Naval Aviation In The 1st World War:

Naval Aviation in the First World War R. D. Layman, 1996 All aspects of naval aviation in World War I are detailed in this superbly researched book **United States Naval Aviation 1910-1918** Noel C. Shirley, 2000 United States Naval Aviation 1910 1918 for the first time provides a comprehensive study of the formation and initial deployment of naval aviation in a world war The late eminent naval historian R D Layman wrote that the subject of naval aviation has never been adequately explored had been often underestimated ignored or unrealized The author of this book based upon over thirty years of research into the subject of World War I aviation and based upon both primary and secondary reference sources has compiled into one source a complete history of the early development of naval aviation in the United States He then discusses the manner and role that the naval aviation service applied to the war effort during 1917 1918 The book covers not only the subject of naval aircraft but also describes the activities of the Navy in the field of lighter than air craft Specific information is provided on each of the Naval Air Stations constructed and operated both domestically as well as in Foreign Service during the War Detailed discussion is also provided regarding the role of Marine Corps aviation during this time period **Naval Aviation in World War I** Adrian O. Van Wyen, Naval Aviation News, 2005 When the call to battle sounded in April 1917 the Navy air arm could muster at its one air station only 48 officers and 239 enlisted men with some experience in aviation and 54 aircraft none of which was fit for patrol service The problems of building this small force to a effective fighting unit were enormous Yet the Armistice was signed 19 months later there were 43 air stations in operation at home and abroad an aircraft factory in production and numerous schools assembly plants repair depots and other facilities providing the needed logistic support Aviation personnel numbered over 39000 a figure nearly equal to the total in the entire Navy at the start of the war Little has been published on the nature and extent of Naval air operations in the first World War until in April 1967 Naval Aviation News began a series of monthly articles under the general title Naval Aviation in World War I Using chronologies of significant events and narrative accounts of special phases of the war this series told the story of how Naval Aviation met the challenge The series was conceived by and completed under the direction of the Assistant for Aviation History Mr A O Van Wyen who also wrote many of the articles and arranged for the writing of others While not a definitive history it is the first published word to deal specifically with the accomplishments of Naval Aviation in the first World War Based on official sources as well as the recollections of participants it is authoritatively presented through an interesting combination of official and personal accounts It is also the history of a beginning made under stress of war a beginning in which the men of Naval Aviation demonstrated the potential of aviation as an arm of sea power and set the course for its future growth The success with which they carried out their task is in large measure responsible for the position of aviation at the forefront of Naval power today T F Connolly Vice Admiral USN Deputy Chief of Naval Operations Air Naval Aviation in World War 1 United States. America's Sailors in the Great War Lisle A.

Rose, 2016-12-31 Honorable Mention 2016 Lyman Awards presented by the North American Society for Oceanic History This book is a thrillingly written story of naval planes boats and submarines during World War I When the U S entered World War I in April 1917 America's sailors were immediately forced to engage in the utterly new realm of anti submarine warfare waged on below and above the seas by a variety of small ships and the new technology of airpower The U S Navy substantially contributed to the safe trans Atlantic passage of a two million man Army that decisively turned the tide of battle on the Western Front even as its battleship division helped the Royal Navy dominate the North Sea Thoroughly professionalized the Navy of 1917 18 laid the foundations for victory at sea twenty five years later

America's First Air War

Terry C. Treadwell, 2000 This fascinating pictorial study explains the main reasons why the US entered WWI and the violations by Germany that exacerbated the situation Lavishly illustrated chapters cover the development of the US Air Service and the US Naval Air Service and their first use of aircraft in a combat situation This pictorial essay highlights the personalities that emerged from the war Contains original escape reports from USAS pilots and observers providing detailed insight into the conditions under which they were imprisoned

The Royal Navy's Air Service in the Great War David Hobbs, 2017-09-30 In a few short years after 1914 the Royal Navy practically invented naval air warfare not only producing the first effective aircraft carriers but also pioneering most of the techniques and tactics that made naval air power a reality By 1918 the RN was so far ahead of other navies that a US Navy observer sent to study the British use of aircraft at sea concluded that any discussion of the subject must first consider their methods Indeed by the time the war ended the RN was training for a carrier borne attack by torpedo bombers on the German fleet in its bases over two decades before the first successful employment of this tactic against the Italians at Taranto Following two previously well received histories of British naval aviation David Hobbs here turns his attention to the operational and technical achievements of the Royal Naval Air Service both at sea and ashore from 1914 to 1918 Detailed explanations of operations the technology that underpinned them and the people who carried them out bring into sharp focus a revolutionary period of development that changed naval warfare forever Controversially the RNAS was subsumed into the newly created Royal Air Force in 1918 so as the centenary of its extinction approaches this book is a timely reminder of its true significance

Military Aviation of the First World War Alan Sutton, Alan C. Wood, 2017-04-21 over 470 black and white photographs This beautifully illustrated book provides details of every power that took part in Military aircraft activity during the First World War The war was a global conflict with 57 nations involved but with aviation being in its infancy only eight nations had a major air arm to their fighting Services

Hungary The book covers the formation establishment and wartime exploits of all the major air powers during the war as well as providing thumbnail sketches of all the major aces for each country giving full coverage to The Allies The Royal Flying Corps The French Military Air Service The United States Air Service Aeronautica de Regio Esercito Italy The Belgian Air Arm The Russian Imperial Air Services The Central Powers The Imperial German Air Service and the Austro Hungarian flying service However smaller powers at the time like Australia Canada and Japan as well as Portugal Serbia Romania and South Africa are all featured in this fascinating book *A History of the Royal Navy: World War I* Mike

Farquharson-Roberts, 2014-07-08 World War I is one of the iconic conflicts of the modern era For many years the war at sea has been largely overlooked yet at the outbreak of that war the British Government had expected and intended its military contribution to be largely naval This was a war of ideologies fought by and for empires Britain was not defending simply an island it was defending a far flung empire Without the navy such an undertaking would have been impossible In many respects the Royal Navy fought along the longest front of any fighting force of the Great War and it acted as the leader of a large alliance of navies The Royal Navy fought in the North and South Atlantic in the North and South Pacific its ships traversed the globe from Australia to England and its presence extended the war to every continent except Antarctica Because of the Royal Navy Britain could finance and resource not only its own war effort but that of its allies Following the naval arms race in the early 20th century both Britain and Germany were equipped with the latest naval technology including revolutionary new vessels such as dreadnoughts and diesel powered submarines Although the Royal Navy's operations in World War I were global a significant proportion of the fleet's strength was concentrated in the Grand Fleet which confronted the German High Seas Fleet across the North Sea At the Battle of Jutland in 1916 the Royal Navy under the command of Admiral Jellicoe fought an iconic if inconclusive battle for control of shipping routes The navy might not have been able to win the war but as Winston Churchill put it she could lose it in an afternoon The Royal Navy was British power and prestige 43 244 British navy personnel would lose their lives fighting on the seas in World War I This book tells their story and places the Royal Navy back at the heart of the British war effort showing that without the naval dimension the First World War would not have been a truly global conflict *The RNAS and the Birth of the Aircraft Carrier 1914-1918* Ian M. Burns, 2014 The Royal Naval Air Service's origins were as the Naval Wing of the Royal Flying Corps in April 1912 but did not become a separate service until 1 July 1914 On the outbreak of war in 1914 the service expanded to include service on land providing support of the Royal Naval Division in Belgium to the RFC and as one of the early practitioners of strategic bombing Yet from its early days the RNAS had set out to create a force operating aircraft in support of and in association with the Fleet The RNAS and the Birth of the Aircraft Carrier 1914-1918 traces the development and operational use of aircraft serving with the fleet It follows the training of personnel and the struggle to produce suitable aircraft and weapons including the evolution of the aircraft carrier Nonetheless the constant thread throughout is the operational history of the

Stalking the U-Boat Geoffrey L. Rossano, 2021-08-15 An exceptional piece of scholarship Rossano clearly points out that military organizations in general and a naval air force in particular are built from the ground up and not the other way around While we celebrate the exploits of the pilots Rossano reminds us that there were myriad mechanics constructors paymasters and even some ship drivers who played a vital role in naval aviation during WWI Craig C Felker U S Naval Academy A fine book that will stand for many years as the definitive study of U S naval aviation in Europe Well researched and written the book ranges widely from the high level planning in Washington for a naval air war to moving thousands of men and hundreds of aircraft across the ocean to the routine but dangerous training patrol and bombing flights that constituted the navy's air mission in World War I William F Trimble author of *Attack from the Sea* *Stalking the U Boat* is the first and only comprehensive study of U S naval aviation operations in Europe during WWI The navy's experiences in this conflict laid the foundations for the later emergence of aviation as a crucial sometimes dominant element of fleet operations yet those origins have been previously poorly understood and documented Begun as antisubmarine operations naval aviation posed enormous logistical administrative personnel and operational problems How the USN developed this capability on foreign soil in the midst of desperate conflict makes a fascinating tale sure to appeal to all military and naval historians

Treadwell,2010-10 The First World War was to introduce many innovative and novel ways of killing the enemy It was the first truly modern war fought with modern equipment and for the first time the newfangled aircraft were to play their part Of the 57 nations involved in the First World War only 14 had a naval air force of any description The first aircraft were flimsy and fragile but by late 1914 they had progressed from limited reconnaissance duties to an offensive role By the end of the war aviation was an important element of the modern navy The first aircraft carriers appeared and it was obvious that the days of the capital ship were coming to an end The First Naval Air War is the story of the development of naval aviation from those fledgling squadrons of 1914 to the major weapon in the armory of naval warfare in only five years **Harvard's Military Record in the World War** Frederick Sumner Mead,1921
