Myths Of The Archaic State Evolution Of The Earliest Cities States And Civilizations:

Myths of the Archaic State Norman Yoffee,2005-01-13 In this ground breaking work Norman Yoffee shatters the prevailing myths underpinning our understanding of the evolution of early civilisations He counters the emphasis in traditional scholarship on the rule of godly and despotic male leaders and challenges the conventional view that early states were uniformly constituted bureaucratic and regional entities Instead by illuminating the role of slaves and soldiers priests and priestesses peasants and prostitutes merchants and craftsmen Yoffee depicts an evolutionary process centred on the concerns of everyday life Drawing on evidence from ancient Mesopotamia Egypt China and Mesoamerica the author explores the variety of trajectories followed by ancient states from birth to collapse and explores the social processes that shape any account of the human past This book offers a bold new interpretation of social evolutionary theory and as such it is essential reading for any student or scholar with an interest in the emergence of complex society

Against the Grain James C. Scott,2017-08-22 An account of all the new and surprising evidence now available for the beginnings of the earliest civilizations that contradict the standard narrative Why did humans abandon hunting and gathering for sedentary communities dependent on livestock and cereal grains and governed by precursors of today s states Most people believe that plant and animal domestication allowed humans finally to settle down and form agricultural villages towns and states which made possible civilization law public order and a presumably secure way of living But archaeological and historical evidence challenges this narrative The first agrarian states says James C Scott were born of accumulations of domestications first fire then plants livestock subjects of the state captives and finally women in the patriarchal family all of which can be viewed as a way of gaining control over reproduction Scott explores why we avoided sedentism and plow agriculture the advantages of mobile subsistence the unforeseeable disease epidemics arising from crowding plants animals and grain and why all early states are based on millets and cereal grains and unfree labor He also discusses the barbarians who long evaded state control as a way of understanding continuing tension between states and nonsubject peoples

Making Ancient Cities Andrew Creekmore,Kevin D. Fisher,2014-04-28

Investigates how the structure and use of space developed and changed in cities and examines the role of different societal groups in shaping urbanism World Prehistory Brian M. Fagan, Nadia Durrani, 2016-04-01 For one semester or quarter courses in World Prehistory Written by one of the leading archaeological writers in the world in a simple jargon free narrative style this brief well illustrated account of the major developments in the human past makes world prehistory uniquely accessible to complete beginners Written by Brian Fagan World Prehistory covers the entire world not just the Americas or Europe and places major emphasis on both theories and the latest archaeological and multidisciplinary approaches His focus is on four major developments in world prehistory 1 The origins of humanity 2 The appearance and spread of modern humans before and during the late Ice Age including the first settlement of the Americas 3 The beginnings of food production 4 The rise of the first civilizations **Feast, Famine or Fighting?** Richard J. Chacon, Rubén G. Mendoza, 2017-01-20 The advent of social complexity has been a longstanding debate among social scientists Existing theories and approaches involving the origins of social complexity include environmental circumscription population growth technology transfers prestige based and interpersonal group competition organized conflict perennial wartime leadership wealth finance opportunistic leadership climatological change transport and trade monopolies resource circumscription surplus and redistribution ideological imperialism and the consideration of individual agency However recent approaches such as the inclusion of bioarchaeological perspectives prospection methods systematically investigated archaeological sites along with emerging technologies are necessarily transforming our understanding of socio cultural evolutionary processes In short many pre existing ways of explaining the origins and development of social complexity are being reassessed Ultimately the contributors to this edited volume challenge the status quo regarding how and why social complexity arose by providing revolutionary new understandings of social inequality and socio political evolution *Visual and Written Culture in Ancient Egypt* John Baines, 2007-05-17 A generously illustrated selection of John Baines s influential writings on two core areas of ancient Egyptian civilization the role of writing which was very different in antiquity from what is familiar in the modern world and the importance of visual culture These questions are explored through a number of case studies The volume assembles articles that were scattered in publications in a variety of disciplines making available key contributions on core problems of theory comparison and analysis in the study of many civilizations and offering important points of departure for further research Three wholly new essays are included and the overall approach is an interdisciplinary one synthesizing insights from archaeology anthropology and art history as well as Egyptology *From House Societies to States* Juan Carlos Moreno Garcia, 2022-10-21 The organization and characteristics of early and ancient states have become the focus of a renewed interest from archaeologists ancient historians and anthropologists in recent years On the one hand neo evolutionary schemas of political transformation find it difficult to define some of their most basic concepts such as chiefdom complex chiefdom and state not to mention the transition between them On the other hand teleological interpretations based

on linear dynamics from less to increasingly more complex political structures in successive steps impose biased and too rigid views on the available evidence In fact recent research stresses the existence of other forms of socio political organization less vertically integrated and more heterarchical that proved highly successful and resilient in the long term in tying together social groups What is more such forms quite often represented the basic blocks on which states were built and that managed to survive once states collapsed Finally nomadic maritime and mountain populations provide fascinating examples of societies that experienced alternative forms of political organization sometimes on a seasonal basis In other cases their consideration as marginal populations that cultivated specialized skills ensured them a certain degree of autonomy when living either within or at the borders of states This book explores such small scale socio political organizations their potential and the historical trajectories they stimulated A selection of historical case studies from different regions of the world may help rethink current concepts and views about the emergence and organization of political complexity and the mechanisms that prevented occasionally the emergence of solid polities They may also cast some light over trajectories of historical transformation still poorly understood as are the limits of effective state power This book explores the importance of comparative research and long term historical perspectives to avoid simplistic interpretations based on the characteristics of modern Western states abusively used retrospectively

The Making of Constitutional Democracy Paolo Sandro, 2022-01-27 This open access book addresses a palpable yet widely neglected tension in legal discourse In our everyday legal practices whether taking place in a courtroom classroom law firm or elsewhere we routinely and unproblematically talk of the activities of creating and applying the law However when legal scholars have analysed this distinction in their theories rather than simply assuming it many have undermined it if not dismissed it as untenable The book considers the relevance of distinguishing between law creation and law application and how this transcends the boundaries of jurisprudential enquiry It argues that such a distinction is also a crucial component of political theory For if there is no possibility of applying a legal rule that was created by a different institution at a previous moment in time then our current constitutional democratic frameworks are effectively empty vessels that conceal a power relationship between public authorities and citizens that is very different from the one on which constitutional democracy is grounded After problematising the most relevant objections in the literature the book presents a comprehensive defence of the distinction between creation and application of law within the structure of constitutional democracy It does so through an integrated jurisprudential methodology which combines insights from different disciplines including history anthropology political science philosophy of language and philosophy of action while also casting new light on long standing issues in public law such as the role of legal discretion in the law making process and the scope of the separation of powers doctrine The ebook editions of this book are available open access under a CC BY NC ND 4 0 licence on bloomsburycollections com

The Ancient Andean States Henry Tantaleán, 2020-10-13 The Ancient Andean States combines modern social theory recent

archaeological literature and the experience of the author to examine politics and power in the great Andean pre Hispanic societies The ancient Andean states were the great shapers of Peruvian prehistory Social complexity architectural monumentality and specialized economic production among others were features of these sophisticated societies known by professionals and travelers from around the world How and when these states emerged and succeeded is still debated By examining Andean pre Hispanic societies such as Caral Sech n Chav n Moche Wari Chim and Inca this book delves into their political and economic structures as well as explores their ideological worldviews It reveals how these societies were organized and how different social groups interacted in the states Archaeologists and anthropologists interested in Peruvian archaeology and the political and social structures of ancient societies will find this book to be a valuable addition to their shelves

Liberty Valentina Arena,2020-12-17 Liberty Ancient Ideas and Modern Perspectives is the first study of the ancient notions of liberty in the interconnected societies of the Ancient Near East Greece Rome and Byzantium and how they relate to modern political theory This volume gathers the work of historians of antiquity whose specialisms are geographically and temporally diverse together with political theorists and legal and political philosophers interested in conceptions of liberty Together they discuss the rival understandings of liberty in antiquity and the potential offerings of these ancient societies to our contemporary intellectual world This book aims to broaden our understanding of the conceptual articulations of liberty in the ancient world from beyond the Graeco Roman world to other ancient societies to which this world was connected and to shed light on rival understandings of liberty in antiquity and the role these might play in the current thinking about this concept The chapters in this book were originally published as a special issue of the journal History of European Ideas

The Oxford Handbook of Cities in World History Peter Clark,2013-02-14 In 2008 for the first time the majority of the planet s inhabitants lived in cities and towns Becoming globally urban has been one of mankind s greatest collective achievements over time and raises many questions How did global city systems evolve and interact in the past How have historic urban patterns impacted on those of the contemporary world And what were the key drivers in the roller coaster of urban change over the millennia market forces such as trade and industry rulers and governments competition and collaboration between cities or the urban environment and demographic forces This pioneering comparative work by leading scholars drawn from a range of disciplines offers the first detailed comparative study of urban development from ancient times to the present day The Oxford Handbook of Cities in World History explores not only the main trends in the growth of cities and towns across the world in Asia and the Middle East Europe Africa and the Americas and the different types of cities from great metropolitan centres to suburbs colonial cities and market towns but also many of the essential themes in the making and remaking of the urban world the role of power economic development migration social inequality environmental challenge and the urban response religion and representation cinema and urban creativity Split into three parts covering Ancient cities the medieval and early modern period and the modern and contemporary era it begins with an

introduction by the editor identifying the importance and challenges of research on cities in world history as well as the crucial outlines of urban development since the earliest cities in ancient Mesopotamia to the present *The Dawn of Israel* Lester L. Grabbe, 2022-11-17 In this companion volume to his bestselling *Ancient Israel What Do We Know and How Do We Know It* Lester L. Grabbe provides the background history of the main ancient Near Eastern peoples and empires Babylonia Assyria Urartu Hittites Amorites Egyptians Grabbe's focus is on Palestine Canaan and covers the early second millennium including the Middle Bronze Age and the Second Intermediate Period and Hyksos rule of Egypt Grabbe also addresses the question of a patriarchal period The main focus of the book is on the second half of the second millennium Late Bronze and early Iron Age the Egyptian New Kingdom the Amarna letters the Sea Peoples the question of the exodus the early settlements in the hill country of Palestine and the first mention of Israel in the Merneptah inscription Archaeology and the contribution of the social sciences both feature heavily as does inscriptional and iconographic material As such this volume provides a fascinating portrayal of ancient Israel and this definitive work by one of the world's leading biblical historians will be of interest to all students and scholars of biblical history

Teotihuacan and Early Classic Mesoamerica Claudia García-Des Lauriers, Tatsuya Murakami, 2022-02-14 The Early Classic period in Mesoamerica has been characterized by the appearance of Teotihuacan related material culture throughout the region Teotihuacan known for its monumental architecture and dense settlement became an urban center around 100 BC and a regional state over the next few centuries dominating much of the Basin of Mexico and beyond until its collapse around AD 650 Teotihuacan and Early Classic Mesoamerica explores the complex nature of Teotihuacan's interactions with other regions from both central and peripheral vantage points The volume offers a multiscalar view of power and identity showing that the spread of Teotihuacan related material culture may have resulted from direct and indirect state administration colonization emulation by local groups economic transactions single event elite interactions and various kinds of social and political alliances The contributors explore questions concerning who interacted with whom what kinds of materials and ideas were exchanged what role interregional interactions played in the creation transformation and contestation of power and identity within the city and among local polities and how interactions on different scales were articulated The answers to these questions reveal an Early Classic Mesoamerican world engaged in complex economic exchanges multidirectional movements of goods and ideas and a range of material patterns that require local regional and macroregional contextualization Focusing on the intersecting themes of identity and power Teotihuacan and Early Classic Mesoamerica makes a strong contribution to the understanding of the role of this important metropolis in the Early Classic history of the region The volume will be of interest to scholars and graduate students of Mesoamerican archaeology the archaeology of interaction and the archaeology of identity Contributors Sarah C Clayton Fiorella Fenoglio Lim n Agapi Filini Julie Gazzola Sergio Gomez Chavez Haley Holt Mehta Carmen Perez Patricia Plunket Juan Carlos Saint Charles Zetina Yoko Sugiura Gabriela Uru uela Gustavo Jaimes Vences

Proceedings

of the International Conference on Strategic and Global Studies (ICSGS 2024) Ibrahim Kholilul Rohman, Wu Zhaoyang, Mohammad Izdiyan Muttaqin, Ismail Suardi Wekke, Irene Sondang Fitritinia, 2025-01-31 This is an open access book The pandemic turned to endemic has pushed many countries in the world to digitalize almost all sectors in order to accelerate the development Every crisis moments create momentum of opportunity to revive and reawaken the hidden potencies of nations Instead of given thought about the digital culture the social changes rapidly occurred The discourses of digital security cyber threats monetization crypto currency big data internet of things IoT artificial intelligence AI and social media had taken us concern about future generations The very existence of AI application distorts the academic world too where the difference of human and bot could hardly determine Chat GPT also opened academic eyes where the human analytics skill would perish against the advancement of technology that could provide more precise answers despite lack of wisdom Alipay has turned MSMEs to wider market and reach even small villagers to allow opportunity reach them Gojek eases the burden of stagnancy in making affordable and comfortable public transportation where at the same time reduce the traffic frequency Would everyone be fitted with the recent situation or still some country left behind Whereas for some parts of the world the very basic needs like electricity elementary education clean water healthy food and secure shelter are still luxurious and hard to access for certain part of the world The gap disparity remains and recent world order is not everyone's favor or answer for all problems Meanwhile the attack of HAMAS to the Israeli shocked the world when the Operation Aqsa Flood launched in 7th of October 2023 days gone by the casualties mounted and the psychology of Palestinian disturbed to the extent incurable Worse things worst Iran retaliates Israel after the attack to its consulate in Syria The international society and global politics failed to show solidarity amidst the humanitarian catastrophe in Palestine where Western alliance continuously rejected the cease fire in the UNGA The US as the global power failed to show its quality as the world leader which prove the political constellation moved to the multipolarity The injustice still persists and the voice to transform world order in UN resonates The consequence lies on the transformation of global security where each nations pursue its own weaponization to ensure its national survival and well being in the face of uncertainty and unpredictable threats The opportunity arises in the sector of global halal industry The player is not only Muslim countries but non Muslim countries are taking part The industry expanded from food to banking and financial system as well as tourism and fashion Countless exhibition in regards with halal industry appeared and triggered more expansion in market as the global expense in halal industry significantly increased This conference will become the melting pot of brilliant idea and push forward the solution to the global problem by making strategic decision into useful resource for all to solve the matters **Social Theory in Archaeology and Ancient History** Geoff Emberling, 2015-11-24 At a time when archaeology has turned away from questions of the long term and large scale this collection of essays reflects on some of the big questions in archaeology and ancient history how and why societies have grown in scale and complexity how they have maintained and discarded aspects

of their own cultural heritage and how they have collapsed In addressing these long standing questions of broad interest and importance the authors develop counter narratives new ways of understanding what used to be termed cultural evolution Encompassing the Middle East and Egypt India Southeast Asia Australia the American Southwest and Mesoamerica the fourteen essays offer perspectives on long term cultural trajectories on cities states and empires on collapse and on the relationship between archaeology and history The book concludes with a commentary by one of the major voices in archaeological theory Norman Yoffee

Understanding Early Large-Scale Collectives Justin Jennings,2025-06-30 This volume brings together perspectives from different parts of the world that showcase the wide variety of practices institutions and ideologies that allowed for shared identities and coordinated actions across broad collectives It shows that there are many ways that people can work together How did the world s first large scale collectives come into being For much of our discipline s history the answer was the state People learned how to be part of a larger community via political economic and social scaffolding that tended to build from earlier ways of living in a region This scaffolding was often wobbly and always under construction its flexibility often a design strength rather than a flaw This book demonstrates that violence and rulers often played pivotal roles in large scale collectives but so did gender complementarity markets ritual centers fictive kinship and egalitarianism Earlier evolutionary approaches tended to obscure both the variability and malleability of earlier political forms in a desire to find ideal types hidden beneath cross cultural noise This volume s authors argue that this noise was politics in action and that there was no state or other kind of polity that was above the fray and divorced from the daily practices that brought people animals and other things together A better understanding of early collective action strategies provides a richer understanding of past politics and just as importantly demonstrates governance alternatives for our contemporary society that struggles to address climate change pandemics and other pressing challenges This book will interest archaeologists and historians as well as anyone who is curious about other ways that we can work together to solve common problems

Ancient Complex Societies Jennifer C. Ross,Sharon R. Steadman,2017-01-06 Through a detailed examination of the archaeological evidence and written records this comprehensive text aims to develop a common understanding of what complexity means to archaeologists and the methods by which they identify and analyze it In this first new undergraduate textbook on ancient complex societies in two decades the authors use vivid writing textboxes on key themes and sites and a glossary to keep students thoroughly engaged

states in the Americas and Andean civilization Ancient Civilizations includes a number of features to support student learning a wealth of images including several new illustrations feature boxes which expand on key sites finds and written sources and an extensive guide to further reading With new perceptions of the origin and collapse of states including a review of the issue of sustainability this fourth edition has been extensively updated in the light of spectacular new discoveries and the latest theoretical advances Examining the world s pre industrial civilizations from a multidisciplinary perspective and offering a comparative analysis of the field which explores the connections between all civilizations around the world Scarre and Fagan both established authorities on world prehistory provide a valuable introduction to pre industrial civilizations in all their brilliant diversity

Evaluating Multiple Narratives Junko Habu,Clare Fawcett,John M. Matsunaga,2008-07-18 Using archaeological case studies from around the world this volume evaluates the implications of providing alternative interpretations of the past These cases also examine if multivocality is relevant to local residents and non Anglo American archaeologists and if the close examination of alternative interpretations can contribute to a deeper understanding of subjectivity and objectivity of archaeological interpretation
