*Greek Reflections on the Nature of Music* Flora R. Levin, 2009-04-27 In this book Flora Levin explores how and why music was so

important to the ancient Greeks She examines the distinctions that they drew between the theory of music as an art ruled by number and the theory wherein number is held to be ruled by the art of music These perspectives generated more expansive theories particularly the idea that the cosmos is a mirror image of music s structural elements and conversely that music by virtue of its cosmic elements time motion and the continuum is itself a mirror image of the cosmos These opposing perspectives gave rise to two opposing schools of thought the Pythagorean and the Aristoxenian Levin argues that the clash between these two schools could never be reconciled because the inherent conflict arises from two different worlds of mathematics Her book shows how the Greeks appreciation of the profundity of music s interconnections with philosophy mathematics and logic led to groundbreaking intellectual achievements that no civilization has ever matched The Nature of Sociology Marcel Mauss,2005-04 Translation of two weeks Sociologie originally published in 1901 in La grande encyclopedie and Divisions et proportions des divisions de la sociologie first published in 1927 Periphyseon on the Division of Nature John the Scot,2011-09-22 Johannes Scotus c 800 c 877 who signed himself as Eriugena in one manuscript and who was referred to by his contemporaries as the Irishman is the most significant Irish intellectual of the early monastic period He is generally recognized to be both the outstanding philosopher of the Carolingian era and of the whole period of Latin philosophy stretching from Boethius to Anselm Since the seventeenth century it has become usual to refer to this Irish philosopher as John Scottus or Scotus Eriugena to distinguish him from the thirteenth century John Duns Scotus Myra Uhlfelder Bryn Mawr PhD 1952 taught classical and medieval Latin at Bryn Mawr Outlines of Nature Oliver Smith,1847
