Shuaibi ,SUUH Kingdom, **Likeness and Landscape** Dolores Ann Kilgo,1994 Described by his contemporaries as Daguerre s most dedicated follower Thomas M Easterly did most of his work in the relative obscurity of St Louis This lavishly illustrated account of his twenty seven year career established him as a new master in the ranks of nineteenth century photographers It will be an essential addition to the libraries of scholars and collectors Easterly s subjects range far beyond the traditional daguerrean portrait Of his surviving inventory of over 600 plates in the collection of the Missouri Historical Society over 140 are views of St Louis his native New England and the Niagara Falls region of New York Three series of American Indian portraits constitute the earliest dated photographic record of Plains tribal members A series of studio portraits of ordinary people and celebrities demonstrate a remarkable mastery of technique placing Easterly decades ahead of his time *Berkeley's Doctrine of Signs* Manuel Fasko,Peter West,2024-04-22 This volume focuses on Berkeley s doctrine of signs The doctrine of signs refers to the use that Berkeley makes of a phenomenon that is central to a great deal of everyday discourse one whereby certain perceivable entities are made to stand in for as signs of something else Things signified might be other perceivable entities or they might also be unperceivable notions such as the meanings of words From his earliest published work *A New Theory of Vision* in 1710 to those works written towards the end of life including *Alciphron* in 1732 Berkeley is at pains to emphasise the crucial role that sign usage particularly but not only in language plays in human life Berkeley also connects sign usage to our human relationship with God an issue that was right of the heart of his philosophical project The contributions in this volume explore the myriad ways that Berkeley built on such insights to better understand a range of philosophical issues issues of epistemology language perception mental representation mathematics science and theology The aim of this volume is to establish that the doctrine of signs can be seen as one of the unifying themes of Berkeley s philosophy What s more this theme is one which spans his whole philosophical corpus not just his best known works like the *Principles* and the *Three Dialogues* but also his works on science mathematics and theology

Marx's 'Grundrisse' and Hegel's 'Logic' (RLE Marxism) Hiroshi Uchida,2015-04-17 Marx s *Grundrisse* is acknowledged as the vital link between Marx s early and late work It is also a crucial text in elucidating Marx s debt to the idealist philosopher G W F Hegel This book first published in 1988 is the first full length study of that relationship in a thorough textual analysis which makes the connections explicit and also the *Grundrisse* s relations to the works of Adam Smith and Aristotle This book argues that Marx s critique of political economy and his critique of Hegel are double interrelated Not only did Marx adapt Hegelian logic in order to analyse the economic categories crucial to modern society but it is argued that those logical categories were themselves seen as reflections of the productive processes of contemporary commercial society Uchida reveals a conceptual structure common to the apparently rarefied world of Hegelian conceptual logic and to the supposedly common sensical world of economic science Demonstrating this is a considerable achievement and it allows us to consider precisely what is valuable today in Marx s critical commentary on this conceptual structure and on the type of society in

which it is manifested Uchida's subject like Marx's is the force of capital on modern life The Oxford Handbook of Christology Francesca Aran Murphy, 2015-09-24 The Oxford Handbook of Christology brings together 40 authoritative essays considering the theological study of the nature and role of Jesus Christ This collection offers dynamic perspectives within the study of Christology and provides rigorous discussion of inter-confessional theology which would not have been possible even 60 years ago The first of the seven parts considers Jesus Christ in the Bible Rather than focusing solely on the New Testament this section begins with discussion of the modes of God's self-communication to us and suggests that Christ's most original incarnation is in the language of the Hebrew Bible The second section considers Patristic Christology These essays explore the formation of the doctrines of the person of Christ and the atonement between the First Council of Nicaea in 325 and the eve of the Second Council of Nicaea The next section looks at Mediaeval theology and tackles the development of the understanding of who Christ was and of his atoning work The section on Reformation and Christology traces the path of the Reformation from Luther to Bultmann The fifth section tackles the new developments in thinking about Christ which have emerged in the modern and the postmodern eras and the sixth section explains how beliefs about Jesus have affected music poetry and the arts The final part concludes by locating Christology within systematic theology asking how it relates to Christian belief as a whole This comprehensive volume provides an invaluable resource and reference for scholars students and general readers interested in the study of Christology **Evidence and Interpretation in Studies on Early Science and Medicine** Edith Sylla, William R. Newman, 2009-09-29 The studies in this volume present early science in its rich and divergent complexity Many historians of the Scientific Revolution have used early modern scholasticism to represent pre-seventeenth century science as a whole but a close look at ancient medieval and even early modern scientific writers shows that before the Scientific Revolution and not only in Europe there were many and diverse traditions of interpreting the natural world This book provides a broad range of historical evidence concerning early science which may be used as a basis for new and more complex historical interpretations Originally published as Volume XIV Nos 1-3 2009 of Brill's journal Early Science and Medicine
