Egypt and Mesopotamia were not merely outdated belief systems but vital stages in humanity's evolution of consciousness. These traditions planted within us the seeds of moral sacrifice, commitment to a better world, and the courage to confront life and death. Today, cutting-edge prehistorians are abandoning the myth of culture as a patchwork of conquests, embracing instead a Palaeolithic Continuity Model that resonates deeply with Steiner's vision. In this illuminating second volume, Welburn bridges the gap between the Ice Age's transformative crisis and a bold new interpretation of modernity. Drawing on Steiner's insights, including the profound Moses Mystery, he reveals how the Bible and Christianity are illuminated by the hidden currents of human consciousness. A groundbreaking work that redefines our past to better understand our future.

**Ponyfinder: Campaign Setting** David Silver, 2014-02-14. Adventure in the world of Everglow, nestled in delicate balance between the elemental planes. It is a world of magic and mystery where the fey are in control and the humanoid races are secondary. Foremost of the fey are Ponykind, who rallied behind their Queen to form the greatest empire Everglow had ever seen. We've brought ponies, griffons, felines, and other strange creatures to life in a world all of their own, where they are the primary PCs. Don't want to run a game all about ponies? That's alright. Use our post-empire suggestions to add ponies to any other existing world. Many spells, archetypes, and bloodlines are also usable by non-ponies or other settings. New gods. New spells. New class archetypes. New equipment. New bloodlines. New races. Compatible with Pathfinder and 5E.

Joint Congressional Committee on the Investigation of the Northern Pacific Railroad Land Grants, 1925. *Computers and Cognition: Why Minds are not Machines*. J.H. Fetzer, 2013-03-07. An important collection of studies providing a fresh and original perspective on the nature of mind, including thoughtful and detailed arguments that explain why the prevailing paradigm, the computational conception of language and mentality, can no longer be sustained. An alternative approach is advanced, inspired by the work of Charles S. Peirce, according to which minds are sign-using or semiotic systems, which in turn generates distinctions between different kinds of minds and overcomes problems that burden more familiar alternatives. Unlike conceptions of minds as machines, this novel approach has obvious evolutionary implications, where differences in semiotic abilities tend to distinguish the species. From this point of view, the scope and limits of computer and AI systems can be more adequately appraised, and alternative accounts of consciousness and cognition can be more thoroughly criticised.

Readership: Intermediate and advanced students of computer science, AI, cognitive science, and all students of the philosophy of the mind.
