**Concentration Camps** Dan Stone, 2016-12-06 Concentration camps are a relatively new invention a recurring feature of twentieth century warfare and one that is important to the modern global consciousness and identity Although the most famous concentration camps are those under the Nazis the use of concentration camps originated several decades before the Third Reich in the Philippines and in the Boer War and they have been used again in numerous locations not least during the genocide in Bosnia They have become defining symbols of humankind s lowest point and basest acts In this book Dan Stone gives a global history of concentration camps and shows that it is not only mad dictators who have set up camps but instead all varieties of states including liberal democracies that have made use of them Setting concentration

camps against the longer history of incarceration he explains how the ability of the modern state to control populations led to the creation of this extreme institution Looking at their emergence and spread around the world Stone argues that concentration camps serve the purpose from the point of view of the state in crisis of removing a section of the population that is perceived to be threatening traitorous or diseased Drawing on contemporary accounts of camps as well as the philosophical literature surrounding them Stone considers the story camps tell us about the nature of the modern world as well as about specific regimes

From Broken Glass Steve Ross, Glenn Frank, 2018-05-15 From the survivor of ten Nazi concentration camps who went on to create the New England Holocaust Memorial a devastating inspirational memoir The Today Show about finding strength in the face of despair On August 14 2017 two days after a white supremacist activist rammed his car into a group of anti Fascist protestors killing one and injuring nineteen the New England Holocaust Memorial was vandalized for the second time in as many months At the base of one of its fifty four foot glass towers lay a pile of shards For Steve Ross the image called to mind Kristallnacht the Night of Broken Glass in which German authorities ransacked Jewish owned buildings with sledgehammers Ross was eight years old when the Nazis invaded his Polish village forcing his family to flee He spent his next six years in a day to day struggle to survive the notorious camps in which he was imprisoned Auschwitz Birkenau and Dachau among them When he was finally liberated he no longer knew how old he was he was literally starving to death and everyone in his family except for his brother had been killed Ross learned in his darkest experiences by observing and enduring inconceivable cruelty as well as by receiving compassion from caring fellow prisoners the human capacity to rise above even the bleakest circumstances He decided to devote himself to underprivileged youth aiming to ensure that despite the obstacles in their lives they would never experience suffering like he had Over the course of a nearly forty year career as a psychologist working in the Boston city schools that was exactly what he did At the end of his career he spearheaded the creation of the New England Holocaust Memorial a site millions of people including young students visit every year Equal parts heartrending brutal and inspiring From Broken Glass is the story of how one man

survived the unimaginable and helped lead a new generation to forge a more compassionate world      A Battlefield of Ideas Tadeusz Debski, 2001 Written by a concentration camp survivor Battlefield of Ideas draws upon personal experience and historical sources largely unknown to American scholars to provide an in depth examination of life inside the camps and the survival tactics of Polish prisoners Debski offers a new battlefield model for studying the camps that emphasizes the prisoners actions against Nazi power and stands as a powerful critique of older explanatory models put forth by prominent scholars such as Hannah Arendt and Lawrence Langer that assume prisoners were unable to resist Reflecting the range of responses in the camps up to and including resistance Debski presents a typology of prisoners that represents a significant contribution to our understanding of the sociology of the camps The book also includes detailed documentation on the structure of the camps and the daily routines of the prisoners lives A final chapter deals with the lives of the survivors after liberation and the sometimes painful reintegration into society and reintegration of their selves that marked survivors ultimately as victors and not victims Battlefield of Ideas is at once deeply personal and rigorously researched a stirring testimony to the human instinct to persevere in the face of evil      The Theory and Practice of Hell Eugen Kogon, 2006-09-19 By the spring of 1945 the Second World War was drawing to a close in Europe Allied troops were sweeping through Nazi Germany and discovering the atrocities of SS concentration camps The first to be reached intact was Buchenwald in central Germany American soldiers struggled to make sense of the shocking scenes they witnessed inside They asked a small group of former inmates to draft a report on the camp It was led by Eugen Kogon a German political prisoner who had been an inmate since 1939 The Theory and Practice of Hell is his classic account of life inside Unlike many other books by survivors who published immediately after the war The Theory and Practice of Hell is more than a personal account It is a horrific examination of life and death inside a Nazi concentration camp a brutal world of a state within state and a society without law But Kogon maintains a dispassionate and critical perspective He tries to understand how the camp works to uncover its structure and social organization He knew that the book would shock some readers and provide others with gruesome fascination But he firmly believed that he had to show the camp in honest unflinching detail The result is a unique historical document a complete picture of the society morality and politics that fueled the systematic torture of six million human beings For many years The Theory and Practice of Hell remained the seminal work on the concentration camps particularly in Germany Reissued with an introduction by Nikolaus Wachsmann a leading Holocaust scholar and author of Hitler's Prisons this important work now demands to be re read      The Nazi Concentration Camps, 1933-1939 Christian Goeschel, Nikolaus Wachsmann, 2012-07-01 Weeks after Adolf Hitler came to power in 1933 the Nazi regime established the first concentration camps in Germany Initially used for real and suspected political enemies the camps increasingly came under SS control and became sites for the repression of social outsiders and German Jews Terror was central to the Nazi regime from the beginning and the camps gradually moved toward the center of repression torture and mass murder during World War II and

the Holocaust This collection brings together revealing primary documents on the crucial origins of the Nazi concentration camp system in the prewar years between 1933 and 1939 which have been overlooked thus far Many of the documents are unpublished and have been translated into English for the first time These documents provide insight into the camps from multiple perspectives including those of prisoners Nazi officials and foreign observers and shed light on the complex relationship between terror state and society in the Third Reich

**Auschwitz** Jadwiga Bezwińska, Franciszek Piper, Teresa Świebocka, 1996

Slave Labor in Nazi Concentration Camps Marc Buggeln, 2014-12-18

Slave Labor in Nazi Concentration Camps examines the slave labor carried out by concentration camp prisoners from 1942 and the effect this had on the German wartime economy This work goes far beyond the sociohistorical reconstructions that dominate Holocaust studies it combines cultural history with structural history drawing relationships between social structures and individual actions It also considers the statements of both perpetrators and victims and takes the biographical approach as the only possible way to confront the destruction of the individual in the camps after the fact The first chapter presents a comparative analysis of slave labor across the different concentration camps including Auschwitz Buchenwald and Dachau The subsequent chapters analyse the similarities and differences between various subcamps where prisoners were utilised for the wartime economy based on the example of the 86 subcamps of Neuengamme concentration camp which were scattered across northern Germany The most significant difference between conditions at the various subcamps was that in some hardly any prisoners died while in others almost half of them did This work carries out a systematic comparison of the subcamp system a kind of study which does not exist for any other camp system This is of great significance because by the end of the war most concentration camps had placed over 80 percent of their prisoners in subcamps This work therefore offers a comparative framework that is highly useful for further examinations of National Socialist concentration camps and may also be of benefit to comparative studies of other camp systems such as Stalin's gulags
