Tracking Universal Health Coverage World Health Organization, 2015-07-21 This report is the first of its kind to measure health service coverage and financial protection to assess countries progress towards universal health coverage It shows that at least 400 million people do not have access to one or more essential health services and 6% of people in low and middle income countries are tipped into or pushed further into extreme poverty because of health spending Universal health coverage UHC means that all people receive the quality essential health services they need without being exposed to financial hardship A significant number of countries at all levels of development are embracing the goal of UHC as the right thing to do for their citizens It is a powerful social equalizer and contributes to social cohesion and stability Every country has the potential to

improve the performance of its health system in the main dimensions of UHC coverage of quality services and financial protection for all. Priorities, strategies and implementation plans for UHC will differ from one country to another. Enhanced and expanded monitoring of health under the Sustainable Development Goals (SDGs) should seek to build on that experience, sharpening our focus on the key health service and financial protection interventions that underpin UHC. Effective UHC tracking is central to achieving the global goals for poverty alleviation and health improvement set by the World Bank Group and WHO. Without it, policymakers and decision takers cannot say exactly where they are or set a course for where they want to go. They cannot know whether they are focussing their efforts in the right areas or whether their efforts are making a difference. Monitoring is thus fundamental to the achievement of UHC objectives. It will also be vital to the realization of the SDGs. This report is a critical step to show how monitoring progress can be done, telling us what the state of coverage of interventions and financial protection is and telling us where to focus most. High Society Joseph A. Califano Jr., 2008-10-14

The individual who reaches age twenty one without smoking, using illegal drugs or abusing alcohol is virtually certain never to do so. As Joseph Califano points out in his searing indictment of America's irresponsible attitude towards drug abuse, by failing to act on this lesson we have lost untold lives and resources. Califano deftly demonstrates how substance abuse is implicated in poverty, violent crime, soaring health care costs, family dissolution, child abuse, homelessness, teen pregnancy and AIDS. With alcohol and tobacco interests buying political protection with campaign contributions and helping seed a culture of substance abuse, Califano illustrates the dire need for parental engagement, proposes revolutionary changes in prevention, treatment and the nation's criminal justice, health care and social service systems and sounds an urgent cry to address the plague responsible for the death of more Americans than all our wars, natural catastrophes and traffic accidents combined. Rethinking Illicit Economies in Opium and Cocaine Eric D. U. Gutierrez, 2023-11-13. This book investigates the cross border trade in illicit drug crops in the global south. It exposes an important paradox: despite all the dangers and negative consequences of these criminal networks, in many cases they also provide marginalised and excluded communities with important private sources of protection, investment and employment. This book reconstructs and compares socioeconomic contexts, criminal careers and changes in farmgate prices of illicit coca and opium poppy crops in Afghanistan, Myanmar, Colombia and Bolivia. It investigates the politics of strange bedfellows: informal bankers without suits providing cross border financial services to the undocumented and the unbanked; the criminals without borders and the mystery of illicit crop prices. The book challenges commonly held assumptions and casts new light on how relationships of conflict and accommodation are arranged and re-arranged in fluid, ever-changing contexts, producing often paradoxical outcomes. It then suggests policy reforms and alternative approaches to drug policy development, aid and peacebuilding work. Researchers and students across development, peacebuilding, illicit economies and conflict studies will find this book an important source of original research and analysis. It will also be useful for politicians, commentators and public officials considering what to do.
