Naturalists Mexico:

Naturalists and Their Travels in Mexico Horace R. Burke, 1995 *California's Frontier Naturalists* Richard G. Beidleman, 2006-03-02 In California's Frontier Naturalists Richard Beidleman has eloquently chronicled the history of explorations and discovery that revealed the grand legacy of California's biodiversity More than just a series of scholarly essays about naturalists collections and species this book provides lively insight into the motivation that lured diverse naturalists to California's natural cornucopia their personalities their remarkable experiences and their lasting contributions Dieter Wilken Santa Barbara Botanic Garden **The Naturalist's Directory** ,1905 The American Naturalist ,1921

Naturalist's Mexico Roland H. Wauer, 1992 To the nature lover Mexico is a biological paradise possessing the greatest natural diversity in North America With only one fourth the land area of the United States it possesses as many plant species some twenty thousand and many more kinds of animals than its northern neighbor Yet the tourist attractions of Mexico that are known to most visitors are the cities the beaches and the archeological sites Little is available to guide the visitor through Mexico's magnificent outdoors Roland Wauer found long ago that the two ingredients of nature he enjoyed most were the discovery of new birds and the exploration of the remote habitats where they occur Since 1966 he has made annual trips into Mexico to pursue these interests From his adventures he has compiled an indispensable companion for anyone visiting Mexico with an interest in the country's spectacular natural environment He introduces us to all parts of Mexico's outstanding diversity from its arid lowlands and coastal islands to the forested uplands and humid jungles once home of the ancient Mayans He offers vivid word pictures of tropical forests and the northern deserts Twenty nine color photographs and thirty nine black and white shots provide further reason to explore the flora and fauna that thrive off the beaten path This unique introduction to Mexico's avifauna and the rest of its natural environment is designed to aid either in preparation for a trip or during a trip to Mexico It offers a fascinating invitation to find enjoy and respect the diverse and magnificent world of tropical nature that exists there **The Ohio Naturalist** ,1906 Naturalists of the Frontier [Second Edition] Dr. Samuel Wood Geiser, 2018-03-12 This acclaimed study of the history of scientific exploration in the Southwest from renowned biologist Dr Samuel Wood Geiser first published in its present revised edition in 1948 would be of interest to many types of readers For those who love stories of adventure and struggle it narrates the lives and varying fates of men who lived under strange and difficult conditions and who met those conditions some with heroic resolution and resourcefulness some with fainting and failure many with a mixture of both These lives are presented not in the style of the popular semi fiction of the day but with such accuracy as only a thorough study of many sorts of records makes possible yet too with sympathy and insight into human nature throughout For those interested in frontier life and frontier stories this book presents an unwonted aspect of that life the struggle for culture and for science under frontier conditions a struggle no less heroic than that of the fighting pioneer Naturalists of the Frontier realistically portrays the hard material conditions of frontier life yet these are

illuminated by the ideals of the men who subdued those conditions The student of the early history of the Southwest and particularly of Texas will find here presented unusual and significant aspects of that history For the historian of science this book pictures the beginnings of science in a new country it shows what science must be under frontier conditions an examination of the resources of the region rather than a study of underlying problems **Ohio Naturalist** ,1906

Mexico at the World's Fairs Mauricio Tenorio-Trillo,2024-06-12 This intriguing study of Mexico s participation in world s fairs from 1889 to 1929 explores Mexico s self presentation at these fairs as a reflection of the country s drive toward nationalization and a modernized image Mauricio Tenorio Trillo contrasts Mexico s presence at the 1889 Paris fair where its display was the largest and most expensive Mexico has ever mounted with Mexico s presence after the 1910 Mexican Revolution at fairs in Rio de Janeiro in 1922 and Seville in 1929 Rather than seeing the revolution as a sharp break Tenorio Trillo points to important continuities between the pre and post revolution periods He also discusses how internationally the character of world s fairs was radically transformed during this time from the Eiffel Tower prototype encapsulating a wondrous symbolic universe to the Disneyland model of commodified entertainment Drawing on cultural intellectual urban literary social and art histories Tenorio Trillo s thorough and imaginative study presents a broad cultural history of Mexico from 1880 to 1930 set within the context of the origins of Western nationalism cosmopolitanism and modernism This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1997 [Biographical Dictionary of American and Canadian Naturalists and Environmentalists](#) George A. Cevalasco,Lorne Hammond,Richard Harmond,Keir B. Sterling,1997-12-09 Casting a wide net this volume provides personal and professional information on some 445 American and Canadian naturalists and environmentalists who lived from the late 15th century to the late 20th century It includes explorers who published works on the natural history of North America conservationists ecologists environmentalists wildlife management specialists park planners national park administrators zoologists botanists natural historians geographers geologists academics museum scientists and administrators military personnel travellers government officials political figures and writers and artists concerned with the environment Some of the subjects are well known The accomplishments of others are little known Each entry contains a succinct but careful evaluation of the subject s career and contributions Entries also include up to date bibliographies and information concerning manuscript sources **The Ottawa Naturalist** ,1905 **Frontier Naturalist** Russell M. Lawson,2012-11-01 This is a true story of discovery and discoverers in what was the northern frontier region of Mexico in the years before the Mexican War In 1826 when the story begins the region was claimed by both Mexico and the United States Neither country knew much about the lands crossed by such rivers as the Guadalupe Brazos Nueces Trinity and Rio Grande Jean Louis Berlandier a French

naturalist was part of a team sent out by the Mexican Boundary Commission to explore the area His role was to collect specimens of flora and fauna and to record detailed observations of the landscapes and peoples through which the exploring party traveled His observations including sketches and paintings of plants landmarks and American Indians were the first compendium of scientific observations of the region to be collected and eventually published Here historian Russell Lawson tells the story of this multinational expedition using Berlandier s copious records as a way of conveying his view of the natural environment Lawson s narrative allows us to peer over Berlandier s shoulder as he traveled and recorded his experiences Berlandier and Lawson show us an America that no longer exists **The Canadian Field-naturalist** ,1904
