Bancroft Prize for his book *Dust Bowl* Worster has helped bring humanity's interaction with nature to the forefront of historical thinking. Now in *The Wealth of Nature* he offers a series of thoughtful eloquent essays which lay out his views on environmental history tying the study of the past to today's agenda for change. *The Wealth of Nature* captures the fruit of what Worster calls my own intellectual turning to the land. History he writes represents a dialogue between humanity and nature though it is usually reported as if it were simple dictation. Worster takes as his point of departure the approach expressed early on by Aldo Leopold who stresses the importance of nature in determining human history. Leopold pointed out that the spread of bluegrass in Kentucky for instance created new pastures and fed the rush of American settlers across the Appalachians which affected the contest between Britain, France and the U.S. for control of the area. Worster's own work offers an even more subtly textured understanding noting in this example for instance that bluegrass itself was an import from the Old World which supplanted native vegetation a form of environmental imperialism. He ranges across such areas as agriculture, water development and other questions examining them as environmental issues showing how they have affected and continue to affect human settlement. Environmental history he argues is not simply the history of rural and wilderness areas; cities clearly have a tremendous impact on the land on which they depend for their existence. He argues for a comprehensive approach to understanding our past as well as our present in environmental terms. Nostalgia runs all through this society, Worster writes, fortunately for it may be our only hope of salvation. These reflective and engaging essays capture the fascination of environmental history and the beauty of nature lost or endangered underscoring the importance of intelligent action in the present.

Browning's Beginnings Herbert F. Tucker Jr., 1980-12-31 *Browning's Beginnings* was first published in 1980. Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions. *Browning's Beginnings* offers a fresh approach to the poet who among major Victorians has proved at once the most congenial and most inscrutable to modern readers. Drawing on recent developments in literary theory and in the criticism of romantic poetry, Herbert F. Tucker Jr. argues that Browning's stylistic obscurity is the result of a principled poetics of evasion. This art of disclosure in deferring formal and semantic finalities constitutes an aesthetic counterpart to his open-ended moral philosophy of incompleteness. Browning's poems like his enormously productive career find their motivation and sustenance in his optimistic love of the future, a love that is indistinguishable from his lifelong fear that there will be nothing left to say. The opening chapters trace the workings of Browning's art of disclosure with extensive and original interpretations of the unduly neglected early poems *Pauline*, *Paracelsus* and *Sordello* and place special emphasis on Browning's attitudes toward poetic tradition and language. A chapter on Browning's attitudes toward poetic tradition and language. A chapter on Browning's plays identifies dynamics of representation in *Pippa Passes*, *Strafford* and *King Victor* and *King Charles*. Tucker discusses the pervasive analogy between Browning's ideas about poetic representation and about representation in its erotic and religious aspects and shows how the

early poems and plays illustrate correlative developments in poetics and in the exploration and dramatic rendering of human psychology The remaining chapters follow the poetic psychology of Browning to its culmination in the great poems of his middle years exemplary readings of selected dramatic lyrics and monologues suggest that the ways of meaning in Browning's mature work variously bear out the sense of endlessness or perpetual initiation that is central to his poetic beginnings Tucker thus contends that the romantic and the Victorian Browning have more in common than is generally supposed and his book should appeal to students of both periods Its discussion of general literary issues poetic influence closure representation and meaning in application to particular texts should further recommend Browning's *Beginnings* to the nonspecialist reader interested in poetry and poetic theory
