subsystems for very high speed optical networks offer new design opportunities to network operators and designers The trends towards dynamically configurable all optical network infrastructures open up a wide range of new network engineering and design choices which must face issues such as interoperability and unified control and management

Towards an Optical Internet Admela Jukan, 2001-10-31 In these exciting times of quotidianly progressing developments in communication techniques where more than ever in the history of a technological progress society's reliance on communication networks for medicine education data transfer commerce and many other endeavours dominates the human's everyday life the optical networks are certainly one of the most promising and challenging networking options Since their commercial arrival in the nineties they have fundamentally changed the way of dealing with traffic engineering by removing bandwidth bottlenecks and eliminating delays Today after the revolutionary bandwidth expansion the networking functionality migrates more and more to the optical layer and the need to establish fast wavelength circuits and capacity on demand for the higher layer networks in particular data networks based on Internet Protocol IP has become one of the central networking issues for the new century The unifying trends toward configurable all optical network infrastructure open up a wide range of new network engineering and design choices dealing with networks interoperability and common platforms for control and management The Fifth Working Conference on Optical Network Design and Modelling held in the Austrian capital Vienna February 5-7 2001 aims at presenting the most recent progress in optical communication techniques new technologies standardisation process emerging markets and carriers A short look at the Table of Contents of this book tells us in fact that this year's conference program reflects the current state of the art precisely *Optical Network Design and Modeling* Anna Tzanakaki, Manos Varvarigos, Raul Muñoz, Reza Nejabati, Noboru Yoshikane, Markos
