Practical Management Of The Developmentally Disabled Child:

The Practical Management of the Developmentally Disabled Child Albert P. Scheiner, Israel F. Abroms, 1980-01-01

Textbook of Developmental Pediatrics Marvin I. Gottlieb, Janice E. Williams, 2013-11-11 Child adolescent development and behavior have been a traditional concern of primary health care providers. However, it was not until the mid 1960s that attempts were made to consolidate developmental behavioral issues into an identifiably distinct fund of medical knowledge. During the ensuing two decades, developmental behavioral pediatrics was recognized as a clinical and research subspecialty within the framework of comprehensive health care for children. The influence of public advocacy groups, topic dedicated journals, national professional specialty societies, subject related continuing education programs, and federal legislation PL94-142 has served to crystallize developmental behavioral pediatrics as a specialized field of study. As a consequence, during the past ten years, significant modifications have restructured medical student and pediatric resident education, providing an emphasis on developmental behavioral issues. The focus on neurodevelopmental, educational, and psychosocial issues reflects changing priorities in traditional health care for children. The postgraduate training of pediatric fellows in two and three year training programs was initiated to accommodate professional manpower needs in both academic and practice settings. Many of the problems in childhood development and behavior frequently span the traditional areas of child neurology, child psychiatry, and general pediatrics. As a result, there has been some confusion in demarcating professional responsibilities in diagnosis and management, as well as poorly defined terminology and classification schemas. With the birth of developmental pediatrics as a pediatric specialty, a more cohesive fund of knowledge has been accumulated, and more meaningful strategies have been designed for prevention, diagnosis, and management.
