### **Narrative Cultural Construct of Ill:**

Narrative and the Cultural Construction of Illness and Healing Cheryl Mattingly, Linda C. Garro, 2000 A valuable collection The essays in the volume are all fresh the result of recent work and the opening chapter by Garro and Mattingly places the current trend in narrative analysis in historical context explaining its diverse origins and constructs in a range of disciplines Shirley Lindenbaum author of *Kuru Sorcery* A good place to consult the narrative turn in medical anthropology Thick with the richness and diversity and stubborn resistance to interpretations of human stories of illness An anthropological antidote for too narrow a framing of the complex tangle of ways of being and ways of telling that make medicine a space of indelibly human experiences Arthur Kleinman author of *The Illness Narratives* *How to Do Things with Narrative* Jan Alber, Greta Olson, 2017-11-20 This volume combines narratological analyses with an investigation of the ideological ramifications of the use of narrative strategies The collected essays do not posit any intrinsic or stable connection between narrative techniques and world views Rather they demonstrate that world views are inevitably expressed through highly specific formal strategies This insight leads the contributors to investigate why and how particular narrative techniques are employed and under what conditions

**Identity and Health** David Kelleher, Gerard Leavey, 2004-07-31 Experiences of health and illness are fundamental to how we understand ourselves and the postmodern obsession with body image has made health even more significant in identity formation The study of subjective experiences of health and illness can also provide a challenge to traditional objective medical knowledge and given current healthcare interest in user involvement can highlight the need for change in health service provision This book explores the interplay between identity and health private and public mind and body Drawing on new material and using and exploring innovative biographical and narrative methods it covers a broad range of identities in relation to health and illness including race religion ethnicity disability age body image sexuality and gender Identity and Health will be of great interest to academics researchers and students of sociology medical anthropology health and psychology

**Identity Construction and Illness Narratives in Persons with Disabilities** Charlotte Glinthborg, Manuel L. de la Mata, 2020-08-31 This book investigates how being diagnosed with various disabilities impacts on identity Once diagnosed with a disability there is a risk that this label can become the primary status both for the person diagnosed as well as for their family This reification of the diagnosis can be oppressive because it subjugates humanity in such a way that everything a person does can be interpreted as linked to their disability Drawing on narrative approaches to identity in psychology and social sciences the bio psycho social model and a holistic approach to disabilities the chapters in this book understand disability as constructed in discourse as negotiated among speaking subjects in social contexts and as emergent By doing so they amplify voices that may have otherwise remained silent and use storytelling as a way of communicating the participants realities to provide a more in depth understanding of their point of view This book will be of interest to all scholars and students of disability studies sociology medical humanities

### **The Oxford Handbook of the Development of**

**Imagination** Marjorie Taylor, 2013-04-02 Children are widely celebrated for their imaginations but developmental research on this topic has often been fragmented or narrowly focused on fantasy However there is growing appreciation for the role that imagination plays in cognitive and emotional development as well as its link with children's understanding of the real world With their imaginations children mentally transcend time place and or circumstance to think about what might have been plan and anticipate the future create fictional relationships and worlds and consider alternatives to the actual experiences of their lives The Oxford Handbook of the Development of Imagination provides a comprehensive overview of this broad new perspective by bringing together leading researchers whose findings are moving the study of imagination from the margins of mainstream psychology to a central role in current efforts to understand human thought The topics covered include fantasy reality distinctions pretend play magical thinking narrative anthropomorphism counterfactual reasoning mental time travel creativity paracosms imaginary companions imagination in non human animals the evolution of imagination autism dissociation and the capacity to derive real life resilience from imaginative experiences Many of the chapters include discussions of the educational clinical and legal implications of the research findings and special attention is given to suggestions for future research

### Healthcare and Patient Communication in the Digital Era Sinikka Torkkola, Anna Sendra Toset, 2025-09-15 This book

provides a social and cultural theoretical framework for the digitalization of healthcare communication from a patient centred perspective Through empirical case studies the book outlines the experiences of patients as the digitalization of healthcare communication re spatializes and re temporalizes care and reconstructs patienthood and ill health To demonstrate how changes in communication impacts health and illness the book examines the digitalization process from three viewpoints Firstly it illustrates how the digitalization of illness enhances the availability of information and peer support which increases patient empowerment Secondly it shows how the digitalization of disease transforms signs of disease in a patient's body into

electronic data increases the distance between the disease and the patient and enables diagnosis without a healthcare professional touching a patient's body. Finally, it explains how the digitalization of sickness changes the power relations founded in health and reconfigures health citizenship. Filling a theoretical gap in health communication scholarship, this book will be of interest to academics and postgraduate students in the field of Health Communication, Digital Communication, Communication Studies, and Health Sciences. The book also offers healthcare professionals new perspectives to respond to the increasing communicative duties arising from the digitalization of healthcare communication. *Caring Well* David H. Smith, 2000-01-01. *Caring Well* reinvestigates the contribution of religion to medical ethics by developing new methodologies for approaching problems encountered in one particularly important aspect of the work of health care professionals: care for the seriously ill. It includes new work by some of the most prominent scholars in the field of medical ethics. **Narrative Research in Health and Illness** Brian Hurwitz, Trisha Greenhalgh, Vieda Skultans, 2008-04-15. This comprehensive book celebrates the coming of age of narrative in health care. It uses narrative to go beyond the patient's story and address social, cultural, ethical, psychological, organizational, and linguistic issues. This book has been written to help health professionals and social scientists to use narrative more effectively in their everyday work and writing. The book is split into three comprehensive sections: Narratives, Counter narratives, and Meta narratives. *Oral and Written Narratives and Cultural Identity* Francisco Cota Fagundes, Irene Maria Blayer, 2007. This interdisciplinary volume centers on the interrelations of storytelling and various manifestations of cultural identity from written to oral and from autobiographical to regional and national. Indigenous storytelling as well as storytelling for and by children and the elderly are the main focus of these essays. Together, these fifteen texts make a significant contribution toward a deeper understanding of various aspects of textual and oral narrative; they broaden the lines of inquiry into multidisciplinary and multicultural interests, particularly those centering on the construction, expression, and contextualization of various types of identity, and they illustrate the deployment of storytelling not only as testimony, contestation, and subversion but also as peacebuilding. Many countries, languages, and cultures are herein represented, from the United States and Canada to Japan, Singapore, and Malaysia, from English to Japanese to Greek to Italian to the languages of indigenous peoples of Latin America and the Philippines. How to Have Theory in an Epidemic Paula A. Treichler, 1999. A collection of essays on the AIDS epidemic by a leading feminist cultural theorist of science. *Stories of Dignity within Healthcare: Research, narratives and theories* Dr. Oscar Tranvåg, Dr. Oddgeir Synnes, Professor Wilfred McSherry, 2016-08-24. Dignity is fundamental to every single person's life and history, and every interaction with another human being can potentially influence a person's sense of identity and self-esteem. In recent years, there has been a growing awareness of the importance of dignity in care. When healthcare organisations and individuals prioritise dignity, service users, carers, and staff are treated with respect, compassion, and understanding, and safe, good quality healthcare services are delivered. In contrast, when dignity and respect are neglected or violated, people experience poor

quality care and may even suffer neglect and abuse For all these reasons it is clearly vital that all healthcare workers have a thorough understanding of dignity and how to place it at the centre of all their activities In this helpful and thought provoking book the contributors offer an overview of current research on dignity preserving care highlighting practical and ethical considerations in various healthcare settings Section I introduces some key dignity theories demonstrating how the use of narrative can offer insight and practical solutions for the delivery of high quality care Section II introduces actual stories from diverse settings and perspectives enabling the reader to engage with core elements of dignity while highlighting how dignity can be preserved even in very challenging practice situations Critical thinking activities are also provided to encourage deep reflection and learning This book will support students of nursing and allied healthcare professions as well as healthcare professionals working in diverse practice settings to reflect upon and enhance the quality of their care

Contents include Foreword old and new philosophical angles on dignity in care Preface the necessity of dignity in healthcare Understanding dignity a complex concept at the heart of healthcare Dignity and narrative moral intuitions and contested claims Dignity in dementia care Dignity protected by caring in care Storytelling as a dignity preserving practice in palliative care Reintegrating spirituality and dignity in nursing and healthcare a relational model of practice The service provider and care perspective Let us not forget the dignity of the professional caregiver the necessity of dignity preservation within the therapeutic context Dignity in suffering a theological perspective Learning dignity by involvement Dignity in cancer care a discussion based on three narratives written by nurses A story of facilitators experiences of the Excellence in Practice Accreditation Scheme and its influence on quality dignity and respect Afterword what gets in the way of dignity and why you must not let it

*Degeneration, decadence and disease in the Russian fin de siècle* Frederick White, 2015-11-01 Early in the twentieth century Russia was experiencing a decadent period of cultural degeneration just as science was developing ways to identify medical conditions which supposedly reflected the health of the entire nation Leonid Andreev the leading literary figure of his time stepped into the breach of this scientific discourse with literary works about degenerates The spirited social debates on mental illness morality and sexual deviance which resulted from these works became part of the ongoing battle over the definition and depiction of the irrational complicated by Andreev's own publicised bouts with neurasthenia This book examines the concept of pathology in Russia the influence of European medical discourse the development of Russian psychiatry and the role that it had in popular culture by investigating the life and works of Andreev It engages the emergence of psychiatry and the role that art played in the development of this objective science

**Narratives, Health, and Healing** Lynn M. Harter, Phyllis M. Japp, Christina S. Beck, 2006-04-21 This volume explores how narratives are used in the social construction of wellness and illness It is intended for scholars and advanced students in health communication and applied health disciplines

*Mental Illness, Dementia and Family in China* Guy Ramsay, 2013-03-12 With rapid economic progress and increasing life

expectancy in East Asian societies more attention is being paid by their governments the media and the academy to mental illness and dementia While clinical research on mental illness and dementia in Chinese societies acknowledges the importance of culture in shaping people's experiences of these illnesses how Chinese culture shapes people's understandings of and responses to mental illness and dementia has yet to be interrogated to any depth Mental Illness Dementia and Family in China breaks new ground in exploring how Chinese culture namely the understandings norms values and scripts that people acquire through being members of a Chinese community shapes contemporary stories of mental illness dementia and family care giving This book is innovative in examining and comparing stories which have been drawn from both real life life stories as well as from film and television productions filmic stories These two forms effectively complement each other with life stories generally presenting an insider's account and filmic stories generally presenting an outsider's account What remains unvoiced in one kind of story may be voiced in the other kind Drawing on the perspectives and analytic approaches of narrative analysis and cultural studies Guy Ramsay uncovers culturally shaped continuities and departures in representations of time identity and cause of illness as well as in the language employed in contemporary stories of mental illness dementia and family care giving in China This book will be invaluable to students and scholars working on Chinese cultural studies and Asian social policy as well as those interested in psychiatry mental health and disability studies more broadly

Chinese Stories of Drug Addiction Guy Ramsay, 2015-12-22 Addiction to illicit drugs is a pressing social concern across greater China where there are likely several million drug addicts at present This research breaks new ground by examining Chinese people's stories of drug addiction Chinese Stories of Drug Addiction systematically evaluates how drug addiction is represented and constructed in a series of contemporary life stories and filmic stories from mainland China Taiwan and Hong Kong These stories recount experiences leading up to and during drug addiction as well as experiences during drug rehabilitation and recovery Through analysis of these contemporary life stories and filmic stories the book presents a comprehensive picture of how Chinese people from both inside the experience of drug addiction and outside of it make sense of a social practice that is deemed to be highly transgressive in Chinese culture It employs a blended discourse analytic and narrative analytic approach to show how salient cultural political and institutional discourses shape these Chinese stories and experiences Complementing existing humanities research which documents the historical narrative of drug addiction in China at the expense of the contemporary narrative the book also provides health and allied professionals with a rich insight into how Chinese people from different geographical locations and walks of life make sense of the experience of drug addiction Moving beyond historical narrative to examine contemporary stories Chinese Stories of Drug Addiction offers a valuable contribution to the fields of Chinese studies and personal health and wellbeing as well as being of practical use to health professionals

**Playing Sick** Meredith Conti, 2018-07-27 Few life occurrences shaped individual and collective identities within Victorian era society as critically as witnessing or suffering from illness The prevalence of

illness narratives within late nineteenth century popular culture was made manifest on the period's British and American stages where theatrical embodiments of illness were indisputable staples of actors' repertoires. *Playing Sick: Performances of Illness in the Age of Victorian Medicine* reconstructs how actors embodied three of the era's most provocative illnesses: tuberculosis, drug addiction, and mental illness. In placing performances of illness within wider medicocultural contexts, Meredith Conti analyzes how such depictions confirmed or resisted salient constructions of diseases and the diseased. Conti's case studies, which range from Eleonora Duse's portrayal of the consumptive courtesan Marguerite Gautier to Henry Irving's performance of senile dementia in *King Lear*, help to illuminate the interdependence of medical science and theatre in constructing nineteenth century illness narratives. Through reconstructing these performances, Conti isolates from the period's acting practices a lexicon of embodied illness: a flexible set of physical and vocal techniques that performers employed to theatricalize the sick body. In an age when medical science encouraged a gradual decentering of the patient from their own diagnosis and treatment, late nineteenth century performances of illness symbolically restored the sick to positions of visibility and consequence.

*The Cultural Construction of Monstrous Children* Simon Bacon, Leo Ruickbie, 2020-09-30

*The Cultural Construction of Monstrous Children* raises important questions at the heart of society and culture and through an interdisciplinary, trans-cultural analysis presents important findings on socio-cultural representations and embodiments of the child and childhood. At the start of the 21st century, new anxieties constellate around the child and childhood while older concerns have re-emerged, mutated and grown stronger. But as historical analysis shows, they have been ever-present concerns. This innovative and interdisciplinary collection of essays considers examples of monstrous children since the 16th century to the present, spanning real life and popular culture to exhibit the manifestation of the Western cultural anxiety around the problematic, anomalous child as naughty, dangerous, or just plain evil. The book takes an inter- and multidisciplinary approach, drawing upon fields as diverse as sociology, psychology, film, and literature to study the role of the child and childhood within contemporary Western culture and to see the historic ways in which each discipline intersects and influences the other.
