regional differences in suicide rates of various age groups and different sexes among Chinese rural residents It goes beyond the analytic dichotomy in traditional Western suicide studies and argues that the phenomena of suicide among Chinese farmers are the result of a combination of social structure and social action rather than being determined by either of these two factors alone This study analyses suicide rates among young married women in rural areas as well as those of elderly people in rural areas The responsive trend for the near future is also projected The underlying dynamics and causal mechanisms of these phenomena are carefully analyzed using an innovative structure action theory framework **Variety**

in Written English Tony Bex, 2002-03-11 Combining insight from a variety of linguistic perspectives including Hallidayan functional linguistics and relevance theory Tony Bex demonstrates how written texts operate within society to convey meaning This book looks at a wide variety of written genres advertisements letters poetry and literature provides an accessible and comprehensive survey of genre theory proposes a challenging new way of analysing genre which emphasises communicative function unusually considers the relevance of linguistic theories of genre to the study of literary texts includes numerous exercises and annotated bibliographies Variety in Written Discourse will be of interest to all students of language and communication In addition it will be an invaluable text for those interested in literature as well as English for Specific Purposes **Social Networks and Historical Sociolinguistics** Alexander Bergs, 2011-12-07 The book presents an

analysis of selected domains of morphosyntactic variation in a 250 000 word collection of the Middle English Paston Letters 1421 1503 from a historical sociolinguistic point of view In the three case studies two nominal and one verbal variable are described and discussed in detail the replacement of Old English *i h th wh take make give have do* plus deverbal noun While the study aims at a balanced integration of theories and methods from a number of different approaches in sociolinguistics cognitive linguistics typology and language change its main focus is social network theory and the role of the linguistic individual in the formation and change of language structures Questions of individual language use and of deliberate versus

unmonitored changes in the individual system take center stage and are discussed in the light of social network analysis. Traditional empirical social network analysis is carefully revised. Despite its many merits in present day sociolinguistics it often needs to be supplemented by hermeneutic biographical analyses of the individual speakers' lives when applied to historical data. With this background common theories and models of language change such as grammaticalization, paradigmatic pressure, typological alignment and generational shifts are illustrated and evaluated from the point of view of single speakers and social groups and their particular embedding in the speech community through various network structures. The book is of interest to advanced students and researchers in English and general linguistics, Middle English, historical linguistics and language change, corpus linguistics as well as sociolinguistics.

Dialect Change Peter Auer, Frans Hinskens, Paul Kerswill, 2005-06-17. Dialects are constantly changing and due to increased mobility in more recent years European dialects have levelled making it difficult to distinguish a native of Reading from a native of London or a native of Bonn from a native of Cologne. This comprehensive study brings together a team of leading scholars to explore all aspects of recent dialect change in particular dialect convergence and divergence. Drawing on examples from a wide range of European countries as well as areas where European languages have been transplanted they examine a range of issues relating to dialect contact and isolation and show how sociolinguistic conditions differ hugely between and within European countries. Each specially commissioned chapter is based on original research giving an overview of work on that particular area and presenting case studies to illustrate the issues discussed. *Dialect Change* will be welcomed by all those interested in sociolinguistics, dialectology, the relevance of language variation to formal linguistic theories and European languages.

Middle-Class Couples Stephen Edgell, 2023-03-31. When this book was originally published in 1980 sociologists had long held the view that the middle class marriage in contemporary Britain was characterised by role desegregation and marital equality. *Middle Class Couples* reported on research which provided a
