

# SERIOUS INJURY AND FATALITY NUMBERS KEEP CLIMBING

- In 2015, Nevada launched the Zero Fatalities traffic safety goal to reduce the number of fatalities in accidents.
- Though fatality reports initially dipped from the last few years, statistics show that fatal accidents and serious injuries on Nevada roads are continuing to climb.
- In some areas the numbers are increasing, particularly in Las Vegas.

## FATALITIES ON THE RISE

As statistics from the Nevada Office of Traffic Safety (NOTS) show:

321 traffic fatalities in 2015 is more than a **10%** increase over the 2014 total.

That is close to **30%** more than last year's figure for the same period.

## ROAD USER DEATHS

In almost all categories, road user deaths increased from 2014 to 2015:

Moped fatalities jumped from **6** to **14**.

Cyclist deaths doubled from **4** to **8**.

Pedestrian fatalities climbed from **51** to **60**.

## 2016 STATS

For 2016, things are looking worse.

- Year-to-date numbers show that **50** people have already died in auto collisions.
- Vehicle occupant deaths are up **33%**.
- Pedestrian deaths are up **15%**.
- Cyclist deaths have skyrocketed from just three to **12**.

## COST OF INJURY CONTINUES TO GROW

During 2014, the Centers for Disease Control estimated that for every person killed in a car crash, there were **8** people hospitalized and about **100** people evaluated, treated and released from the hospital.

The true cost of injuries extends far beyond the initial hospital bills. Additional cost considerations include collision repair, missed time from work and school, therapy and other treatment costs, as well as the cost of damage to public facilities and private property.

## MAKING HEADWAY IN SOME AREAS

While the figures for fatalities and serious injuries on the whole is staggering, one should take the time to acknowledge success where safety has been improved.

- Overall, the number of serious injuries and deaths per 100 miles driven has fallen.
- Deaths due to drunk driving have fallen.
- Year-to-date information from NOTS shows a **30%** drop in drunk driving deaths and incidents for Clark county so far in 2016.
- 2016 shows a **75%** improvement in the fatality rate for bikers.

## MULTIPLE CONTRIBUTING FACTORS

Where a car accident lawyer is concerned, Las Vegas is peppered with variables that can lead to serious injuries and fatalities in collisions.

- The combination of:
- High visitor numbers.
- Multiple roadside attractions.
- A population boom.
- While intoxication still plays a role in car accident injury and death, the number of intoxication-related accidents has dropped in recent years.
- At the same time, incidents where drivers and/or passengers in car crashes are killed or injured due to improper seatbelt use continue to happen.

## WHAT CAN BE DONE

The Zero Fatalities initiative has moved resources for road safety across the board.

By providing awareness campaigns, better education resources and installing road improvements, Nevada's driving culture has an improved focus on safety.

## BUT ALL ROAD USERS CAN DO MORE TO BOLSTER SAFETY

### BE AWARE

The onus for road safety is on all of those driving, riding and walking the streets. Be visible and be alert to stay safe.

### STOP

Whether driving, walking, or cycling if the light is red **stop**.

### WEAR SEATBELTS

The most effective means of protection in the event of a collision is using the appropriate safety restraint.

### IMPAIRED DRIVING

Do not drive under the influence of drugs or alcohol and refuse to allow others to do so. Some prescription medications can impair driving ability so take care to read the labels.

### DISTRACTED DRIVING

Do not eat, drink, text, play, watch movies, play games, send messages or take photos while driving. Multi-tasking while driving may have fatal results.

## **Myths Of The Fatality Of Numbers:**

**Myths of the Fatality of Numbers** S. Baring-Gould, 2005-12 This scarce antiquarian book is a facsimile reprint of the original. Due to its age, it may contain imperfections such as marks, notations, marginalia, and flawed pages. Because we believe this work is culturally important, we have made it available as part of our commitment for protecting, preserving, and promoting the world's literature in affordable, high-quality modern editions that are true to the original work.

*Curious Myths of the Middle Ages* S. Baring-Gould, 2019-11-21 In *Curious Myths of the Middle Ages*, S. Baring-Gould presents an engaging exploration of medieval folklore and superstition, skillfully weaving together historical narratives, legend, and myth. His literary style is characterized by a blend of rigorous scholarship and vivid storytelling, allowing readers to immerse themselves in the peculiar beliefs that shaped the medieval worldview. Baring-Gould meticulously dissects various tales, from the familiar to the obscure, exposing the cultural and theological contexts that gave rise to such myths while deftly employing a tone that is both accessible and academic, making the text a rich resource for both casual readers and scholars alike.

S. Baring-Gould was a prolific author, clergyman, and folklorist whose deep interest in the intersection of religion and culture informed much of his work. His fascination with the narratives that have shaped human experience, particularly those rooted in the medieval era, is evident in this book. Baring-Gould's extensive travels across Europe and his scholarly pursuits offered him an invaluable perspective on the oral traditions and historical contexts that influenced these intriguing myths. This book is highly recommended for anyone interested in the folklore of the Middle Ages, as well as those seeking to understand how these narratives echo in contemporary culture. Baring-Gould's insightful analysis invites readers to reconsider the boundaries of myth and history, ultimately challenging the perception of medieval thought as mere superstition.

**Myths and Memories of the Black Death** Ben Dodds, 2021-12-11 This book explores modern representations of the Black Death, a medieval pandemic. The concept of cultural memory is used to examine the ways in which journalists, writers of fiction, scholars, and others referred to, described, and explained the Black Death from around 1800 onwards. The distant medieval past was often used to make sense of aspects of the present, from the cholera pandemics of the nineteenth century to the climate crisis of the early twenty-first century. A series of overlapping myths related to the Black Death emerged, based only in part on historical evidence. Cultural memory circulates in a variety of media, from the scholarly article to the video game and online video clip, and the connections and differences between mediated representations of the Black Death are considered. The Black Death is one of the most well-known aspects of the medieval world, and this study of its associated memories and myths reveals the depth and complexity of interactions between the distant and recent past.

Acree, 2021-07-05 This book proposes and explores the idea that the forced union of the aleatory and epistemic aspects of probability is a sterile hybrid inspired and nourished for 300 years by a false hope of formalizing inductive reasoning making uncertainty the object of precise calculation Because this is not really a possible goal statistical inference is not cannot be doing for us today what we imagine it is doing for us It is for these reasons that statistical inference can be characterized as a myth The book is aimed primarily at social scientists for whom statistics and statistical inference are a common concern and frustration Because the historical development given here is not merely anecdotal but makes clear the guiding ideas and ambitions that motivated the formulation of particular methods this book offers an understanding of statistical inference which has not hitherto been available It will also serve as a supplement to the standard statistics texts Finally general readers will find here an interesting study with implications far beyond statistics The development of statistical inference to its present position of prominence in the social sciences epitomizes a number of trends in Western intellectual history of the last three centuries and the 11th chapter considering the function of statistical inference in light of our needs for structure rules authority and consensus in general develops some provocative parallels especially between epistemology and politics
