides fresh insight into the theological significance of human relationships with other animals

The Ecology of Reproduction in Wild and Domestic Mammals R.M. Sadler, 2012-12-06 49 about six months to well over a year If there is only one part of the year that is favourable such as spring and early summer in the temperate climates then each species must make an evolutionary choice so to speak as to which parts of the reproductive cycle conception gestation lactation or weanin must be protected and which can come in less favourable times of the year The rhesus and langur monkeys of northern India give birth during the time of year when temperatures are hottest and wells and tanks are often dry However gestation and the later months of lactation come during the monsoon season when food and water are abundant In contrast the east African baboons give birth at the beginning of the small rains and gestation and the late part of lactation occur during the six months dry season Whether any pattern of relationship will be found to hold true for other species of primates is still not clear It may be that a wide variety of patterns have evolved depending on the lengths of gestation and lactation and the particular ecological complex in which each species or even subspecies lives pages 503 504
