

# **NOTHING GOLD CAN STAY**

**BY ROBERT FROST**

Nature's first green is gold,  
Her hardest hue to hold.  
Her early leaf's a flower;  
But only so an hour.  
Then leaf subsides to leaf.  
So Eden sank to grief,  
So dawn goes down to day.  
Nothing gold can stay.

*Nature-poems (and Others)* Thomas Edwards (Minister.), 1893      *Magical Nature* S. T. Kimbrough, Jr., 2025-05-22 The poems of *Magical Nature* suggest that the natural world possesses a magical quality to which humans respond with awe and wonder This happens because creatures flowers seasons and other aspects of nature through appearance activity unknown aspects or characteristics and the interaction of natural phenomena often create a magical experience For example one may see in the sunlight what otherwise might not be seen Or one sees at nighttime what is not seen during daylight Sometimes what may seem magical in nature results from the interaction of both usual and unusual forces and courses of nature The aurora borealis are an excellent example These interweaving strands of light result from magnetic storms activated by explosions on the sun or gas bubbles propelled from the sun The poems in this book do not equate the wonders of nature with magic as such rather they reflect on nature's capacity to evoke awe within us The magical aspects of nature often influence our moods and mental postures They can comfort inspire expand imagination and entertain Hence they are vital to human experience and often enhance the quality of life      *Poems of Nature* Henry David Thoreau, 2022-05-28 In *Poems of Nature* Henry David Thoreau distills his profound observations of the natural world into a poignant collection that celebrates the beauty and complexity of nature Through a blend of lyrical language and philosophical musings Thoreau captures the interplay between humans and the environment reflecting on themes of solitude simplicity and the interconnectedness of all living things His transcendentalist roots are evident as he employs vivid imagery and innovative structures elevating the natural landscapes of Concord Massachusetts to metaphysical realms These poems not only showcase Thoreau's mastery of rhythm and form but also serve as a call for environmental appreciation and mindfulness of one's surroundings Thoreau a leading figure of the American transcendentalist movement was profoundly influenced by his personal experiences and the landscape of New England His time spent in solitude at Walden Pond coupled with his philosophical inquiries into the relationship between man and nature shaped his worldview and inspired his poetic voice Thoreau's passion for the natural world and his critiques of contemporary society became central themes in his writing culminating in this exquisite anthology of nature poetry *Poems of Nature* is essential reading for those who seek to deepen their understanding of the natural world's role in the human experience Thoreau's eloquent verses invite readers to explore their own relationships with nature urging a reflective approach to consumption and environmental stewardship This collection not only enriches the literary
