Opec Instrument Of Change:

OPEC Ian Seymour,1980-12-18 *British Petroleum and Global Oil 1950-1975* James Bamberg,2000-08-31 Dramatic narrative arresting analysis and original research are combined in this book which addresses the history of one of the world's biggest oil businesses between 1950 and 1975 Assessing BP's comparative performance the book focuses on how BP responded politically economically and culturally to the rise of new competitors the decline of Britain's imperial power and the determination of nation states to assert national sovereignty over the vital commodity oil Climaxing with the OPEC crisis which shook the world in the 1970s the book authorised by BP with uniquely unrestricted access to its records is of wide interest and relevance especially for those interested in big business globalisation and nationalism international affairs OPEC the Middle East and oil **The Rise, Corruption and Coming Fall of the House of Saud** Saïd K. Aburish,2005-08-15 The explosive story of the dynasty whose greed and corruption have brought Saudi Arabia to the very brink of bankruptcy a dynasty now on the verge of collapse Economic Development in the Middle East Rodney Wilson,2002-03-11 Despite its oil resources the Middle East is falling behind other regions of the developing world notably the countries of East and South East Asia Rodney Wilson examines the economic prospects for the region considering the consequences of rapid population growth including the implications for education and employment low savings levels the absence of significant inflows of private capital and foreign investment fragmentation of the banking system the basic economic infrastructure and the problems caused by excessive military expenditure falling oil prices budget deficits The author examines alternative economic directions for the region arguing that both the methods and goals of development have to be reassessed in a region where Islam prevails **Arab Oil Policies in the 1970s** Yusuf Sayigh,2015-05-15 Until 1973 few people either in the advanced industrial countries or in the developing countries of the Third World thought seriously on the issues and complexities involved in the production and marketing of the oil on which they relied It was only with the sudden steep increases in oil prices that the oil industry became a matter of general discussion and the Organisation of Petroleum Exporting Countries OPEC became a front page topic for analysis and comment However real understanding of the organisation and its policies did not accompany this rush of interest and much confusion has followed In particular the Arab exporters have received the weight of the criticism although they have only a share in the market and not a monopoly This book attempts to instil a greater mutual understanding between oil exporters and importers although it is not a wholesale endorsement of Arab policies by outlining the major policy areas in this field It looks at new policy options and their implications in exploration marketing and pricing and at downstream operations such as the petrochemical and gas industries In conclusion this study identifies the wide ranging opportunities that the new oil policies have opened up for the Arab countries in the national regional and international context and assesses and clarifies the responsibilities which accompany this success First published in 1983 **A World at the Crossroads** Joseph Rotblat,Sven Hellman,1994 This
