

NATURAL LAW

DEFINITION

Natural law is a theory asserting that certain rights or values are inherent by virtue of human nature and can be universally understood through human reason. It posits that these laws are immutable and unchangeable, serving as a basis for morality and justice throughout human history.

EXAMPLES

- Right to life
- Pursuit of happiness
- Family bonds
- Property ownership
- Self-defense
- Truth-telling
- Religious freedom
- Reproduction rights

Natural Rights A New Theory:

Natural Rights: a New Theory Richard D. Fuerle, 2003-11-14 Do you have a right to your car your house or even to your life Why Because the government says you do Suppose they change their minds Wouldnt it be better if you could prove that you have a right to your property including your own body This book offers such a proof The proof begins with the premise that people have free will A right is defined as a valid claim to the use of a physical thing and the author argues that free will implies that the first person to use an unclaimed physical thing acquires a right to that use For example we acquire rights to use our bodies when we first use them Rights are transferred to another person when the right holder abandons his right and the other person claims it Rights are violated when another person uses the same physical thing in a way that conflicts with our use Difficult questions are tackled in this book such as What rights can children acquire Can we acquire rights to intellectual property How can retribution against criminals be implied by free will Does a judge violate rights if he sentences a defendant who is in fact innocent And do rights conflict with survival *Natural Rights: a New Theory* Richard D.

Scholars Press and now available from Eerdmans is intended to foster exploration of the religious dimensions of law the legal dimensions of religion and the interaction of legal and religious ideas institutions and methods Written by leading scholars of law political science and related fields these volumes will help meet the growing demand for literature in the burgeoning interdisciplinary study of law and religion **A New Theory of Human Rights** Alison Assiter, 2021-03-01 This book offers a

new materialist thesis that focuses on the dynamic biological core of humans shared with other animals and the rest of the natural world to develop a radical theory of human rights It therefore makes a unique contribution to literature and to academic and societal debates both on new materialisms and on human rights Many on the political far right deride the concept of a human right This has occurred in tandem with a growing contempt for the rule of law and for obligations to protect land or the environment to recognize the rights of minorities or even to respect the various mechanisms of

democracy On the other hand contemporary left wing inspired literature has also rejected the concept of a human right as Enlightenment inspired and western This has gone hand in hand with a contestation of essentialism and universalism These theoretical positions have been variously critiqued as racist sexist as well as Eurocentric Drawing on metaphysics and ethics with protagonists drawn from traditions across analytic and continental philosophy and feminist theory Assiter challenges these critics to form a distinctive new materialist position Most people defenders and critics take for granted that the concept of human rights and the universal view of humanity derive from the European Enlightenment However this book develops a different story of its origin from the earlier period of both Aristotle and the Zoroastrian Persian Empire and locates the concept of a right partly in our biological core yet challenges the assumption that this is constructed by language of any kind specifically including scientific discourse

Fichte's Foundations of Natural Right Gabriel Gottlieb, 2016-09-15 This Guide examines Fichte's main political concepts including morality the summons social contract freedom the body and human rights

HUMAN NATURE: A New Theory of Psychology Dick Minnerly, 2014-09-19 HUMAN NATURE is a comprehensive work that proceeds from theory to science to practice so it is directed to a broad audience with varying interests and levels of knowledge and it will be an invaluable reference in anyone's library for life Its new theories in metaphysics epistemology and psychology along with the new moral and political theories they imply give its readers a complete and realistic philosophy of life as well as a powerful new tool that reveals the innate nature of any person whose birth date they know Whether they use this tool to understand themselves or others they will see as they never could before the underlying truths about people's motives thoughts feelings judgments morals politics and practical decisions

Natural Law Today Steven Brust, Christopher Wolfe, 2018-10-15 Natural Law Today The Present State of the Perennial Philosophy explains and defends various aspects of traditional natural law ethical theory which is rooted in a broad understanding of human nature Some of the issues touched upon include the relation of natural law to speculative reason and human ends teleology the relationship between natural law and natural theology the so called naturalistic fallacy deriving ought from is and the scope of natural knowledge of the precepts of the natural law as well as possible limits on it It also takes up certain historical and contemporary questions such as the various stances of Protestant thinkers toward natural law the place of natural law in contemporary U S legal thought and the relationship between natural law and liberal political thought more generally It brings together a number of the leading exponents of a more traditional or classical form of natural law thought who claim to root their arguments within the broader philosophy of Thomas Aquinas more deeply than other major representatives of the natural law tradition today

The Problem of Natural Law Douglas Kries, 2007-01-01 The Problem of Natural Law takes up the problem of how natural law theory might be made a serious contender in modern moral political and legal debate Author Douglas Kries takes as his starting point the question of how human beings are said to know

the natural law which is a question that has traditionally been answered by appealing to the notion of conscience Since Thomas Aquinas articulated the classic formulation of natural law theory the book begins with an analysis of Thomas's notion of conscience It then examines both the philosophical and theological objections that have been raised against the Thomistic notion of conscience and argues that this long standing teaching could and should be bracketed by contemporary natural law theory On the basis of this reformulation of natural law Kries then proceeds to show how reviving natural law theory might be possible in the contemporary context though it will need to be preceded by a reformulation of the natural law theory itself especially with respect to the doctrine of conscience If this is accomplished Thomistic natural law will be better situated to respond to its three most important contemporary critics the existentialism of Sartre the deontologism of Kant and the political hedonism of Hobbes

Medieval Foundations of International Relations William Bain, 2016-07-15 The purpose of this volume is to explore the medieval inheritance of modern international relations Recent years have seen a flourishing of work on the history of international political thought but the bulk of this has focused on the early modern and modern periods leaving continuities with the medieval world largely ignored The medieval is often used as a synonym for the barbaric and obsolete yet this picture does not match that found in relevant work in the history of political thought The book thus offers a chance to correct this misconception of the evolution of Western international thought highlighting that the history of international thought should be regarded as an important dimension of thinking about the international and one that should not be consigned to history departments Questions addressed include what is the medieval influence on modern conception of rights law and community how have medieval ideas shaped modern conceptions of self determination consent and legitimacy are there medieval answers to modern questions is the modern world still working its way through the Middle Ages to what extent is the modern outlook genuinely secular is there a theology of international relations what are the implications of continuity for predominant historical narrative of the emergence and expansion of international society Medieval and modern are certainly different however this collection of essays proceeds from the conviction that the modern world was not built on a new plot with new building materials Instead it was constructed out of the rubble that is the raw materials of the Middle Ages This will be of great interest to students and scholars of IR IR theory and political theory

The New Natural Resource Hans Christian Garmann Johnsen, 2016-03-03 Increasingly in the public discourse there are references to the knowledge economy knowledge society knowledge workers and knowledge organisations The argument is that knowledge is becoming the main economic resource replacing the natural resources that drove the industrial revolution The new knowledge economy is driven by knowledge development innovation and highly skilled employees Increasing investment in higher education and in universities is in line with this strategy and understanding In an earlier book *Creating Collaborative Advantage* edited with Richard Ennals Professor Hans Christian Garmann Johnsen argued that it is knowledge that links social and economic processes He believes that what is missing in the current discussion on innovation is a

conceptualisation of exactly what knowledge is In *The New Natural Resource* he digs deeper into what it is and how it develops and subsequently leads to widespread change The author argues that knowledge is inherently a social phenomenon That is why social processes are closely linked to economic development and why this relationship becomes even more apparent in the new knowledge economy Knowledge is not an objective entity established once and for all Knowledge development is interrelated with values norms perceptions and interpretations We need to know what the mechanisms are by which knowledge becomes legitimate true and relevant

The Political Theory of the American Founding Thomas G. West, 2017-04-03 This book provides a complete overview of the American Founders political theory covering natural rights natural law state of nature social compact consent and the policy implications of these ideas The book is intended as a response to the current scholarly consensus which holds that the Founders political thought is best understood as an amalgam of liberalism republicanism and perhaps other traditions West argues that on the contrary the foundational documents overwhelmingly point to natural rights as the lens through which all politics is understood The book explores in depth how the Founders supposedly republican policies on citizen character formation do not contradict but instead complement their liberal policies on property and economics Additionally the book shows how the Founders embraced other traditions in their politics such as common law and Protestantism

Essay on a New Theory of the Human Capacity for Representation Karl Leonhard Reinhold, 2011 Biographical note Tim Mehigan and Barry Empson University of Otago Dunedin New Zealand

The Terror of Natural Right Dan Edelstein, 2024-05-31 Natural right the idea that there is a collection of laws and rights based not on custom or belief but that are natural in origin is typically associated with liberal politics and freedom In *The Terror of Natural Right* Dan Edelstein argues that the revolutionaries used the natural right concept of the enemy of the human race an individual who has transgressed the laws of nature and must be executed without judicial formalities to authorize three quarters of the deaths during the Terror Edelstein further contends that the Jacobins shared a political philosophy that he calls natural republicanism which assumed that the natural state of society was a republic and that natural right provided its only acceptable laws Ultimately he proves that what we call the Terror was in fact only one facet of the republican theory that prevailed from Louis's trial until the fall of Robespierre A highly original work of historical analysis political theory literary criticism and intellectual history *The Terror of Natural Right* challenges prevailing assumptions of the Terror to offer a new perspective on the Revolutionary period

New Theory and Practice of Capitalism John Bosco Nkumunue, 2014-06-10 Most people today are poor and unemployment continues to run rampant Can capitalism truly lift us up Author John Bosco Nkumunue an economist believes it can as long as the world gets behind a new form and concept of capitalism Nkumunue is on a mission to fight poverty redistribute wealth and create better living conditions for vast numbers of people In this study he outlines how this new form of capitalism would affect the rich the middle class and the poor He explores critical issues such as the key role that demand plays in the economy the unforeseen

ways in which liquidity affects us ways in which businesses can bolster markets through investment and ways for consumers can wield power in the marketplace A progressive form of capitalism could alleviate the worlds suffering and narrow the wealth gap by stimulating investment and therefore job growth It has the potential to change the economic classes of the world decrease poverty and end the global economic crisis The Natural Law Foundations of Modern Social Theory Daniel Chernilo,2013-01-31 Daniel Chernilo offers an original reconstruction of the history of universalism in modern social thought from Hobbes to Habermas *Natural Design: a new theory of evolution* Matthew Turner,2010-05-14 This book painstakingly explains why Darwin s theory of Natural Selection is an inadequate and only pseudo scientific explanation for evolution A properly scientific theory of evolution is then outlined The question of how to fit such an extreme theory into a human world view concludes the discussion New Essays in the Legal and Political Theory of Property Stephen R. Munzer,2001-06-18 This collection of essays examines central issues of property theory from a variety of perspectives **New Private Law Theory** Stefan Grundmann,Hans-W. Micklitz,Moritz Renner,2021-03-18 New Private Law Theory opens a new pathway to private law theory through a pluralistic approach Such a theory needs a broad and stable foundation which the authors have built here through a canon of nearly seventy texts of reference This book brings these different texts from different disciplines into conversation with each other grouping them around central questions of private law and at the same time integrating them with the legal doctrinal analysis of example cases This book will be accessible to both experienced and early career scholars working on private law **The New Encyclopedia of Social Reform** William Dwight Porter Bliss,Rudolph Michael Binder,1908
