Nature's Living Lights Alvin Silverstein, Virginia B. Silverstein, Pamela Carroll, 1988 Describes bioluminescent insects plants and sea animals and the uses these creatures make of their self generated lights such as communication finding food and attracting mates **Cold Light** Anita Sitarski, 2007-10-01 Luminescence sheds light on the adventure of science Scientists and many others have explored the science and wonder of cold light the chemistry of animals and things that make light but not heat A seventeenth century alchemist tried to turn a stone into gold He failed but the stone glowed in the dark instead The alchemist began to mold the first luminescent objects A light also came on one night for the famous chemist Robert Boyle After he saw a raw chicken glowing in his kitchen he began his own research into luminescence With light humor Anita Sitarski brings the thrill of discovery to life as she recounts the stories of the alchemist chemist Robert Boyle the adventurers who first saw bizarre creatures glowing in the depths of the sea and others Awe inspiring full color photographs accompany the compelling fact filled text in these scientific explorations **Literature for Science and Mathematics** DIANE Publishing Company, 1998 Representing the perspectives of educators in both the science and mathematics communities this publication is intended to serve as a resource for teachers of students in kindergarten through grade 12 in choosing science and mathematics related literature for their schools and classrooms It contains over 1 000 annotated entries on the physical sciences earth sciences life sciences and mathematics Formatted for easy use each entry provides information on the author publisher and publication date type of literature subject emphasis suggested grade span and illustrations **Optical Methods** Larry J. Schneck,1990 A survey of the adaptations that animals have made including comparisons of speed size and strength *Bioluminescence* Marc Zimmer,2015-08-01 What do giant squids mantis shrimp and fireflies have in common These animals along with a wide range of creatures are able to give off light this is called bioluminescence Different species use different chemistries to bioluminesce and they produce their light for a variety of reasons including communication hunting and self defense Bioluminescence is a unique and fascinating adaptation found in the animal kingdom Surprisingly about half of all known phyla a classification for animals that share the same body type contain some bioluminescent species Scientists don t yet understand all facets of bioluminescence but they have managed to harness the glow and use it in a myriad of ways One of the most important applications involves using bioluminescence as a microscope in medical studies For example laboratory scientists can create fluorescent malaria parasites to track the path by which the disease is spread from a mosquito to the animal it bites Bioluminescent proteins are also helping researchers learn more about cancer HIV and other viruses and complex neurological processes In fact bioluminescent proteins are so useful to twenty first century medicine that two groups of scientists one in 2008 and the other in 2014 were awarded the Nobel Prize in Chemistry for their work with these proteins and related technologies Even artists and fashion designers use bioluminescence in their work to create glowing light sensitive paintings and clothing lines Author Marc Zimmer a world renowned specialist in fluorescent proteins takes readers on a glowing journey into the frontiers of bioluminescence Small Animal Imaging Fabian Kiessling,Bernd J. Pichler,Peter Hauff,2017-05-22 This textbook is a practical guide to the use of small animal imaging in preclinical research that will assist in the choice of imaging modality and contrast agent and in study design experimental setup and data evaluation All established imaging modalities are discussed in detail with the assistance of numerous informative illustrations While the focus of the new edition remains on practical basics it has been updated to encompass a variety of emerging imaging modalities methods and applications Additional useful hints are also supplied on the installation of a small animal unit study planning animal handling and cost effective performance of small animal imaging Cross calibration methods and data postprocessing are considered in depth This new edition of Small Animal Imaging will be an invaluable aid for researchers students and technicians involved in research into and applications of small animal imaging Deep Sea Wonders Zara Sagan,2025-01-06 Deep Sea Wonders takes readers on a fascinating journey into the mysterious world of deep
