Living Under the Shadow John Grattan, Robin Torrence, 2016-06-03 Popularist treatments of ancient disasters like volcanic eruptions have grossly overstated their capacity for death destruction and societal collapse Contributors to this volume from anthropology archaeology environmental studies geology and biology show that human societies have been incredibly resilient and in the long run have often recovered remarkably well from wide scale disruption and significant mortality They have often used eruptions as a trigger for environmental enrichment cultural change and adaptation These historical studies are relevant to modern hazard management because they provide records for a far wider range of events and responses than have been recorded in written records yet are often closely datable and trackable using standard archaeological and geological techniques Contributors also show the importance of traditional knowledge systems in creating a cultural memory of dangerous locations and community responses to disaster The global and temporal coverage of the research reported is impressive comprising studies from North and Central America Europe Asia and the Pacific and ranging in time from the Middle Palaeolithic to the modern day **North Atlantic Civilization at War** Patrick Lloyd

Evans, 2022-05-10 It s a funny old house They have this ceremony every summer There s an old chapel in the grounds of the house It s half derelict The Hunters keep bees in there Every year on the same day the family processes to the chapel They open the combs taste the honey Take it back to the house Half for them my father winced as though he had bitten down on a sore tooth And half for us Catherine a successful barrister vanishes from a train station on the eve of her anniversary Is it because she saw a figure someone she believed long dead Or was it a shadow cast by her troubled fractured mind The answer lies buried in the past It lies in the events of the hot seismic summer of 1989 at Vanes a mysterious West Country manor house where a young girl Jane LeStrange arrives to stay with the gilded grand Hunter family and where a devastating tragedy will unfold Over the summer as an ancient family ritual looms closer Janey falls for each member of the family in turn She and Kitty the eldest daughter of the house will forge a bond that decades later is still shaping the present We need the bees to survive and they need us to survive Once you understand that you understand the history of Vanes you understand our family **The Deadly Air** Christian Jennings, Hundreds of thousands of people die every year from malaria No one s

quite sure of the exact number It s just too difficult to keep track of the disease as it tears through more than 200 million cases each year many of them in countries wracked by war and blighted by other problems What is certain is that it is people living in these situations and more specifically children aged under five who suffer disproportionately It is for these areas that universities and NGOs drugs companies governments and philanthropists from around the world are united in an ongoing battle against the disease Malaria has been with us for thousands of years The Ancient Egyptians had it Chinese dynasties before them One of the first treatments for the disease was quinine brought to Europe from Peru in the mid fifteenth century In some arenas during the second world war more soldiers were hospitalised by malaria than by injuries sustained during fighting Today malaria remains one of the most resilient and most adaptive diseases out there constantly mutating as it finds ways around the drugs deployed to combat it One of the key parts of the problem is the method by which malaria transmits itself from person to person mosquito bites Breeding feeding and transmitting at an incredible rate mosquitoes are unavoidable in whatever environment they live Now cutting edge science is being called upon to help save lives lost to malaria By genetically modifying the mosquitoes scientists are aiming to turn the disease s vector against itself

severing the link that enables malaria to spread In *The Deadly Air* Christian Jennings mixes together his own experiences of suffering from malaria with a history of mankind's struggle with the disease and an account of the scientists engaged in the modification of the mosquito's genome Rich in detail and scientific intrigue *The Deadly Air* is the story of malaria and of the millions of lives at stake in our fight against it **Outcast Europe** Sharif Gemie, Laure Humbert, Fiona Reid, 2012-01-19 An original perspective on the experience of refugees and relief workers *Fascist Voices* Christopher Duggan, 2013-06-01

Today Mussolini is remembered as a hated dictator who along with Hitler and Stalin ushered in an era of totalitarian repression unsurpassed in human history But how was he viewed by ordinary Italians during his lifetime In *Fascist Voices* Christopher Duggan draws on thousands of letters sent to Mussolini as well as private diaries and other primary documents to show how Italian citizens lived and experienced the fascist regime under Mussolini from 1922-1943 Throughout the 1930s Mussolini received about 1,500 letters a day from Italian men and women of all social classes writing words of congratulation commiseration thanks encouragement or entreaty on a wide variety of occasions his birthday and saint's day after he had delivered an important speech on a major fascist anniversary when a husband or son had been killed in action While Duggan looks at some famous diaries by such figures as the anti-fascist constitutional lawyer Piero Calamandrei the philosopher Benedetto Croce and the fascist minister Giuseppe Bottai the majority of the voices here come from unpublished journals diaries and transcripts Utilizing a rich collection of untapped archival material Duggan explores the cult of Il Duce the religious dimensions of totalitarianism and the extraordinarily intimate character of the relationship between Mussolini and millions of Italians Duggan shows that the figure of Mussolini was crucial to emotional and political engagement with the regime although there was widespread discontent throughout Italy little of the criticism was directed at Il Duce himself Duggan argues that much of the regime's appeal lay in its capacity to appropriate the language values and iconography of Roman Catholicism and that this emphasis on blind faith and emotion over reason is what made Mussolini's Italy simultaneously so powerful and so insidious Offering a unique perspective on the period *Fascist Voices* captures the responses of private citizens living under fascism and unravels the remarkable mixture of illusions hopes and fears that led so many to support the regime for so long

The Delicious History of the Holiday Fred Inglis, 2005-11-28 Our holidays lie near the heart of our emotional life enjoyed for a fortnight fed on imagination for eleven months of the year What we want from our holidays tells a lot about who we are and what we wish we were In this charming account Fred Inglis traces the rise of the holiday from its early roots in the Grand Tour through the coming of Thomas Cook and his Blackpool packages to sex tourism and the hippie trail to Kathmandu He celebrates the bodily pleasures of generations of tourists from Edwardian banquets in Paris to fish and chips on the beach from the Bright Young Things on the Riviera to the chosen hardships of the sea the desert wastes and the mountain tops He considers the ideals and the spiritual aspirations which are part of what we look for in a holiday but he also warns of a darker current how we have increasingly destroyed what we take most pleasure in

and how the dealings between those who have much and those who have little can seldom however good our intentions avoid the taint of exploitation
