Second the march of the constellations across the sky resulting from the annual revolution of the earth in its orbit is followed from month to month and they are presented in the text according to the times of their successive arrivals near the meridian the north and south line of the sky About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works Naked-eye Astronomy Patrick Moore,1966
