Nature Conservation, Nature Management and Physical Planning in the Wadden Sea Area Maurits Frans Mörzer Bruijns, 1983-01-01 *Nature Conservation* W J Wolff, Bruyns Morzer, W. J. Wolff, 1983-12 **Ecology of the Wadden Sea** W.J. Wolff, 1983-12-31 This text covers issues such as hydrography flora and vegetation and fishes and fisheries Coastal Zone Management Imperative for Maritime Developing Nations B.U. Haq, Gunnar Kullenberg, Jan H. Stel, 2013-03-09

Anthropogenic transformation of the coastal zone continues at a steady pace especially in the developing maritime countries where coastal resources are often crucial to national economies However exploitation of these resources is often indiscriminate ill planned or carried out without adequate scientific knowledge This leads to rapid resource depletion and often irreversible environmental degradation The 1992 Rio de Janeiro UN Conference on Environment and Development recognized the expediency of an integrated and sustainable use of all coastal resources functions and services grounded on sound scientific data The present volume is based on the 1994 international workshop Integrated Coastal Zone Management and brings together contributions by leading specialists both on basic concepts and on applications of coastal management The work is divided into six parts dealing with the conceptual framework of ICZM regional and global aspects of coastal management environmental assessment in ICZM capacity building and technology transfer monitoring and environmental analysis and case studies and status of ICZM plans The book also incorporates an interactive ICZM planning module COSMO which can be of use in designing a management plan for a coast Attention is also given to long term environmental effects of present day actions It is hoped that COSMO will prove an additional learning tool for ICZM practitioners and enhance the value of the book This work is intended to give a broad coverage of conceptual and technical aspects of ICZM and will be of use to operational executives as well as students of ICZM environmental economists policy makers and senior managers in the international development agencies and governmental and non governmental organizations It can be recommended as a textbook and as a reference work **Ecology of the Wadden Sea: 9. Huiskes, C.W.P.M. Blom, Jelte Rozema, 2012-12-06 This book was composed in honour of Dr Ir W G Beeftink to commemorate his retirement as a plant ecologist at the Delta Institute for Hydrobiological Research Yerseke The Netherlands The editors main aim has been to collect scientific papers of Wim Beeftink's friends and colleagues The title of the book *Vegetation between land and sea* Structure and processes was originally proposed by Prof Dr W H O Ernst It was amended by Prof Dr J J Barkman In our judgement it reflects the best attempt to cover the numerous and divergent contributions under one heading Not all papers however fit the field covered by the title and we use this word both literally and metaphorically We are glad and proud that so many authors went through the strain of the production of a paper ill most cases not scheduled with eagerness Due to the fact that Wim Beeftink has so many close friends in the field of plant ecology this fiber amicorum covers a wide range of disciplines covered in turn by a great variety of people The papers range from taxonomy to experimental physiology from fungi to seed plants from autecology to synsystematics Environmental pollution and management studies are also included The contents of the papers depict Wim's personal evolution as a botanist Retired professors as well as students are amongst the authors heads of departments as well as technicians It proves Wim's ability to be of one mind with all ranks

Long-term Perspective in Coastal Zone Development Frank Ahlhorn, 2009-07-30 From February 2004 until December 2007 the ComCoast project Combined Functions in Coastal Defence Zones was carried out within the Interreg IIIB framework The objective of this project was to investigate and to test the options for spatial coastal protection concepts The mission statement of the project over its entire duration was A wider approach in coastal thinking I was glad to be part of this project and would like to thank all my European colleagues for the constructive and cooperative atmosphere Firstly I would like to express my thanks to Prof Dr Horst Sterr and Prof Dr Hans Kunz who assisted me over these years with their thorough guidance and comprehensive expertise and for many in depth discussions on the focus of this dissertation Secondly I would like to thank my colleague Dr Jürgen Meyerdirks who acted as my key scientific sparring partner over the last two years and who continuously demonstrated his ability to bring me back to earth Additionally I would like to thank my colleague Dr Thomas Klenke who gave me the chance to be part of a challenging European project consortium and who supported me with his expertise on the project and the dissertation Furthermore I would like to express my special thanks to Gerard McGovern

Inshore Fisheries Management David Symes, Jeremy Phillipson, 2013-06-29

Despite their importance in terms of employment and income generation inshore fisheries have been a neglected area of study. The review of the common fisheries policy especially in the light of the need to re-examine the derogation which reserves access to the inshore zone to coastal state vessels provides an opportunity to redress the balance. With contributions from leading authorities on fisheries management the book takes an in-depth look at seven European countries examining the basis for the definition of inshore fisheries evaluating their status and describing the salient characteristics of their management. The national studies form the basis for cross-cultural analyses of the social organisation, cultural norms, economic objectives and institutional structures of inshore fisheries in Europe. Finally a number of key issues relating to the future of inshore fisheries management in a more integrated approach are examined. Overall the volume reaffirms the invaluable role played by inshore fisheries in the local and regional economies of Europe's complex coastline.

Spatializing the History of Ecology

Raf de Bont, Jens Lachmund, 2017-06-26 This book advances a spatial perspective on the history of ecology. Intrigued by broader debates in the humanities on the spatial turn the authors contribute to a more explicit and systematic development of spatial thinking in the history of ecology exploring to which extent a spatial perspective can shed new light on the history of ecological science and using ecology as a critical site to gain broader insights into the history of the environment in the nineteenth and twentieth centuries.

Nature Conservation in Europe

Peter Bromley, 2012-12-06 The Rio Summit has pointed to the urgency for the development of an international conservation policy and the post-Maastricht debates in Europe have highlighted the need for the EU to reassess structural funding in nature conservation as well as the influences on policy and practice. This book is a route map through the legislative and policy frameworks and explains how conservation works in Europe. It goes through the policies for nature conservation in the European Community and its constituent member states and sets out the mechanisms for delivering this policy. An understanding of the European legislative framework is now vital as its influence on local practice increases. Practitioners in the fields of countryside conservation and general land management will find the book an essential guide to the working of the EU as well as helping an appreciation of their local role within the wider community objectives. This will for example allow a better understanding of the grant system which many managers are now using.

the World's Wetlands Richard Smardon, 2009-06-13 Wetlands throughout the world including those described in this book are among the most sensitive and vulnerable ecosystems. They are critical habitats to the world's migratory birds and a broad range of endangered mammal, reptile, amphibian and plant species. They provide a broad range of flood storage, pollution

control water supply ecotourism functions to indigenous peoples and country populations as a whole They are also at the center of severe land and water use conflicts These are conflicts between countries where wetland resources or the water supplies required for such resources involve more than one country These are conflicts in use such as conflicts between habitat protection and charcoal production in mangroves These are conflicts between groups of peoples such as indigenous peoples and hydropower advocates Many wetlands have already been destroyed by water extractions dams levees channelization and fills Others have been degraded by water pollution overfishing and overhunting timber harvest and a host of other activities This book describes these conflicts and international policies and institutions developed to protect and manage wetland resources Most of the broader literature and other books on wetlands focuses on wildlife Wildlife is described in the case studies which follow But Richard Smardon provides us with more He traces the history of conflicts and the development of policies and institutions to protect and manage wetland resources

Living on the Edge Susan Snyman, Kelly S. Bricker, 2021-05-06 Tourism has an essential role in terms of contributing to the financial sustainability of protected areas In addition through effective and efficient benefit sharing tourism can positively impact numerous stakeholders within and beyond the protected area Living on the Edge Benefit Sharing from Protected Area Tourism highlights the complexity of benefit sharing the importance of identifying all relevant stakeholders the challenges of ensuring equity and sustainability and the critical importance of good governance The evolution of benefit sharing mechanisms over time also emphasizes a continuing need to evolve and adapt to each unique situation as much evidence indicates that little has changed for those living on the edge Although this book focuses on benefit sharing from protected area tourism it is essential to acknowledge that along with these benefits are costs associated with tourism including possible increased local prices loss of access to land human wildlife conflict and other related costs The contributing authors agree that benefit sharing must include good governance accountability equity transparency a broad reach of stakeholder engagement and a robust combination of tangible and intangible benefits with recognition that benefit sharing systems need to be adaptive and evolve as needed according to the relevant situation The chapters in this book were originally published as a special issue of the Journal of Sustainable Tourism
