Operations Research In Hospitals Diagnosis And Prognosis:

Operations Research in Hospitals: Diagnosis and Prognosis David H. Stimson, Ruth H. Stimson, 1972 *Operations Research for Health Planning and Administration* Stephen J. Duckett, 2012-12-06 Operations research aims to assist managers faced with problems of coordinating activities improving the quality of care of services delivered making optimal resource allocation decisions and generally managing services and institutions Operations research or O R was originally developed in response to the problems of the second World War It was characterised then by a unifying and clear objective clear problems that had to be solved and the use of inter disciplinary teams to analyse and solve identified problems This analysis often drew on mathematical techniques After the war operations research moved in two separate but related directions In England the emphasis on inter disciplinary approaches and problem solving teams remained The operations researcher still used mathematical techniques but these were not systematised into a volume of standard formulae The emphasis of operations research was on the approach not the tools used see for example Luckman also Luck Luckman Smith and McLachlan 1975 In the United States the emphasis was placed on the use of mathematical techniques Operations research became a mathematically based science relying on standardised models e g queuing allocation and formulae This approach was facilitated by the availability of computers Neuromatic John Lardas Modern, 2021-09-29 The story Modern tells ranges from eighteenth century brain anatomies to the MRI from the spread of phrenological cabinets and mental pieties in the nineteenth century to the discovery of the motor cortex and the emergence of the brain wave as a measurable manifestation of cognition from cybernetic research into neural networks and artificial intelligence to the founding of brain centric religious organizations such as Scientology from the deployments of cognitive paradigms in electric shock treatment to the work of Barbara Brown a neurofeedback pioneer who promoted the practice of controlling one's own brainwaves in the 1970s What Modern reveals via this grand tour is that our ostensibly secular turn to the brain is bound up at every turn with the religion it discounts ignores or actively dismisses Nowhere are science and religion closer than when they try to exclude each other at their own peril **The Computer and Blood Banking** J. R. Möhr, A. Kluge, 2013-03-08 In the autumn of 1980 the decision was made by the responsible bodies of the German Society for Medical Documentation Informatics and Statistics Deutsche Gesellschaft für Medizinische Dokumentation Informatik und Statistik e V to make the application of computers in blood banking and blood transfusion one of the topics to be treated at the 8th spring conference of this Society which was then arranged to take place in Tübingen from April 9-11 1981 The goal of the conference was to unite application specialists and methodologists in order to assess current achievements and identify fields needing further improvement We were fortunate to obtain the interest of the German Society for Blood Transfusion and Immunohaematology D. Roos the head of the EDP Work study group of the Section 1 of this Society did substantially influence the programme Many of the papers actually reflect accomplishments of his research and of the work study group We also consider ourselves fortunate to win Prof C
