critical concepts in the social sciences. Vol. 1 : Pt. 2 Victor Buchli, 2004 Publisher description An Anthropology of Absence
Mikkel Bille, Frida Hastrup, Tim Flohr Soerensen, 2010-03-24 In studying material culture anthropologists and archaeologists
use meaningful physical objects from a culture to help understand the less tangible aspects of that culture such as societal
structure rituals and values What happens when these objects are destroyed by war natural disaster or other historical
events Through detailed explanations of eleven international case studies the contributions reveal that the absence of objects
can be just as telling as their presence while the objects created to memorialize a loss also have important cultural
implications Covering everything from organ donation to funerary rituals to prisoners of war *The Archaeology of Absence* is
written at an important intersection of archaeological and anthropological study Divided into three sections this volume uses
the presence of absence to compare cultural perceptions of material qualities and created memory the mind body connection
temporality and death This rich text provides a strong theoretical framework for anthropologists and archaeologists studying
material culture **Material Culture: History and scope of material culture studies**, 2004 **Material Culture**
Victor Buchli, 2004 Publisher description Buying into the World of Goods Ann Smart Martin, 2010-08-01 Cowinner 2008
Fred Kniffen Book Award Pioneer America Society Association for the Preservation of Landscapes and Artifacts How did
people living on the early American frontier discover and then become a part of the market economy How do their purchases
and their choices revise our understanding of the market revolution and the emerging consumer ethos Ann Smart Martin
provides answers to these questions by examining the texture of trade on the edge of the upper Shenandoah Valley between
1760 and 1810 Reconstructing the world of one country merchant John Hook Martin reveals how the acquisition of consumer
goods created and validated a set of ideas about taste fashion and lifestyle in a particular place at a particular time Her
analysis of Hook's account ledger illuminates the everyday wants transactions and tensions recorded within and brings some
of Hook's customers to life a planter looking for just the right clock a farmer in search of nails a young woman and her
friends out shopping on their own and a slave woman choosing a looking glass This innovative approach melds fascinating
narratives with sophisticated analysis of material culture to distill large abstract social and economic systems into intimate
triangulations among merchants customers and objects Martin finds that objects not only reflect culture they are the means
to create it **Inside IBM** James W. Cortada, 2023-10-31 IBM was the world's leading provider of information technologies
for much of the twentieth century What made it so successful for such a long time and what lessons can this iconic
corporation teach present day enterprises James W Cortada a business historian who worked at IBM for many years
pinpoints the crucial role of IBM's corporate culture He provides an inside look at how this culture emerged and evolved over

the course of nearly a century bringing together the perspectives of employees executives and customers around the world Through a series of case studies Inside IBM explores the practices that built and reinforced organizational culture including training of managers employee benefits company rituals and the role of humor It also considers the importance of material culture such as coffee mugs and lapel pins Cortada argues that IBM s corporate culture aligned with its business imperatives for most of its history allowing it to operate with a variety of stakeholders in mind and not simply prioritize stockholders He identifies key lessons that managers can learn from IBM s experience and apply in their own organizations today This engaging and deeply researched book holds many insights for business historians executives and managers concerned with stakeholder relations professionals interested in corporate culture and IBMers *Food Parcels in International Migration* Diana Mata-Codesal, Maria Abranches, 2017-08-09 This book takes food parcels as a vehicle for exploring relationships intimacy care consumption exchange and other fundamental anthropological concerns examining them in relation to wider transnational spaces As the contributors to this volume argue food and its related practices offer a window through which to examine the reconciliation of people s localised intimate experiences with globalising forces Their analyses contribute to an embodied and sensorial approach to social change by examining migrants and their families experiences of global connectedness through familiar objects and narratives By bringing in in depth ethnographic insights from different social and economic contexts this book widens the understanding of the lived experiences of mobility and goes beyond the divide between origin and destination countries therefore contributing to new ways of thinking about migration and transnationalism that take into consideration the materiality of global connections and the way such connections are embodied and experienced at the local level **Contradictions of Archaeological Theory** Sandra Wallace, 2012-01-30 Is current archaeological theory stuck at an impasse Sandra Wallace argues that archaeological theory has become mired as a result of logical and ontological contradictions By showing that these contradictions are a result of common underlying philosophical assumptions and fallacies this book is able to show how a fresh approach to this discipline is necessary to resolve them even if this requires re examining some of the tenants of orthodox archaeology This fresh approach is achieved by using Critical Realism as an under labourer to philosophically evaluate archaeological theory Starting by assessing the historical impact of philosophy on the discipline and then looking at the current relationship between archaeology and the ontology of the material this book facilitates the construction of discipline specific theory by archaeologists The result is an approach to archaeology that allows both students and practitioners to free themselves from endemic contradictions and re discover their approach to archaeological theory Visuality/Materiality Divya P. Tolia-Kelly, 2016-02-11 Two of the key theoretical shifts over the past two decades of critical work have been the visual turn and the material turn This book argues that these hitherto distinct fields should be understood as in continual dialogue and co constitution and focuses on reconceptualising the visual as an embodied material and often politically charged realm This edited volume elaborates this

conceptual argument through a series of contemporary case studies drawn from the disciplines of Architecture Sociology Media Studies Geography and Cultural Studies The case studies included are paired around four themes consumption translation practice and ethics As well as exploring the bringing together of visibility and materiality studies the contributors raise questions of social identity and social critique and also focus on the ethics of material visualities An Anthropology of Architecture Victor Buchli, 2020-05-15 Ever since anthropology has existed as a discipline anthropologists have thought about architectural forms This book provides the first overview of how anthropologists have studied architecture and the extraordinarily rich thought and data this has produced With a focus on domestic space that intimate context in which anthropologists traditionally work the book explains how anthropologists think about public and private boundaries gender sex and the body the materiality of architectural forms and materials building technologies and architectural representations Each chapter uses a broad range of case studies from around the world to examine from within anthropology what architecture does how it makes people and shapes sustains and unravels social relations An Anthropology of Architecture is key reading for students of anthropology material culture geography sociology architectural theory design and city planning

Advances in Human Dynamics for the Development of Contemporary Societies Daniel Raposo, Nuno Martins and Daniel Brandão, 2022-07-24 Advances in Human Dynamics for the Development of Contemporary Societies Proceedings of the 13th International Conference on Applied Human Factors and Ergonomics AHFE 2022 July 24 28 2022 New York USA Material Culture: The expansion of material culture studies, 2004 **European Memory in Populism** Chiara De Cesari, Ayhan Kaya, 2019-10-08 European Memory in Populism explores the links between memory and populism in contemporary Europe Focusing on circulating ideas of memory especially European memory in contemporary populist discourses the book also analyses populist ideas in sites and practices of remembrance that usually tend to go unnoticed More broadly the theoretical heart of the book reflects upon the similarities differences and slippages between memory

populism nationalism and cultural racism and the ways in which social memory contributes to give substance to various ideas of what constitutes the people in populist discourse and beyond Bringing together a group of political scientists anthropologists and cultural and memory studies scholars the book illuminates the relationship between memory and populism from different angles and in different contexts The contributors to the volume discuss dominant notions of European heritage that circulate in the public sphere and in political discourse and consider how the politics of fear relates to such notions of European heritage and identity across and beyond Europe and the European Union Ultimately this volume will shed light on how notions of a shared European heritage and memory can be used not only to include and connect Europeans but also to exclude some of them Investigating the ways in which nationalist populist forces mobilize the idea of a shared homogeneous European civilization European Memory in Populism will be of interest to scholars and students in the fields of European studies heritage and memory studies migration studies anthropology political science and sociology Chapters 1 4 6 and 10 of this book are freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non Commercial No Derivatives 4 0 license

Pumpkin Cindy Ott, 2012-12-01 Why do so many Americans drive for miles each autumn to buy a vegetable that they are unlikely to eat While most people around the world eat pumpkin throughout the year North Americans reserve it for holiday pies and other desserts that celebrate the harvest season and the rural past They decorate their houses with pumpkins every autumn and welcome Halloween trick or treaters with elaborately carved jack o lanterns Towns hold annual pumpkin festivals featuring giant pumpkins and carving contests even though few have any historic ties to the crop In this fascinating cultural and natural history Cindy Ott tells the story of the pumpkin Beginning with the myth of the first Thanksgiving she shows how Americans have used the pumpkin to fulfill their desire to maintain connections to nature and to the family farm of lore and ironically how small farms and rural communities have been revitalized in the process And while the pumpkin has inspired American myths and traditions the pumpkin itself has changed because of the ways people have perceived valued and used it Pumpkin is a smart and lively study of the deep meanings hidden in common things and their power to make profound changes in the world around us
