Barbour,1966 First published 1966 Includes index Includes bibliographical references Campion Collection Religion and Science Rezania Hamid,2022-05-04 Religion and Science terms briefly explained In this thesis I am concerned with natural sciences as well as Hindu and Islam as religion Religion and science are two major sources that have guided mankind from historical time Both of them have greatly influenced all aspects of human life In certain cases both religion and science have looked into those problems and clashes that need urgent attention There is a popular belief that religion and science are two basically opposite poles There are several definitions of religion which imply a relationship not merely between men and men but also between man and some moral power that attempts to find out the ways for human perfection Some definitions have pointed out that whenever and wherever man has a sense of dependence on external moral powers which are conceived as mysterious as and higher than man s own there is religion The feeling of awe and self abasement with which man is filled in the presence of such mysterious powers is essentially a religions emotion the root of worship and prayer The internal aspect of religion is the body of ideas convictions and emotions concerning man s relations with God while its external aspect is the system of prayers ceremonies and rites through which the religious feeling is manifested On the other hand science has a different method and different definition Many scientists believe that science is applied to solving modern problems of technological and humanistic nature The question of whether religion is compatible with science has occupied a prominent place in the discussions of the nineteenth century and some thinkers have held the view that science and religion are incompatible In the midst of this controversy it Cosmic Humanism and World Unity Oliver L. Reiser,2023-10-13 First published in 1975 Cosmic Humanism and World Unity presents a comprehensive overview

of the world view a theory of knowledge a cosmology and a possible universal religion termed as cosmic humanism It aims to discover and formulate some of the main principles that may help mankind integrate the world ethically aesthetically and spiritually as science and technology have integrated the planet in its physical relationships It discusses themes like mental pattern for the planet language and world order grand strategy of evolution Helium Psychosphere cosmic humanism and the space age and existentialist cosmology and harmony This is an interesting read for scholars and researchers of philosophy

The God/Man/World Triangle R. Crawford,1997-10-06 Why is there a world Does it reflect the presence of God in any way Did the world spontaneously come into existence or is there a creator How will it end Does God Exist Do religions give a coherent view of His existence and nature Can we enter into relation with Him Robert Crawford tries to answer these and other questions by arguing that religion and science complement one another and while they use different sources and methods insights can be gleaned from both concerning our nature the world and God Major attention is given to Christianity because modern science arose in that context but the discussion includes the teachings of five other religions in the hope that we can also learn from them *Environment and Economics in Nigeria* Toyin Falola,Adam Paddock,2012-05-23 This volume gathers contributors across a wide range of disciplines to explore the relationship between the environment economics and development in Nigeria from the twentieth century to the present examining issues such as violence health and contemporary concerns about sustainability and conservation It sheds light not just on the environmental history of Nigeria a crucial paradigmatic case in its own right but also offers insights into these issues as they manifest themselves throughout the developing world **The God/Man/World Triangle** Robert Crawford,2001-01-06 The God Man World Triangle shows how insights can be gleaned from both science and religion to enable us to understand what the world is like how the human animal is distinctive from the sub human and how we might think of God It proceeds on the basis that Einstein was right when he said that science without religion is lame religion without science is blind This book opposes the view that we are survival machines and argues that such an explanation is incomplete and is not justified either by science or religion *Dilemmas of the New World : Man's Search For Himself In The New World* Serol Aksel,2024-09-15 The term New world carries multiple connotations While it traditionally denotes newly discovered territories such as the American continent in this context it signifies the profound and transformative shift that the world has undergone over the past three centuries This shift which finds its roots in the Enlightenment and modernity began to manifest itself more prominently after the First World War While this transformation is often equated with globalization its origins can be traced back to the era of industrialization and the rise of nation states which set the stage for subsequent global shifts Dilemma is a subject of logic but it is also used in daily life In daily use it often evokes contradictory situations It is expected to correspond to inextricable knotted cyclical situations What I mean by the dilemmas of the new world is the social order and view of the universe that humanity has lived in since the age of curiosity that is from the middle of the 18th century to the present day at least ten

thousand years since the world transitioned to agricultural society the fact that the understanding of morality and most importantly the meaning it attributes to its existence have brought with them insurmountable problems despite the changes in direction While this new era was a game changer on the one hand on the other hand the meaning that man attributed to himself in every new thing he discovered with the development of science and technology was shaken Existentialism emerged as a result of this new state of thinking While the new attribution of meaning isolated man on the one hand on the other hand nation states consisting of human communities gathered around a common ideal were established Individual freedoms and gathering around a common goal became in conflict at some points While humanism the most crucial emphasis of the Enlightenment glorified human beings on the one hand on the other hand there were significant obstacles to free thought On the other hand while the religious sentiments to which human beings were attached to give meaning to their existence were shaken new meanings could not be found to replace them While observations and findings show that the earth is far beyond the centre of the universe the discovery that man is descended from animals has deeply affected religious beliefs at least by the world of science and people who believe in the guidance of science For man who had to somehow hold on to life these new teachings could not offer him any In this state the world needed new motives and new beliefs At this very stage capitalism came to the rescue of humanity The new system which pushed man to become a commodity owner did not give him time to question himself *Religion of Science*, 1912 Religions and Religions Panikkar, Raimon, 2015-05-31

Religion, Science and Culture Dr. S Radhakrishnan, 2019-09-28 A masterly review of the evolving relationship between religion science and culture and the need to create a spiritual unity which will transcend and sustain the material unity of the world order Dr Radhakrishnan's sweep is as wide as the world and wider Tribune This book is not only meant to promote interpeople understanding but to awaken mankind to the danger of extinction of homo sapiens by nuclear destruction the abyss it has reached by spiritual involution Times of India Problems of Men John Dewey, 2014-11-04 Although primarily addressed to the general reader the introduction and the last chapters of this work strike straight at reactionary philosophers who obstruct the philosophers who are honest searchers for wisdom The Arc of Truth Lewis V. Baldwin, 2022-10-04 Martin Luther King Jr said and wrote as much or more about the meaning nature and power of truth as any other prominent figure in the 1950s and 60s King was not only vastly influential as an advocate for and defender of truth he also did more than anyone in his time to organize truth into a movement for the liberation uplift and empowerment of humanity efforts that ultimately resulted in the loss of his life Drawing on King's published and unpublished sermons speeches and writings The Arc of Truth explores King's lifelong pilgrimage in pursuit of truth Lewis Baldwin explores King's quest for truth from his inquisitive childhood to the influence of family and church to Morehouse College Crozer Theological Seminary Boston University and other academic institutions in the Northeast Continuing on the book follows King's sense that he was involved in experiments of truth within the context of the struggle to liberate and empower humanity to his understanding of the civil

rights movement as unfolding truth to his persistent challenge to America around its need to engage in a serious reckoning with truth regarding its history and heritage Baldwin investigates King's determination to speak truth to power and his untiring efforts to actualize what he envisioned as the truthful ends of the beloved community through the truthful means of nonviolent direct action King believed taught and demonstrated by example that truth derives from a revolution in the heart mind and soul before it can be translated into institutions and structures that guarantee freedom justice human dignity equality of opportunity and peace Ultimately King's significance for humanity cannot be considered only his contributions as a preacher pastor civil rights leader and world figure he was and remains equally impactful as a theologian philosopher and ethicist whose life and thought evince an enduring search for and commitment to truth Christianity and Science Walter Leslie Wilmschurst, 1906 51 Essays For Civil Services Examination (Competitive Exam Book) Team Prabhat, 2020-08-28
