Presidents and the American Environment Otis L. Graham, Jr., 2015-06-23 In 1891 Benjamin Harrison the first president engaged in conservation had to have this new area of public policy explained to him by members of the Boone and Crockett Club This didn t take long as he was only asked to sign a few papers setting aside federal timberland But from such small moments great social movements grow and the course of natural resource protection policy through 22 presidents has altered Americans relationship to the natural world in then almost unimaginable ways *Presidents and the American Environment* charts this course Exploring the ways in which every president from Harrison to Obama has engaged the expanding agenda of the Nature protection impulse the book offers a clear close up view of the shifting and nation shaping mosaic of both green and brown policy directions over more than a century While the history of conservation generally focuses on the work of intellectuals such as Muir Leopold and Carson such efforts could only succeed or fail on a large scale with the involvement of the government and it is this side of the story that *Presidents and the American Environment* tells On the one hand we find a ready environmental engagement as in Theodore Roosevelt s establishment of Pelican Island bird refuge upon being informed that the Constitution did not explicitly forbid it On the other hand we have leaders like Calvin Coolidge playing hide and seek games in the Oval Office while ignoring reports of coastal industrial pollution The book moves from early cautious sponsors of the idea of preserving public lands to crusaders like Theodore Roosevelt from the environmental implications of the New Deal to the politics of pollution in the boom times of the forties and fifties from the emergence of environmentalism to recent presidential detractors of the cause From Harrison s act which established the American system of National Forests to Barack Obama s efforts on curbing climate change presidents have mattered as they resisted or used the ever changing tools and objectives of environmentalism In fact with a near even split between browns and greens over those 22 administrations the role of president has often been decisive How and how much distinguished historian Otis L. Graham Jr describes in full for the first time in this important contribution to American environmental history *Public Policies for Environmental Protection* Paul R. Portney, 2016-03-17 Originally published in 1990 this study

tracks the issues progress and problems in environmental issues in the United States from the 1980 s Improvements in air and water quality as well as regulation of hazardous waste and toxic substances has led to new policies such as the Superfund Act and a general increase in awareness about environmental issues on a federal level Placing an emphasis on economics these papers analyse the effectiveness of environmental policy and progress made in relation to air pollution water quality hazardous wastes toxic substances and enforcement of regulations This title will be of interest to students of environmental studies

Sagebrush Rebel William Perry Pendley,2013-07-09 The fascinating story of how Ronald Reagan self proclaimed sagebrush rebel took his revolutionary energy policies to Washington and revitalized the American economy Governor Reagan with his unbridled faith in American ingenuity creativity and know how and his confidence in the free enterprise system believed the United States would transcend the Soviet Union To do so however President Reagan had to revive and revitalize an American economy reeling from a double digit trifecta unemployment inflation and interest rates and he knew the economy could not grow without reliable sources of energy that America had in abundance The environmental movement was in its ascendancy and had persuaded Congress to enact a series of well intentioned laws that posed threats of great mischief in the hands of covetous bureaucrats radical groups and activist judges A conservationist and an environmentalist Ronald Reagan believed in being a good steward More than anything else however he believed in people specifically for him people were part of the ecology as well That was where the split developed William Perry Pendley a former member of the Reagan administration and author of some of Reagan s most sensible energy and environmental policies tells the gripping story of how Reagan fought the new wave of anti human environmentalists and managed to enact laws that protected nature while promoting the prosperity and freedom of man saving the American economy in the process

Groupthink or Deadlock Paul A. Kowert,2012-02-01 The danger of groupthink is now standard fare in leadership training programs and a widely accepted explanation among political scientists for policy making fiascoes Efforts to avoid groupthink however can lead to an even more serious problem deadlock Groupthink or Deadlock explores these dual problems in the Eisenhower and Reagan administrations and demonstrates how both presidents were capable of learning and consequently changing their policies sometimes dramatically but at the same time doing so in characteristically different ways Kowert points to the need for leaders to organize their staff in a way that fits their learning and leadership style and allows them to negotiate a path between groupthink and deadlock

Exploring the Domain of Accident Law Don DeWees,David Duff,Michael

Trebilcock,1996-01-04 In the mid 1980s there was a crisis in the availability affordability and adequacy of liability insurance in the United States and Canada Mass tort claims such as the asbestos DES and Agent Orange litigation generated widespread public attention and the tort system came to assume a heightened prominence in American life While some scholars debate whether or not any such crisis still exists there has been an increasing political judicial and academic questioning of the goals and future of the tort system Exploring the Domain of Tort Law reviews the evidence on the efficacy of the tort system and its alternatives By looking at empirical evidence in five major categories of accidents automobile medical malpractice product related accidents environmental injuries and workplace injuries the authors evaluate the degree to which the tort system conforms to three normative goals deterrence corrective justice and distributive justice In each case the authors review the deterrence and compensatory properties of the tort system and then review parallel bodies of evidence on regulatory penal and compensatory alternatives Most of the academic literature on the tort system has traditionally been doctrinal or in recent years highly theoretical Very little of this literature provides an in depth consideration of how the system works and whether or not there are any feasible alternatives Exploring the Domain of Tort Law contributes valuable new evidence to the tort law reform debate It will be of interest to academic lawyers and economists policy analysts policy professionals in government and research organizations and all those affected by tort law reform

The Mining Law John D. Leshy,2015-09-16 Originally published in 1987 John D Leshy presents this scholarly study of the 1872 Mining Law as a legal treatise and history of mining in the West from the point of view of mineral exploration and production This mining law governed the United States mining practice yet had never been changed The Mining Law attempts to highlight the role of policy and government as well as the more obscure elements of the law which complicated mining practice in the eighties This title will be of interest to students of Environmental Studies and policy makers

American Domestic Priorities John M. Quigley,Daniel L. Rubinfeld,2022-04-29 Large deficits increased military and social security expenditures and the New Federalism have put the future of many domestic programs in doubt How would further cuts in federal funding for these programs affect our society Can such cuts significantly reduce the federal deficit Can Administration attempts to transfer public functions form the federal government to the states succeed In this volume a group of prominent economists many of whom have served in Republican or Democratic administrations raise and answer questions fundamental to the design of domestic policy They scrutinize the effects of recent policies on poverty urban transportation systems the supply of qualified teachers the cost and continuing racial segregation of housing and efforts to control pollution and improve the environment teh describe the likely results of further funding cuts in each area and propose imaginative alternatives for reducing the federal deficit This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship

accessible once again using print on demand technology This title was originally published in 1985 Civic Empowerment in an Age of Corporate Greed Edward C. Lorenz, 2012-04-01 A thought provoking investigation of an urgent issue facing American communities today Edward C Lorenz s book examines the intersection of corporate irresponsibility and civic engagement At the heart of this case study is a group of firms responsible for seven of the most contaminated Superfund sites in the United States the largest food contamination accident in U S history stunning stock and financial manipulations and a massive shift of jobs off shore In the face of these egregious environmental employee and investor abuses several communities impacted by these firms organized to confront and combat failures in corporate and bureaucratic leadership winning notable victories over major financiers lobbyists and indifferent or ineffective government agencies A critical analysis of public and private leadership business and economic ethics and civic life this book concludes with a stirring blueprint for other communities facing similarly overwhelming opposition **American Environmentalism** Riley E. Dunlap, Angela G. Mertig, 2014-04-04 First published in 1992 Hailed as required reading for environmental sociologist and social movements this book is written as a scholarly work and from a social science perspective and is an ideal textbook for environmental courses Air Pollution Arthur C. Stern, 1986-08-28 Subjects extensively covered include asbestos carbon dioxide lead nuclear accidents non ionizing radiation stratospheric ozone and visibility This state of the art compilation will facilitate the work of air pollution control agency personnel air pollution research scientists and air pollution consultants It will also be useful to law firms involved in air pollution litigation and to air pollution equipment and instrument manufacturers Acidic deposition acid rain Indoor air pollution Long range transport Risk assessment and management Hazardous and toxic substances **Power for the People** Mary M. Timney, 2015-04-29 Power for the People examines the tension between the social and political interests of states and the market in the case of energy policy The author has conducted extensive research on California s experience with electricity restructuring and assesses how the diverging interests of the market vs the state resulted in that notable failure of energy deregulation She includes overviews of many other states and offers analysis on how states can balance their own interests with the market without imposing high costs on their citizens or the environment This is the first book to look at deregulation from the point of view of the consumer and the states Exceptionally clear balanced and well written it is essential reading for anyone interested in public policy energy studies and government deregulation of services and would also be an ideal supplement for any courses in these areas *Energy Abstracts for Policy Analysis* , 1988 **Making Cancer Policy** Mark E. Rushefsky, 1986-01-01 Mark Rushefsky confronts head on the controversies surrounding federal cancer policy within the context however of a balanced view of the politics and science involved From 1976 to 1984 federal agencies such as the Consumer Product Safety Commission the Environmental Protection Agency the Food and Drug Administration the Occupational Safety and Health Administration issued guidelines regulating public exposure to chemical carcinogens These policies have engendered controversy and

undergone numerous changes Some of these are based on new scientific developments others on new political developments Making Cancer Policy analyzes the guidelines issued by these agencies in terms of their scientific and political environment It addresses the issues of uncertainty in the scientific foundation of cancer policy scientific controversies the mixing of science and politics and the political uses of science This book shows just how political science can be Counter-shock Duccio Basosi, Giuliano Garavini, Massimiliano Trentin, 2018-04-30 The oil price collapse of 1985-6 had momentous global consequences non fossil energy sources quickly became uncompetitive the previous talk of an OPEC imperium was turned upside down the Soviet Union lost a large portion of its external revenues and many Third World producers saw their foreign debts peak Compared to the much debated 1973 oil shock the countershock has not received the same degree of attention even though its legacy has shaped the present day energy scenario This volume is the first to put the oil counter shock of the mid 1980s into historical perspective Featuring some of the most knowledgeable experts in the field Counter Shock offers a balanced approach between the global picture and local study cases In particular it highlights the crucial interaction between the oil counter shock and the political counterrevolution against state intervention in economic management put forward by Ronald Reagan and Margaret Thatcher in the same period
