Naming The Stars Poems:

Naming the Stars Joyce Sutphen, 2003-04-01 From an award winning poet a major new gathering of poems that employ the sonnet form The Etymological Poetry of W.H. Auden, J.H. Prynne, and Paul Muldoon Mia Gaudern, 2020 This volume explores the poetry of W H Auden J H Prynne and Paul Muldoon with specific attention to the ways in which their work has engaged with etymology and the history of language Your Name Is Written in the Stars Csilla Domb, This book is for men Not for those who are perfect but for those who have already fallen apart For the men who once believed they didn't matter Who stayed silent for too long Who tried to bury the pain the memories behind alcohol work and walls But now they are ready to finally face themselves To survive because they want to live Because a second chance is possible Because there is always a second chance This book is not for everyone But for those it is for it can go deep Not answers but connection

John T. Irwin, 2011-11-17 In one of his letters Hart Crane wrote Appollinaire lived in Paris I live in Cleveland Ohio comparing misspelling and all the great French poet s cosmopolitan roots to his own more modest ones in the midwestern United States Rebelling against the notion that his work should relate to some European school of thought Crane defiantly asserted his freedom to be himself a true American writer John T Irwin long a passionate and brilliant critic of Crane gives readers the first major interpretation of the poet s work in decades Irwin aims to show that Hart Crane s epic *The Bridge* is the best twentieth century long poem in English Irwin convincingly argues that compared to other long poems of the century *The Bridge* is the richest and most wide ranging in its mythic and historical resonances the most inventive in its combination of literary and visual structures the most subtle and compelling in its psychological underpinnings Irwin brings a wealth of new and varied scholarship to bear on his critical reading of the work from art history to biography to classical literature to philosophy revealing *The Bridge* to be the near perfect synthesis of American myth and history that Crane intended Irwin contends that the most successful entryway to Crane s notoriously difficult shorter poems is through a close reading of *The Bridge* Having admirably accomplished this Irwin analyzes Crane s poems in *White Buildings* and his last poem *The Broken Tower* through the larger context of his epic showing how Crane in the best of these worked out the structures and images that were fully developed in *The Bridge* Thoughtful deliberate and extraordinarily learned this is the most complete and careful reading of Crane s poetry available Hart Crane may have lived in Cleveland Ohio but as Irwin masterfully shows his poems stand among the greatest written in the English language

Ancient and Medieval Greek Etymology Arnaud Zucker, Claire Le Feuvre, 2021-01-18 This volume on Greek synchronic etymology offers a set of papers evidencing the cultural significance of etymological commitment in ancient and medieval literature The four sections illustrate the variety of approaches of the same object which for Greek writers was much more than a technical way of studying language Contributions focus on the functions of etymology as they were intended by the authors according to their own aims 1 Philosophical issues addresses the theory of etymology and its explanatory power especially in Plato and in Neoplatonism 2 Linguistic issues discusses various etymologizing techniques and the status of etymology which was criticized and openly rejected by some authors 3 Poetical practices of etymology investigates the ubiquitous presence of etymological reflections in learned poetry whatever the genre didactic aetiological or epic 4 Etymology and word plays addresses the vexed question of the limit between a mere pun and a real etymological explanation which is more than once difficult to establish The wide range of genres and authors and the interplay between theoretical reflection and applied practice shows clearly the importance of etymology in Greek thought **Catalogues of Proper Names in Latin Epic Poetry** Stratis Kyriakidis, 2009-03-26 The book consists of two main parts a Structure and Contents b Catalogues in Context In the first part the major subject is how a catalogue is organized internally A number of structural patterns formed since Homer on the basis of the position the names held within the catalogue density in the middle spacing in the middle ascending descending mode internal balance erratic pattern were to continue down to the period of Lucretius Virgil and Ovid Each pattern carries its own dynamism in the text and has its particular effects in the reading process Especially when the poetic work evolves in time the fluctuation of the density in names per verse entails a corresponding fluctuation of the narrative tempo On occasion the reader may also recognize in the structure of the catalogue a visual parallel to the situation described Mirroring technique widely applied in literary and artistic works in antiquity finds its place in the poetic catalogues of the period and can be distinguished in three major categories the extratextual the intertextual and the intratextual In Ovid the technique became most sophisticated The second part deals with the relation of the catalogue to its surrounding text In this respect catalogue markers and the way a catalogue is introduced or completed are issues which are discussed in this part of the work as they can be indicative of the way the poet views the contents of a catalogue What becomes evident here is that the usual catalogue markers are the products of the notion that whoever or whatever is included in a catalogue is listed there as an individual entity even if some of its characteristics are neutralized This proves to be true in Virgil where the items of a catalogue retain their value whereas frame and content function in support of each other This also occurs in the greater part of the epic tradition Before Virgil however in Lucretius the frame

was often the means of subverting the traditional function of a catalogue since it usually called into question the very existence of the beings named or undermined their value On some occasions a Virgilian catalogue does not close with a verbal frame but with a pause This mode of closure proves to be the strongest boundary between a catalogue and the continuation of the narrative On other occasions we shall find a simile at the end of a catalogue These closural devices stress the catalogue's potentials as they affect the reading process Things change in the Ovidian *Metamorphoses* Ovid makes extensive use of various poetic techniques and devices which he draws from the tradition in general and Virgil in particular In doing so however he often challenges their significance and forms catalogues that give the impression of delaying by protracting the oncoming narrative In Ovid's work neither the pause nor the simile can easily constitute natural barriers to his catalogues Everything in the *Metamorphoses* is in a continuous state of flux and the catalogue too has to adapt accordingly by acquiring new characteristics with novel values This book is the first of the series *Pierides* series editors Philip Hardie Stratis Kyriakidis
