*Naked Spheres of Ink* G. Elton Warrick, 2004 There are instructions and guidelines for most things How is it then that we have so many misguided people I have come to the conclusion most people are the same as other people However those other than the majority are as different as the sun and the moon the earth and space And yet each of us desire to be unique to be recognized as individuals apart from the crowd Nevertheless most of us will not be remembered by future generations A few of us work hard at putting our uniqueness to word through poetry This book is my meager attempt at sharing part of my observations and fantasies into verse in my own poetic way I have tried to include in this book a mix of forms and styles Some forms are formal most are not I have included a few sing song street rhymes some sophisticated most not You may discover a few Rap poems and others which are experimental It is kind of like throwing Spheres of Ink onto a collection of pages and to be hopeful that they adhere enough and are created skillfully enough that some of them will be remembered by association of my name After I am dead and my ashes scattered I hope some of this poetry will survive me perhaps this very copy you are reading now And that somewhere down the line of time others will discover poetry they like from this small collection The most wasted of all days is one without poetry If you discover my spheres of ink have landed where they shouldn't or that your poetic taste differs I do apologize in advance for wasting your valuable time In that case remember that some poetry is not to be tossed aside lightly it should be launched into outer space This book is dedicated to honest opinion This book does not demonstrate genius not even close mediocre at best that is my honest appraisal of the poetry in this book However my ego can always use stroking Therefore if you like the verses here please tell someone Encourage them to purchase a copy for themselves or to give one or more as gifts

**Veils, Nudity, and Tattoos** Thorsten Botz-Bornstein,2015-08-27 At first sight tattoos nudity and veils do not seem to have much in common except for the fact that all three have become more frequent more visible and more dominant in connection with aesthetic presentations of women over the past thirty years No longer restricted to biker and sailor culture tattoos have been sanctioned by the mainstream of liberal societies Nudity has become more visible than ever on European beaches or on the internet The increased use of the veil by women in Muslim and non Muslim countries has developed in parallel with the aforementioned phenomena and is just as striking Through the means of conceptual analysis Veils Nudity and Tattoos The New Feminine Aesthetics reveals that these three phenomena can be both private and public humiliating and empowering and backward and progressive This unorthodox approach is traced by the three s similar social and psychological patterns and by doing so Veils Nudity and Tattoos hopes to sketch the image of a woman who is not only sexually emancipated and confident but also more and more aware of her cultural heritage

**Glass Micro- and Nanospheres** Giancarlo C. Righini,2019-08-15 This book summarizes the recent research and development in the field of glass micro and nanospheres With special focus on the physics of spherical whispering gallery mode resonators it presents selected examples of application of glass microspheres in biosensing laser devices and microwave engineering Hollow microspheres also offer a perspective for hydrogen transport and storage On the other hand glass nanospheres are

fundamental for a class of photonic crystals e.g. direct and inverse opals as well as for industrial composite materials. Both micro and nanospheres find important applications in biomedicine. The book highlights examples of preparation techniques and applications, addresses recent challenges and examines potential solutions. It addresses physicists, chemists, materials scientists and engineers working with glass materials on microcavities, on nanotechnologies and on their applications. Colour is a sensation and as such it is a subjective and incommunicable quantity. Colour measurement is possible because we can create a correspondence between colour sensations and the light radiations that stimulate them. This correspondence concerns the physics of light radiation, the physiology of the visual process and the psychology of vision. Historically, in parallel to standard colorimetry systems for colour ordering, have been developed that allow colour specifications in a very practical and concrete way based on the direct vision of material colour samples arranged in colour atlases. Colour ordering systems are sources of knowledge of colour vision which integrate standard colorimetry. **Standard Colorimetry: Definitions, Algorithms and Software** Describes physiology and psychophysics useful to understand colorimetry. Considers all the photometric and colorimetric systems standardized by CIE XYZ, CIELAB, CIELUV, LMS. Presents colorimetric instrumentation in order to guide the reader toward colorimetric practice. Discusses colorimetric computation to understand the meaning of numerical colour specification. Considers colorimetry in colour syntheses and in imaging colour reproduction. Includes ready to use, freely available software Colorimetric eExercise which has multiple toolboxes dedicated to displaying CIE systems atlases, any colour and its whole numerical specification, colour vision phenomena and tests. **Standard Colorimetry: Definitions, Algorithms and Software** is an accessible and valuable resource for students, lecturers, researchers and laboratory technicians in colour science and image technology. What is astro culture? In *The Babylonian Planet*, it is unfolded as an aesthetic, an idea, a field of study, a position and a practice. It helps to engineer the shift

from a world view that is segregated to one that is integrated from global to planetary from distance to intimacy and where closeness and cosmic distance live side by side In this tour de force Sonja Neef takes her cue from Edouard Glissant's vision of multilingualism and reignites the myth of the Tower of Babel to anticipate new forms of cultural encounter For her Babel is an organic construction site at which she fuses theoretical analysis and case studies of artists writers and thinkers like William Kentridge Orhan Pamuk and Immanuel Kant Her skilful interrogations then allow her to paint a portrait of art and culture that abolishes the horizon as a barrier to vision and reclaims it as a place of contact and relation By combining the Babylonian concept of the encounter and the planetary concept of the whole earth Neef creates a space an astro culture in which she can examine topics as varied as language translation media modernity migration and the moon In doing so she instigates a renewed cultural understanding receptive to the kinder forms of cultural encounter and globalisation she hopes will come
