**Nature, Mind and Modern Science** Pierre Boule, 1954 **Nature, Mind and Modern Science** Errol E. Harris, 1954 [Toward a New \(Old\) Theory of Responsibility: Moving beyond Accountability](#) Daryl Koehn, 2019-03-29

This book offers a much needed overview of the neglected notion of responsibility Instead of offering vague talk about individual responsibility or corporate responsibility Daryl Koehn examines in detail four accounts of responsibility taking care to specify what responsibility does and does not mean in each account She argues for a return to the ancient concept of Socratic dialogical responsibility a concept that avoids many of the problems inherent in the other accounts After examining the Anglo American criminal legal system's treatment of responsibility as intentional agency she critiques Hans Jonas's concept of responsibility as ontological care and Hannah Arendt's notion of communicative responsibility She provides a careful analysis of the strengths and weaknesses of each approach to responsibility The final chapter makes the case for Socratic dialogical responsibility Dialogical responsibility has many strengths in its own right and avoids the major pitfalls of the other notions of responsibility examined in the book It serves as an eminently practical way to hold ourselves responsible for our actions and speech In addition dialogical responsibility alone qualifies as a virtue integral to the good life

practice the development of the sciences views on religious toleration or the constitution of European polities In general what kind of transformations did Calvinism s distinct spirituality bring about Such questions demand painstaking and detailed scholarly work a fine sample of which is published in this volume *John Henry Newman on the Nature of the Mind* Jane Rupert,2011-01-01 Jane Rupert shows how Catholic philosopher theologian and priest John Henry Newman sheds light on contemporary liberal education and the humanities by distinguishing between the different ways reason functions in science religion and in literature Rupert discusses the range of Newman s thought on several fronts including intellectual history theories of knowing the controversy between science and religion the defense of the liberal arts and the aims of Catholic education
