New Directions In Educational Evaluation Ernest R. House,2013-10-28 First published in 1986 Measuring the outcomes of educational practices is a modern phenomenon

Valuing their worth is as old as philosophy itself It is the singular value of this collection of papers set in context and introduced by Ernest House that it holds in dynamic equilibrium both the measurement and the valuing sides of educational evaluation **Fourth Generation Evaluation** Egon G. Guba,Yvonna S. Lincoln,1989 Publisher s description Fourth Generation Evaluation represents a monumental shift in evaluation practice Guba and Lincoln point to the inherent problems faced by previous generations of evaluators politics ethical dilemmas imperfections and gaps inconclusive deductions and lay the blame for failure and nonutilization at the feet of the unquestioned reliance on the scientific positivist paradigm of research Fourth Generation Evaluation a more informed and sophisticated approach moves beyond science to include the myriad human political social cultural and contextual elements that are involved Based upon relativism a unity between knower and known and a subjective epistemology the authors show how fourth generation evaluation unites the evaluator and the stakeholders in an interaction that creates the product of the evaluation Differing from previously existing generations this new approach moves evaluation to a new level whose key dynamic is negotiation The constructivist paradigm is espoused by the authors and shown to offer multiple advantages including empowerment and enfranchisement of stakeholders as well as an action orientation that defines a course to be followed Not merely a treatise on evaluation theory Guba and Lincoln also comprehensively describe the differences between the positivist and constructivist paradigms of research and provide a practical plan of the steps and processes in conducting a fourth generation evaluation
