Natures Phenfen Natural Supplement For Losing Weight Woodland Health

Arnold Fox, Brenda Adderly

Natures Phenfen Natural Supplement For Losing Weight Woodland Health:

From Belly Fat to Belly Flat Genie James, C. W. Randolph, 2010-01-01 Weight loss research shows that the average person will add 1 to 2 pounds around their abdomen each year between the ages of 35 and 55 without changing their eating or exercise habits. Noted expert Dr C W Randolph explains why estrogen dominance is a natural shift in hormone production that begins at age thirty which causes weight gain and sabotages the most steadfast attempts at shedding it. Even worse, estrogen places the added weight around the middle which has a negative impact both aesthetically and medically. Once estrogen dominance has taken hold, it creates a vicious cycle: fat cells will produce even more estrogen which then biochemically predisposes the body to add on even more pounds. Here Dr Randolph introduces the three step plan he's used with success in thousands of patients. In simple language Dr Randolph lays out the facts about bioidentical hormones and explains what foods and supplements guard against or reverse estrogen dominance. He also shares client success stories and presents practical eating plans, recipes and shopping guides to put the advice into practice. **Natural Weight Loss Miracles** Maggie Greenwood-Robinson, 1999 A certified nutrition consultant offers an evaluation of natural weight loss aids from how they work in the body to possible side effects.
