Looking At Houses History In Focus:

Attention: A Personal History of Finding Focus (or Trying To) Casey Schwartz, 2021-09-07 A memoir cum meditation on the idea of attention Schwartz is brilliant funny and clear NPR As technology embeds itself ever more deeply into our lives and distraction takes hold as our universal affliction Casey Schwartz grapples with the essential questions of attention what is it How can we conserve it And what else is lost when we give it away With humor candor and captivating stories Schwartz reflects on the decade she spent taking Adderall to help her focus or so she thought and embarks on a quest to pin down the precious and elusive resource of attention This investigation takes us on an eye opening journey through the work of thinkers such as Williams James David Foster Wallace Aldous Huxley Simone Weil and out into the world beyond From our craving for diversions to our craving for a cure from Silicon Valley consultants and psychedelic researchers to trauma expert Dr Gabor Maté Attention explores the modern landscape of distraction and the possibility of finding focus despite it Brilliantly combining memoir biography and original reporting Schwartz documents the abundant demands on our attention with piercing insight and illuminates the path to reclaiming authentic life *Women and Architectural History* Dana Arnold, 2024-07-01 In this book prominent architectural historians who happen to be women reflect on their practice and the intervention this has made in the discipline Of particular concern are the ways in which feminine subjectivities have been embodied in the discourses of architectural history Each of the chapters examines the author's own position and the disruptive presence of women as both subject and object in the historiography of a specific field of enquiry The aim is not to replace male lives with female lives or to write women into the masculinist narratives of architectural history Instead this book aims to broaden the discourses of architectural history to explore how the potentially unnatural rule of women subverts canonical norms through the empowerment of otherness rather than a process of perceived emasculation The essays examine the historiographic and socio cultural implications of the role of women in the narratives and writing of architectural history with particular reference to Western traditions of scholarship on the period 1600 1950 Rather than subscribing to a single position individual voices critically engage with past and present canonical histories disclosing assumptions biases and absences in the architectural historiography of the West This book is a crucial reflection upon historiographical practice exploring potential openings that may contribute further transformation of the theory and methods of architectural history Chapter 9 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution NonCommercial NoDerivatives CC BY NC ND 4.0 International license *Domestic Architecture and Power* Ross W. Jamieson, 2005-12-08 Historical archaeology one of the fastest growing of archaeology's sub fields in North America has developed more slowly in Central and particularly South America Happily this circumstance is ending as a growing number of recent projects are successfully integrating textual and material culture data in studies of the events and processes of the last 500 years This interval and this region often called Ibero America have been studied for a

century or more by historians with traditional perspectives and emphases focusing on colonial elites and large scale politico economic events Such inclinations fit well into world system and other core peri ery models that have had a major impact on historical thought since the 1970s Over the past 20 years or so however world system models have come under fire from historians anthropologists and others in part because the emphasis on global trends and the growth of capitalism nies the importance of understanding variability in local histories and circumstances Historians have increasingly turned their attention to lo cal rural and domestic contexts thereby illuminating the great diversity of responses to colonial domination that were played out in the vast arena of the Americas It is not coincidental that this is the intellectual climate in which historical archaeology is establishing itself in Central and South America

A History of Modern Psychology Duane P. Schultz, 1969 Perspectives on Welfare Alison Bowes, Duncan Sim, 2018-08-20 First published in 1997, this volume examines the issue that throughout Britain studies of social health and housing services have found discrimination, insensitive practices and lack of awareness of the needs of a multi-racial population. The relationships between these services and their minority ethnic users remain problematic. This book focuses on the lessons offered by the Scottish experience. Original research-based contributions focus in turn on housing services, social work and health services, examining the perspectives of service users and their needs and experiences and comparing the perspectives of professionals in each field. The implications of these perspectives for policy, both local and national, are explored in the context of recent national developments. Methodological issues are discussed throughout the book and the complementarity of different research perspectives explored. Housing, social work and health professionals throughout Britain will find sensitive discussion here of issues which face them daily in their work. Researchers will find original data explored in the context of nationally relevant research issues and policies.
