## **Names And Substance Of The Australian Subsection System:**

Names and Substance in the Australian Subsection System Carl Georg Brandenstein, 1982-11 Structural analysis of subsection system as opposition between six basic physical or temperamental qualities constructs from this classification an Aboriginal World Order material drawn from many areas with an emphasis on north west Australia includes tribal index to contents

The Metamorphoses of Kinship Maurice Godelier, 2012-03-03 With marriage in decline divorce on the rise the demise of the nuclear family and the increase in marriages and adoptions among same sex partners it is clear that the structures of kinship in the modern West are in a state of flux In *The Metamorphoses of Kinship* the world renowned anthropologist Maurice Godelier contextualizes these developments surveying the accumulated experience of humanity with regard to such phenomena as the organization of lines of descent sexuality and sexual prohibitions In parallel Godelier studies the evolution of Western conjugal and familial traditions from their roots in the nineteenth century to the present The conclusion he draws is that it is never the case that a man and a woman are sufficient on their own to raise a child and nowhere are relations of kinship or the family the keystone of society Godelier argues that the changes of the last thirty years do not herald the disappearance or death agony of kinship but rather its remarkable metamorphosis one that ironically is bringing us closer to the traditional societies studied by ethnologists

*Social Anthropology and Australian Aboriginal Studies* Robert Tonks, Ronald Berndt, 1988-11 This volume summaries major developments in the social anthropology of Aboriginal studies in the 1960s 80s It is valuable as an overview of five important and interrelated topics economy kinship gender religion and law It also contains stimulating comment and criticism and raised important issues for future research as well as current debate in Aboriginal studies

Attraction of Opposites David Maybury-Lewis, Uri Almagor, 2025-10-01 *The Attraction of Opposites* considers a puzzling phenomenon Why do societies all over the world organize their social thought and institutions in patterns of opposites The essays collected in this volume examine contemporary societies throughout the world that organize their social theories or institutions in binary form Through analysis of these rich materials the distinguished contributors explore the enduring human attraction to dualism They consider whether this is due to the natural twoness of things and if not why polarity should play such a prominent role in both ancient cosmologies and modern philosophies in early empires and in modern two party systems This study of dual organization tells us something important about human beings illuminating a mode of thought and social organization that has represented an attractive option throughout human history

The Comparative Method Reviewed Mark Durie, Malcolm Ross, 1996-05-16 Historical reconstruction of languages relies on the comparative method which itself depends on the notion of the regularity of change The regularity of sound change is the famous Neogrammarian Hypothesis sound change takes place according to laws that admit no exception The comparative method however is not restricted to the consideration of sound change and neither is the assumption of regularity Syntactic morphological and semantic change are all amenable in varying degrees to

comparative reconstruction and each type of change is constrained in ways that enable the researcher to distinguish between regular and more irregular changes This volume draws together studies by scholars engaged in historical reconstruction all focussing on the subject of regularity and irregularity in the comparative method A wide range of languages are represented including Chinese Germanic and Austronesian **A - Airports** British Library,2012-05-21 No detailed description available for A Airports

Skin, Kin and Clan Patrick McConvell,Piers Kelly,Sébastien Lacrampe,2018-04-01 Australia is unique in the world for its diverse and interlocking systems of Indigenous social organisation On no other continent do we see such an array of complex and contrasting social arrangements coordinated through a principle of universal kinship whereby two strangers meeting for the first time can recognise one another as kin For some time Australian kinship studies suffered from poor theorisation and insufficient aggregation of data The large scale AustKin project sought to redress these problems through the careful compilation of kinship information Arising from the project this book presents recent original research by a range of authors in the field on the kinship and social category systems in Australia A number of the contributions focus on reconstructing how these systems originated and developed over time Others are concerned with the relationship between kinship and land the semantics of kin terms and the dynamics of kin interactions **Sign Languages of Aboriginal**

**Australia** Adam Kendon,1988 This 1988 book was the first full length study ever to be published on the subject of sign language as a means of communication among Australian Aborigines Based on fieldwork conducted over a span of nine years the volume presents a thorough analysis of the structure of sign languages and their relationship to spoken languages

**The Languages and Linguistics of Australia** Harold Koch,Rachel Nordlinger,2014-08-19 The Languages and Linguistics of Australia A Comprehensive Guide is part of the multi volume reference work on the languages and linguistics of the continents of the world The volume provides a thorough overview of Australian languages including their linguistic structures their genetic relationships and issues of language maintenance and revitalisation Australian English Aboriginal English and other contact varieties are also discussed **Aboriginal Peoples and Birds in Australia** Philip A.

Clarke,2023-04-03 Australia is home to many distinctive species of birds and Aboriginal peoples have developed close alliances with them over the millennia of their custodianship of this country Aboriginal Peoples and Birds in Australia Historical and Cultural Relationships provides a review of the broad physical historical and cultural relationships that Aboriginal people have had with the Australian avifauna This book aims to raise awareness of the alternative bodies of ornithological knowledge that reside outside of Western science It describes the role of birds as totemic ancestors and spirit beings and explores Aboriginal bird nomenclature foraging techniques and the use of avian materials to make food medicine and artefacts Through a historical perspective this book examines the gaps between knowledge systems of Indigenous peoples and Western science to encourage greater collaboration and acknowledgment in the future Cultural sensitivity Readers are warned that there may be words descriptions and terms used in this book that are culturally sensitive and which

### **Dictionary of Concepts in Cultural Anthropology**

Robert H. Winthrop,1991-11-18 The field of cultural anthropology describes and interprets the thought and behavior of contemporary and near contemporary societies Inherently pluralistic it offers a framework in which the distinctive perspectives of each cultural world can be appreciated Robert Winthrop s dictionary describes the major concepts that have shaped the discipline both historically and theoretically It sets modern anthropology in its proper context within the broader intellectual tradition Eighty entries review the key concepts culture race nature symbolism adaptation the primitive etc that have established the fundamental problems and issues guided research and served as the focus for debate in key areas of the discipline The entries which range from 2 000 to 6 000 words in length are both thorough in treatment and contemporary in relevance Some entries are primarily of historical significance while others describe recent developments Each entry contains an annotated bibliography and a guide to additional reading on the subject While this is not primarily a technical lexicon many terms have been glossed and explained Designed to be useful to students of anthropology this dictionary will assist those in other disciplines to find their way through the anthropological labyrinth

### **German Ethnography in Australia**

Nicolas Peterson,Anna Kenny,2017-09-21 The contribution of German ethnography to Australian anthropological scholarship on Aboriginal societies and cultures has been limited primarily because few people working in the field read German But it has also been neglected because its humanistic concerns with language religion and mythology contrasted with the mainstream British social anthropological tradition that prevailed in Australia until the late 1960s The advent of native title claims which require drawing on the earliest ethnography for any area together with an increase in research on rock art of the Kimberley region has stimulated interest in this German ethnography as have some recent book translations Even so several major bodies of ethnography such as the 13 volumes on the cultures of northeastern South Australia and the seven volumes on the Aranda of the Alice Springs region remain inaccessible along with many ethnographically rich articles and reports in mission archives In 18 chapters this book introduces and reviews the significance of this neglected work much of it by missionaries who first wrote on Australian Aboriginal cultures in the 1840s Almost all of these German speakers in particular the missionaries learnt an Aboriginal language in order to be able to document religious beliefs mythology and songs as a first step to conversion As a result they produced an enormously valuable body of work that will greatly enrich regional ethnographies

### **Ecologies of Participation**

Zayin Cabot,2018-04-30 In this daring debut Zayin Cabot challenges the wise homebodies of academia A profoundly interdisciplinary approach to comparative scholarship Ecologies of

Participation offers a methodology whereby we can face our shared planetary predicament. It is grounded in process philosophy and asserts the importance of a new ontology of agency. It traces the importance of Lévy Bruhl and Lévi Strauss's early work while offering new insight into the ontological turn in anthropology. This book sets out to destabilize modern reductionist trends toward scientific materialism without falling into postmodern cultural constructivism. It does not assume the givenness of nature or culture. By advancing a multi-ontology approach, this work offers robust interventions into decolonial and critical studies. Cabot takes contemporary scholarship in new and exciting directions, offering an unstable ground from which to examine our shared worlds, both human and other. Throughout the last chapters of the book, these threads are illuminated through a detailed ethics of comparison and participation.

**Blood Magic** Thomas Buckley, Alma Gottlieb, 2023-04-28. Examining cultures as diverse as long house dwellers in North Borneo, African farmers, Welsh housewives, and postindustrial American workers, this volume dramatically redefines the anthropological study of menstrual customs. It challenges the widespread image of a universal menstrual taboo as well as the common assumption of universal female subordination which underlies it. Contributing important new material and perspectives to our understanding of comparative gender politics and symbolism, it is of particular importance to those interested in anthropology, women's studies, religion, and comparative health systems.

**Beyond Nature and Culture** Philippe Descola, 2013-08-01. Gives to anthropological reflection a new starting point and will become the compulsory reference for all our debates in the years to come. Claude Lévi Strauss on the French edition: *Beyond Nature and Culture* has been a major influence in European intellectual life since its French publication in 2005. Here finally it is brought to English language readers. At its heart is a question central to both anthropology and philosophy: what is the relationship between nature and culture? Culture, as a collective human making of art, language, and so forth, is often seen as essentially different from nature, which is portrayed as a collective of the nonhuman world of plants, animals, geology, and natural forces. Philippe Descola shows this essential difference to be not only a Western notion but also a very recent one. Drawing on ethnographic examples from around the world and theoretical understandings from cognitive science, structural analysis, and phenomenology, he formulates a sophisticated new framework: the four ontologies—animism, totemism, naturalism, and analogism—to account for all the ways we relate ourselves to nature. By thinking beyond nature and culture as a simple dichotomy, Descola offers a fundamental reformulation by which anthropologists and philosophers can see the world afresh. A compelling and original account of where the nature/culture binary has come from, where it might go, and what we might imagine in its place.
