Naval Institute Guide To World Naval Weapons Systems 19971998:

The Naval Institute Guide to World Naval Weapons Systems, 1997-1998 Norman Friedman,1997 Covers the vital systems sensors fire control and tracking that support naval weapons and often determine their effectiveness **The Naval Institute Guide to Combat Fleets of the World** ,2002 *Naval Expeditionary Logistics* National Research Council,Commission on Physical Sciences, Mathematics, and Applications,Naval Studies Board,Committee on Naval Expeditionary Logistics,1999-02-09 At the request of the Chief of Naval Operations the National Research Council NRC conducted a study to determine the technological requirements operational changes and combat service support structure necessary to land and support forces ashore under the newly evolving Navy and Marine Corps doctrine The Committee on Naval Expeditionary Logistics operating under the auspices of the NRC s Naval Studies Board was appointed to 1 evaluate the packaging sealift and distribution network and identify critical nodes and operations that affect timely insertion of fuels ammunition water medical supplies food vehicles and maintenance parts and tool blocks 2 determine specific changes required to relieve these critical nodes and support forces ashore from assault through follow on echelonment and 3 present implementable changes to existing support systems and suggest the development of innovative new systems and technologies to land and sustain dispersed units from the shoreline to 200 miles inland In the course of its study the committee soon learned that development of OMFTS is not yet at a stage to allow directly detailed answers to many of these questions As a result the committee addressed the questions in terms of the major logistics functions of force deployment force sustainment and force medical support and the fundamental logistics issues related to each of these functions Arms Diffusion THomas W. Zarzecki,2018-12-20 Weapons proliferation is one of the most pressing global concerns following the end of the Cold War Despite the absence of an overarching superpower conflict armaments and related technologies have continued to spread throughout the international system This has been particularly true in areas like East Asia and the Middle East where the traditional two party arms races are not readily apparent This text addresses these concerns and shortcomings using data on fourteen specific military technological innovations that diffused throughout the international system from 1960 to 1997

United States Naval Institute Proceedings ,1999 **The Tools of Owatatsumi** Desmond Ball,Richard Tanter,2015-01-21 Japan is quintessentially by geography a maritime country Maritime surveillance capabilities underwater shore based and airborne are critical to its national defence posture This book describes and assesses these capabilities with particular respect to the underwater segment about which there is little strategic analysis in publicly available literature Since the end of the Cold War Chinese oceanographic and navy vessels have intruded into Japanese waters with increasing frequency not counting their activities in disputed waters such as around the Senkaku Diaoyu Islands and Okinotorishima where China and Japan have overlapping territorial claims These intrusions have increasingly involved warships including submarines sometimes acting quite aggressively Japan maintains an extraordinary network of undersea hydrophone arrays

connected to shore stations which are typically equipped with electronic intelligence ELINT systems for monitoring identifying and tracking submarine and surface traffic in its internal straits and surrounding seas Some parts of this network are operated jointly with and are of crucial importance to the US Navy Japan's superlative submarine detection capabilities would be of decisive advantage in any submarine engagement But the relevant facilities are relatively vulnerable which makes them very lucrative targets in any conflict This introduces compelling escalatory dynamics including the involvement of US forces and possible employment of nuclear options

Instruments of War Spencer C. Tucker, 2015-07-28 This highly detailed and well illustrated single volume work documents the evolution of warfare across history through weaponry and technological change In war the weapons and technologies employed have direct effects on how battles are waged When new weapons are introduced they can dramatically alter the outcomes of warfare and consequently change the course of history itself This reference work provides a fascinating overview of the major weapon systems and military technologies that have had a major impact on world history Addressing weapons as crude as the club used by primitive man to the high tech weapons of today such as unmanned drones *Instruments of War Weapons and Technologies That Have Changed History* offers nearly 270 profusely illustrated entries that examine the key roles played by specific weapons and identify their success and failures The book begins with an introductory essay that frames the subject matter of the work and discusses the history of weapons as a whole The text is concise and accessible to general readers without extensive backgrounds in military history yet provides the detailed information necessary to convey the complexity of the evolution of warfare through technological change

Exploration and Monitoring of the Continental Shelf Underwater Environment Iftikhar B. Abbasov, 2018-09-14 Dedicated to the unique developments of hydroacoustical equipment to monitor the sea coastal shelf environment this groundbreaking unique study presents a survey of modern methods and technical monitoring facilities including the diagnostics of underwater engineering when monitoring offshore There is still so much about the oceans that scientists do not know and exploring the continental shelves of the world is a huge part of finding out more about these underwater environments Further to that it is extremely important that while scientists and engineers explore and monitor the continental shelf no damage is done to these precious environments That is the needle that this study intends to thread giving scientists and engineers a better method and processes for exploring these underwater mysteries while protecting the environment and wildlife thriving beneath Written by a proven scientist in this area this book is dedicated to the unique developments of hydroacoustical equipment to monitor the coastal shelf The results of the original experimental sonar studies with application of the parametric antenna are presented The book presents a survey of the modern methods and technical monitoring facilities of the coastal aqueous environment The basic characteristics of the parametric antennas are given considering propagation of the acoustic waves in the environments with dispersion and acoustical absorption The author and his colleagues consider the questions of formation of the parametric antenna field in layered heterogeneous

media and the peculiarities of sounding of the interfaces and bottom sediments Ecological monitoring methods of the basic parameters of quality and condition of the aqueous environment are analyzed The peculiarities of diagnostics of the underwater engineering constructions when monitoring the offshore strips are described For both veteran engineers and students in the field alike this breakthrough study is a must have for any scientific library concerned with studying the oceans and especially the continental shelf *People's Liberation Army Navy* James Bussert, Bruce Elleman, 2011-07-01 Rare among books on weapon systems technologies this work traces China's development from a coastal defense force of obsolete ships with crude weapons to its current complex missile catamarans and Aegis like destroyers with vertical launch weapons and long range cruise missiles As the only book devoted solely to all combat systems on Chinese warships it is a convenient one stop reference filled with tables that break down specifications and parameters into specific areas such as sensors and weapons for specific hulls The book is divided into sections on frigates destroyers submarines patrol craft and aircraft Antisubmarine anti air anti surface and mine warfare are covered separately For war gamers there are tables with frequencies load outs and ranges The authors prompt readers to discern areas of weakness and strength in the Chinese combat systems **The ABCs of Cold War History** Bruce A. Elleman, 2024-12-03 A short but highly relevant history of the Cold War 1919 1994 and its significance today The 75 year Cold War pitted the Anglo American world against the Soviet Bloc with China the ultimate prize Chapter A will examine the creation of the Anglo American Special Relationship the end of World War I 1919 Versailles Peace Treaty and the lead in to World War II Chapter B will examine the Bolshevik revolution 1919 Comintern creation 1924 Soviet Bloc creation the tumultuous 1930s World War II plus Soviet competition with America and England through 1949 Chapter C will discuss a China torn between West and East finally joining the Soviet bloc in 1949 but by 1979 rejoining the West and cooperating to destroy the USSR from 1979 to 1994 when the final Russian troops left Germany In the Conclusion the Cold War's impact and strategic significance today will be discussed From 1979 to 1994 the U S government attempted to use its relations with China to exert diplomatic economic and military pressure on the USSR Beginning in the late 1970s and continuing through the 1980s China began to import high technology equipment from the United States to fill key sensor and weapon roles With the end of the Cold War in particular the Soviet navy was eliminated almost overnight as the world's second most powerful naval force Russia's Pacific fleet is now so poorly supplied and equipped that it rarely leaves port This unprecedented reversal of fortunes has created a maritime vacuum throughout East Asia that China hopes to fill In recent years however the former Sino U S cooperation has changed as rising Chinese sponsored tensions in the South China Sea have led to many possible points of alliance between Beijing and Moscow Joint Sino Russian Naval Exercises are just one example Vladimir Putin and Xi Jinping appear to once again be combining against the Anglo American led West Will history rhyme as Mark Twain says allowing the Anglo American West to win Cold War II or will events turn out differently this time *Knowledge-Based Intelligent Information and Engineering Systems* Bogdan

Gabrys,2006-10-11 The three volume set LNAI 4251 LNAI 4252 and LNAI 4253 constitutes the refereed proceedings of the 10th International Conference on Knowledge Based Intelligent Information and Engineering Systems KES 2006 held in Bournemouth UK in October 2006 The 480 revised papers presented were carefully reviewed and selected from about 1400 submissions The papers present a wealth of original research results from the field of intelligent information processing

The Modernisation of the Republic of Korea Navy Ian Bowers,2018-08-11 This book sheds light on one of the most under studied but powerful navies in the world Using a multifaceted approach it examines how the Republic of Korea Navy ROKN has sought to transform itself from a coastal naval force focused solely on deterring North Korea to a navy capable of operating in the blue waters of East Asia and beyond The project argues that peninsular and regional security dynamics technological developments the US South Korea alliance and internal politics combine to inform and shape ROKN modernisation *Choice* ,1998 **Naval Engineers Journal** ,2001 A Global Chronology of Conflict Spencer C.
