Crowley,2007-03-31 This book uses the haikai verse and paintings of the brilliant innovative artist Yosa Buson 1716 1783 as a focal point from which to explore how Japanese writers competed for artistic authority in a time when popular responses to economic technological and social changes were creating the beginnings of a modern literature The first part of the book discusses Buson s role in the Bash Revival movement situating his haikai in the context of the social networks that writers of his time both relied on and resisted The second part explores Buson s hokku linked verse and haiga haikai painting The book concludes with a discussion of Buson s reception in the modern period and includes translations of his principal works

*Unravelling Travelling* Sue Beeton,2022-01-20 Unravelling Travelling Uncovering Tourist Emotions through Autoethnography takes an intrinsically personal autoethnographic approach to delve into the deep and very subjective emotions experienced while travelling to foreign places **Exophony** Yoko Tawada,2025-06-03 An electrifying new side of the National Book Award Winner Yoko Tawada her first book of essays in English I am trying to learn with my tongue sounds that are unfamiliar to me A foreign sounding word learned out of curiosity is not imitation per se All of these things I learn leave traces that slowly grow to coexist with my accent And that balancing act goes on changing indefinitely How perfect that Yoko Tawada s first essay in English dives deep into her lifelong fascination with the possibilities opened up by cross hybridizing languages Tawada famously writes in both Japanese and German but her interest in language reaches beyond any mere dichotomy The term exophonic which she first heard in Senegal has a special allure for the author I was already familiar with similar terms immigrant literature or creole literature but exophonic had a much broader meaning referring to the general experience of existing outside of one s mother tongue Tawada revels in explorations of cross cultural and intra language possibilities and along the way deals several nice sharp raps to the primacy of English The accent here as in her fiction is the art of drawing closer to the world through defamiliarization Never entertaining a received thought Tawada

seeks the still to be discovered truths as well as what might possibly be invented entirely whole cloth Exophony opens a new vista into Yoko Tawada s world and delivers more of her signature erudite wit at once cross grained and generous laser focused and multidimensional slyly ironic and warmly companionable 田口 洋子,1980 Towns, Ecology, and the Land Richard T. T. Forman,2019-02-07 Towns and villages are sometimes viewed as minor even quaint spots whereas this book boldly reconceptualizes these places as important dynamic environmental hotspots Multitudes of towns and villages with nearly half the world s population characterize perhaps half the global land surface The book s pages feature ecological patterns processes and change as well as human dimensions both within towns and in strong connections and effects on surrounding agricultural land forest land and arid land Towns small to large and villages are examined with spatial and cultural lenses Ecological dimensions water soil and air systems together with habitats plants wildlife and biodiversity are highlighted A concluding section presents concepts for making better towns and better land From a pioneer in both landscape ecology and urban ecology this highly international town ecology book opens an important frontier for researchers students professors and professionals including environmental town and conservation planners Encountering Nature Dr Thomas Heyd,2012-10-01 This book argues that an attentive encounter with nature is of key importance for the development of an environmentally appropriate culture The fundamental idea is that the environmental degradation that we are increasingly experiencing is best conceived as the consequence of a cultural mismatch our cultures seem not to be appropriate to the natural environment in which we move and on which we depend in thoroughgoing ways In addressing this problem Thomas Heyd weaves together a rich tapestry of perspectives on human interactions with the natural world ranging from traditional modes of managing human communities that include the natural environment to the consideration of poetic travelogues ecological restoration and botanic gardens The volume is divided into three parts which respectively consider the relation of human beings to nature in terms of ethics aesthetics and culture It engages the current literature in each of these areas with the help of inter disciplinary approaches as well as on the basis of personal encounters with natural spaces and processes The ultimate aim of this book is to make a contribution to the development of a cultural fabric that is suitable to the natural spaces and processes in which we may thrive and on which we all depend as individuals and as a species
