Judd,2010-09-30 Richard Judd and Christopher Beach define the environmental imagination as the attempt to secure a sense of freedom permanence and authenticity through communion with nature The desire for this connection is based on ideals about nature wilderness and the livable landscape that are personal variable and often contradictory Judd and Beach are interested in the public expression of these ideals in post World War II environmental politics Arguing that the best way to study the relationship between popular values and politics is through local and regional records they focus on Maine and Oregon states both rich in natural beauty and environmentalist traditions but distinct in their postwar economic growth Natural States reconstructs the environmental imagination from public commentary legislative records and other documents Judd and Beach trace important divisions within the environmental movement noting that they were balanced by a consistent civic minded vision of environmental goods shared by all They demonstrate how tensions from competing ideals sustained the movement contributed to its successes but also limited its achievements In the process they offer insight into

the character of the broader environmental movement as it emerged from the interplay of local state and national politics. The study ends in the 1970s when spectacular legislative achievements at the national level were masking a decline in mainstream civic engagement in state politics. The authors note the rise of the private ecotopia and the increasing complexity in the way Americans viewed their connections with the natural world. Yet today despite wide variations in beliefs and lifestyles a majority of Americans still consider themselves to be environmentalists. In *Natural States* environmental politics emerges less as a conflict between people who do and do not value nature and more as a debate about the way people define and then chose to live with nature. In their attempt to place the passion for nature within a changing political and cultural context Judd and Beach shed light on the ways that ideals unify and divide the environmental movement and act as the source of its enduring popularity. **Billboard**, 1992-08-01 In its 114th year Billboard remains the world's premier weekly music publication and a diverse digital events brand content and data licensing platform. Billboard publishes the most trusted charts and offers unrivaled reporting about the latest music video gaming media digital and mobile entertainment issues and trends. **Time** Briton Hadden, 1989 *Peoples of a Sonoran Desert Oasis* Jared Orsi, 2023-10-17 In the southwestern corner of Organ Pipe Cactus National Monument on the border between Arizona and Mexico one finds Quitobaquito the second largest oasis in the Sonoran Desert. There with some effort one might also find remnants of once thriving O'odham communities and their predecessors with roots reaching back at least 12,000 years along with evidence of their expulsion, the erasure of their past, attempts to recover that history and the role of the National Park Service (NPS) at every layer. The outlines of the lost landscapes of Quitobaquito now further threatened by the looming border wall reemerge in *Peoples of a Sonoran Desert Oasis* as Jared Orsi tells the story of the land, its inhabitants ancient and recent and the efforts of the NPS to reclaim Quitobaquito's pristine natural form and to reverse the damage done to the O'odham community and culture first by colonial incursions and then by proponents of preservation. Quitobaquito is ecologically and culturally rich and this book summons both the natural and human history of this unique place to describe how people have made use of the land for some five hundred generations subject to the shifting forces of subsistence and commerce, tradition and progress, cultural and biological preservation. Throughout Orsi details the processes by which the NPS obliterated those cultural landscapes and then subsequently as America began to reckon with its colonial legacy worked with O'odham peoples to restore their rightful heritage. Tracing the building and erasing of past landscapes to make some of them more visible in the present *Peoples of a Sonoran Desert Oasis* reveals how colonial legacies became embedded in national parks and points to the possibility that such legacies might be undone and those lost landscapes remade. **Summit Magazine**, 1990 *Nature's State* Susan Kollin, 2018-06-15 An engaging blend of environmental theory and literary studies *Nature's State* looks behind the myth of Alaska as America's last frontier, a pristine and wild place on the fringes of our geographical imagination. Susan Kollin traces how this seemingly marginal space in American culture has in fact functioned to alleviate larger social anxieties about nature.

ethnicity and national identity Kollin pays special attention to the ways in which concerns for the environment not only shaped understandings of Alaska but also aided U S nation building projects in the Far North from the late nineteenth century to the present era Beginning in 1867 the year the United States purchased Alaska a variety of literary and cultural texts helped position the region as a crucial staging ground for territorial struggles between native peoples Russians Canadians and Americans In showing how Alaska has functioned as a contested geography in the nation s spatial imagination Kollin addresses writings by a wide range of figures including early naturalists John Muir and Robert Marshall contemporary nature writers Margaret Murie John McPhee and Barry Lopez adventure writers Jack London and Jon Krakauer and native authors Nora Dauenhauer Robert Davis and Mary TallMountain Snow Country ,1995 In the 87 issues of Snow Country published between 1988 and 1999 the reader can find the defining coverage of mountain resorts ski technique and equipment racing cross country touring and the growing sport of snowboarding during a period of radical change The award winning magazine of mountain sports and living tracks the environmental impact of ski area development and people moving to the mountains to work and live
