Wheatley,2007-09-06 This book deals with the role of water in cell function Long recognized to be central to cell function water s role has not received the attention lately that it deserves This book brings the role of water front and central It presents the most recent work of the leading authorities on the subject culminating in a series of sometimes astonishing observations This volume will be of interest to a broad audience **Molecular Imaging** Society of Photo-optical Instrumentation Engineers,International Biomedical Optics Society,2000 Smart Electromechanical Systems Andrey E. Gorodetskiy,Irina L. Tarasova,2022-04-12 This book presents the latest achievements in the field of theory and practice of information processing in the CNS SEMS Recently the task of integrating computer technologies transmitting and storing information monitoring and controlling objects of the physical world has become urgent This capability is provided by Smart Electromechanical Systems SEMS used in Cyber Physical Systems CPhS The main tasks in the field of theory and practice of SEMS are to ensure the efficiency reliability and safety of functioning in real time The task of obtaining reliable information about the selection environment as well as object recognition and identification is especially important when several SEMS interact in a group Since in this case it is necessary to ensure the safety and speed of the planned behavior of all members of the group The purpose of the publication is to familiarize with the latest achievements of scientists of the Russian Academy of Sciences and leading universities of Russia in the field of theory and practice of information processing in the CNS of EMS as well as to familiarize with the development of methods and algorithms for recognition identification and modeling based on the principles of bionics adaptivity intelligence and parallelism in information processing and computing Topics of primary interest include but are not limited to the following Methods and systems of recognition and identification Mathematical and computer modeling Measurement systems to identify the simulation of the selection environment Sensors and auxiliary SEMS systems This book is intended for students scientists and engineers specializing in smart electromechanical systems and robotics Directory of Published Proceedings ,2002 **Optical Diagnostics and Sensing** ,2004

Multi-parameter Mueller Matrix Microscopy for the Expert Assessment of Acute Myocardium Ischemia Victor Bachinsky,Oleh Ya Vanchulyak,Alexander G. Ushenko,Yurii A. Ushenko,Alexander V. Dubolazov,Alexander Bykov,Benjamin

Hogan,Igor Meglinski,2021-04-13 This book provides an essential overview of the basic principles of imaging modalities accompanied by examples of their applications in modern clinical and associated pre clinical studies The monograph is based on the original results of investigation of the efficiency use of laser light and Mueller matrix polarimetry approach for assessment of myocardial tissues towards confirmation the cause of death A morphological analysis of necrotic changes in the myocardial tissue of patients that died due to heart attack coronary heart disease and acute coronary insufficiency was carried out and the data and histological sections of the myocardium inspected utilizing Mueller matrix mapping of tissue samples with polarized light A unified optical model of polycrystalline structure of the myocardium is proposed and the principles and regulations of Mueller matrix description of its polarization manifestations are explored and developed The book also provides a statistical and scale selective wavelet analysis of polarization and Mueller matrix maps Finally the key forensic medical criteria for the differential diagnosis of the cause of death due to necrotic and pathological changes in the morphological structure of the myocardium have been established *Publications in Engineering* ,2000 *Biophotonics*

Xun Shen,Roel van Wijk,2006-12-11 It is now well established that all living systems emit a weak but permanent photon flux in the visible and ultraviolet range This biophoton emission is correlated with many if not all biological and physiological functions There are indications of a hitherto overlooked information channel within the living system Biophotons may trigger chemical reactivity in cells growth control differentiation and intercellular communication i e biological rhythms The basic experimental and theoretical framework as well as the technical problems and the wide field of applications in the biotechnical biomedical engineering engineering medicine pharmacology environmental science and basic science fields are presented in this book To promote the dialog and mutual penetration between biophoton research and photon technology is one of the important goals for the International Conference on Biophotons Biophotonics 2003 and is developed and presented in Biophotonics Optical Science and Engineering in the 21st Century [Laser Polarimetry of Biological Tissues](#) Zhengbin Hu,I.L. Bezhenar,O.Y. Vanchulyak,A. G. Ushenko,Yu. A. Ushenko,Mykhailo P. Gorsky,Igor Meglinski,2023-06-16 This book highlights the results of numerical computer aided smart methods as part of a comprehensive statistical correlated and fractal analysis of laser polarimetry It includes a comprehensive approach to differentiation of lifelong or postmortem origin of injuries and determination of their antiquity based on the analysis of statistical and spatiotemporal frequency evolution of photometric polarization and phase parameters of laser images of histological sections of the skin of biomannequins It discusses the relationship between the coordinate distributions of the intensity of laser images from skin tissues of biomannequins and the nature of its damage It presents the analysis of relationships between changes in the mean and variance of coordinate distributions of azimuths and ellipticity of polarization images of histological skin sections and the time intervals after injury Complex differentiation of lifelong and postmortem skin injuries of biomannequins and establishment of their time intervals throughout the entire monitoring interval of changes in the mean and variance of

coordinate distributions of phase shifts between orthogonal components of the amplitude of laser images of a series of corresponding histological sections are also presented in this book **Index of Conference Proceedings** British Library.
