**Nature and Other Essays** Ralph Waldo Emerson, 2019-11-26 Ralph Waldo Emerson's famous essay *Nature* declared that understanding nature was the key to understanding God and reality and laid the groundwork for transcendentalism. His legacy of boldly questioning the doctrine of his day and connecting with nature will resonate with today's readers in search of meaning and enlightenment. Essays include *Nature* 1836 and Emerson's first series published in 1841: *History*, *Self Reliance*, *Compensation*, *Spiritual Laws*, *Love*, *Friendship*, *Prudence*, *Heroism*, *The Over Soul*, *Circles*, *Intellect*, and *Art*. *Nature and Other Essays* joins Gibbs Smith's best-selling *Wilderness* series. Standing beside the works of his protégé Henry David Thoreau as well as John Muir, Mark Twain, Walt Whitman, and Jack London, these essays are reissued to encourage and inspire philosophers, travelers, campers, and contemporary naturalists.

**Nature-Inspired Sensors** Hossam Haick, 2024-10-24 Nature Inspired Sensors presents and discusses the basic principles and latest developments in nature inspired sensing and biosensing materials as well as the design and mechanisms for analyzing their potential in multifunctional sensing applications. The book starts with a comprehensive review of certain fundamental mechanisms in different living creatures including humans, animals and plants. It presents and discusses ways for imitating various nature inspired structural features and their functional properties such as hierarchical interlocked porous and bristle like structures and hetero layered brick and mortar structures. It also highlights the utility of these structures and their properties for sensing functions which include static coloration, self cleaning, adhesive, underwater navigation and object detection, electric charge generation and sensitive olfactory functions for detecting various substances. This is followed by an appraisal of accumulating knowledge and its translation from the laboratory to the point of care phase using selective sensors as well as desktop and wearable artificial sensing devices for example electronic noses and electronic skins in conjunction with AI assisted data processing and decision making in the targeted field of application. In addition, the book offers an insight into the challenges of continuing the development of nature inspired smart sensing and biosensing technology and their wider availability which can be substantially improved. It is a valuable reference for graduates, undergraduates, researchers and working professionals in the fields of chemistry, materials science and biomedical and environmental science. Discusses the current strategies for fabricating nature derived bio chemical sensors. Presents ways to apply nature derived bio chemical sensors in real life. Describes the future of nature derived bio chemical sensors.

Scientific Realism and Laws of Nature: A Metaphysics of Causal Powers Michel Ghins, 2024-04-04 This book addresses central issues in the philosophy and metaphysics of science, namely the nature of scientific theories, their partial truth and the necessity of scientific laws within a moderate realist and empiricist perspective. Accordingly, good arguments in favour of the existence of unobservable entities postulated by our best theories such as electrons must be inductively grounded on perceptual experience and not their explanatory power as most defenders of scientific realism claim. Similarly, belief in the reality of dispositions such as causal powers which ground the natural necessity of scientific laws must be based on experience. Hence, this book offers a synthetic presentation of an original metaphysics of science, namely a metaphysics of properties both categorical and dispositional while at the same time opposing strong versions of necessitarianism according to which laws are true in all possible worlds. The main theses and arguments are clearly presented in a non technical way. Thus, on top of being of interest to the specialists of the topics discussed, it is also useful as a textbook in courses for third year and
