The V-Spot Joan Lachkar,2007-12-24 Everyone knows what the G spot is of course It is a woman s most sensitive and vulnerable physical area Although men do not have a G spot per se both men and women have what Joan Lachkar calls a V spot a concentration of highly charged emotional sensitivities emanating from early childhood experiences that remain raw and unhealed These experiences might involve the parent who abandoned the child at an early age the mother who smothered the child with too much affection or the child who was neglected and never touched or soothed Another source can be a parent or caretaker who drills the message into the child You re not good enough not deserving enough too demanding etc For men it could be an emotionally castrating controlling dominating overbearing mother Many authors have written and talked about emotional abuse but until The V Spot no one has given this area of volcanic emotion a name or has written about it in terms accessible to layman and professional alike Getting in contact with the V spot is the only way to break away from emotional abuse and begin the healing process No other book pinpoints not only what ignites the V spot but also how and why the resulting affect explosion interferes with judgment reality thinking and perception The reader will be astonished to discover how tracing the source of one s V spot strengthens one s capacity to make complex decisions and lessens the repetitive cycle of pain anxiety confusion and turmoil that blindness to one s V spot can produce

The Disappearing Male Joan Lachkar,2012-12-15 The Disappearing Male by Joan Lachkar PhD provides a psychoanalytic psychodynamic description of eight different kinds of men who disappear from relationships without warning or explanation The term is not restricted to merely a physical disappearance but also to ones

who emotionally disappear such as the Robotic Man described in the chapter of the OCD Lachkar's personal clinical and professional experience have shown a number of women who have been vastly confused and hurt by the disappearing male. These men appear to be madly in love at the onset and then suddenly vanish without an explanation. Many of these women come into therapy sessions depressed, feeling traumatized and abused by men who promise them the world, act as though they are the love of their lives and then suddenly vanish without a call. By acknowledging the diagnostic distinctions of eight different types of disappearing men, this book can help to assist these women in recognizing the red flags and danger signs to prevent them from faltering in their relationship efforts. The Disappearing Male describes the symptoms of eight different diagnostic types of men that women frequently encounter. The symptoms and dynamics that are outlined in this book will vastly enhance an individual's capacity to become aware of the disappearing male syndrome. This book is significant to the awareness and self-esteem of women in relationships, the dating world, and to the therapists that treat them. **Case**

Studies in Couples Therapy David K. Carson, Montserrat Casado-Kehoe, 2013-06-19. This up-to-date, highly readable, theory-based and application-oriented book fills a crucial void in literature on couple therapy. Few books in the couple therapy market bridge the gap between theory and practice; texts tend to lean in one direction or the other, either emphasizing theory and research with little practical application or taking a cookbook approach that describes specific techniques and interventions that are divorced from any conceptual or theoretical base. However, couples therapy requires a high degree of abstract conceptual thinking as well as ingenuity, inventiveness, and skill on the part of the therapist. *Case Studies in Couples Therapy* blends the best of all worlds: clinical applications with challenging and diverse couples that have been derived from the most influential theories and models in couples and family therapy, all written by highly experienced and respected voices in the field. In *Case Studies in Couples Therapy*, readers will grasp the essentials of major theories and approaches in a few pages and then see how concepts and principles are applied in the work of well-known clinicians. The case studies incorporate a wide variety of couples from diverse backgrounds in a number of different life situations. It is simultaneously narrow, including specific processes and interventions applied with real clients, and broad, clearly outlining a broad array of theories and concepts in scope, and the interventions in it are directly linked to theoretical perspectives in a clear and systematic way. Students and clinicians alike will find the theoretical overview sections of each chapter clear and easy to follow, and each chapter's thorough descriptions of effective practical interventions will give readers a strong sense of the connections between theory and practice. **Islamic Terror** Avner Falk, 2008-07-30. Independent scholar Falk analyzes the

genesis of Islamic terror from many standpoints, including religious, cultural, historical, political, social, economic, and above all, psychological. Drawing on his training as a clinical psychologist, Falk's writings specialize in psychohistory and political psychology. Here he examines topics including infantile experience and adult terrorism, the meaning of terror, terrorists, and their mothers' narcissistic rage and Islamic terror, and whether terrorists are normal people, as some scholars claim. He also

describes the infantile development of terrorist pathology non psychoanalytic theories of terrorism globalization s effect on terrorism and the notion of the clash of civilizations Other topics addressed in this reader friendly analysis include history s first Islamic terrorists and three important cases two recent deadly terrorists and a primary figure in our current war on terror Independent scholar Falk analyzes the genesis of Islamic terror from many standpoints including religious cultural historical political social economic and above all psychological Drawing on his training as a clinical psychologist Falk s writings specialize in psychohistory and political psychology Here he examines topics including infantile experience and adult terrorism the meaning of terror terrorists and their mothers narcissistic rage and Islamic terror and whether terrorists are normal people as some scholars claim He also describes the infantile development of terrorist pathology non psychoanalytic theories of terrorism globalization s effect on terrorism and the notion of the clash of civilizations Examining the emotional structure of traditional Muslim families Falk shows us the Muslim child s ambivalence toward his or her parents ways in which Muslims abuse women and children and the roots of Muslim rage and why all of that plays into the development of future terrorism Other topics addressed in this reader friendly analysis include history s first Islamic terrorists and three important cases two recent deadly terrorists and a primary figure in our current war on terror The central idea throughout the book is that a person s attitude toward terror and terrorism as well as whether he or she becomes a murderous terrorist or even who wages a global war on terror has much to do with that person s own terrifying experiences in infancy and childhood Such terror usually experienced first in the earliest interactions with the mother is symbolically expressed as Falk shows in fairy tales and myths about terrifying witches and female monsters Further terror may be experienced in the relationship with the father and also in various other traumatic ways It is these early terrors when extreme and uncontrollable that most often produce terrorists and wars on terror Falk argues Thus his book focuses on the conscious but also on the irrational and unconscious causes of terrorism
