Natural History Of Alcoholism Revisited:

The Natural History of Alcoholism Revisited George E. Vaillant, 2009-07-01 In this updated version of his landmark study on alcoholism George Vaillant returns to the same subjects but with the perspective gained from fifteen years of further follow up

Understanding the High-Functioning Alcoholic Sarah A. Benton, 2009-02-27 Who is the typical alcoholic among the 12.5 million living in the United States now? Many if not most of us when asked that question would envision a skid row bum or someone at least out of work or with little education locked into a low skill low paying job. But that is not accurate according to the results of a national study released in June 2007 by the National Institutes of Alcohol Abuse and Alcoholism. The NIAAA determined that alcoholics in the United States really fall into five subtypes including nearly 20 percent who are highly functional alcoholics well educated with good incomes. They include corporate presidents, powerful politicians, police, lawyers, doctors, scientists, and other highly skilled, highly educated people who are middle to high income and by most accounts successful. In this unprecedented book, mental health counselor Sarah Benton takes us into the worlds and minds of so-called high functioning alcoholics to understand how people so intelligent and achievement oriented get drawn into states in which they secretly cannot control their liquor consumption but still manage to excel in their careers. The book includes a look at celebrity alcoholics like singer Eric Clapton and actor/comedian Robin Williams as well as alcoholics in high positions including Chris Albrecht, former Chairman and CEO of HBO. Other high profile people included in this book are Miss USA 2007 Tara Conner and football legend Joe Namath. With her own story of alcoholism and her recovery woven into the text, Benton takes us into the lives and challenges of these well educated and successful people seeking to understand how, when, and why they became addicted, as well as the reasons their alcoholism is for most so hard to admit, cope with, and recover from.

Hijacked Brains Henrietta Robin Barnes, MD, 2015-01-06 This book, written from the perspective of a practicing primary care physician, interweaves patients' stories with fascinating new brain research to show how addictive drugs overtake basic brain functions and transform them to create a chronic illness that is very difficult to treat. The idea that drug and alcohol addiction are chronic illnesses and not character flaws is not news; this notion has been around for many years. What *Hijacked Brains* offers is context and personal stories that demonstrate this point in a very accessible package. Dr. Barnes explores how the healthy brain works, how addictive drugs flood basic reward pathways, and what it feels like to grapple with addiction. She discusses how, for individuals, the combination of genetic and environmental factors determines both vulnerability for addiction and the resilience necessary for recovery. Finally, she shows how American culture, with its emphasis on freewill and individualism, tends to blame the addict for bad choices and personal weakness, thereby impeding political and/or health-related efforts to get the addict what she needs to recover.

Alcoholism Myths and Realities Doug Thorburn, 2005 More than 100 widespread myths about drug and alcohol abuse are enumerated and then dispelled in this book about the reality of addiction. Questions such as "Does proper parenting and involvement prevent

alcoholism and Do alcoholics lack willpower are addressed and a myriad of addiction related falsities that the general public and even medical professionals have considered true are identified and refuted Specific attention is paid to defining and understanding alcohol addiction including guidelines on identifying symptoms of alcoholism in social settings and detailed information on the biological difference between the disease in its early and late stages

Quit Smoking Weapons of Mass Distraction Simon Chapman, 2022-06-26 Who keeps telling smokers they can't quit without help For decades there have been far more ex smokers than smokers and an estimated 75% of smokers quit without drugs or professional help But smoking cessation is a global phenomenon serviced by multibillion dollar industries including the pharmaceutical and cigarette sectors and health professionals These industries try to denigrate unassisted cessation and promote their products and services weapons of mass distraction as essential to successful quitting This contributes to the medicalisation of a process that before these products were available had a natural history where drugs and expertise were absent yet millions of people around the world still quit Simon Chapman AO is one of Australia's foremost experts on strategies to minimise harm from tobacco In *Quit Smoking Weapons of Mass Distraction* he reviews the early history of quitting smoking and the rise of assisted quitting and gives insight into the forces that have tried to undermine smokers agency to stop Chapman also provides actionable policy solutions to help people actually quit smoking This is a splendid read for anyone interested in what really works to reduce smoking and what helps to keep Big Tobacco in business Mike Daube AO Emeritus Professor in Public Health Curtin University Chapman is indispensable reading for anyone wanting to help the billion odd smokers end their addiction A powerful and important book Robert N Proctor Professor of the History of Science at Stanford University

Aging Well George E. Vaillant, 2024-09-24 An outstanding contribution to the study of aging from a psychiatrist and professor at Harvard Medical School Publishers Weekly In an unprecedented series of studies Harvard Medical School has followed 824 subjects men and women some rich some poor from their teens to old age Harvard's George Vaillant now uses these studies the most complete ever done anywhere in the world and the subjects individual histories to illustrate the factors involved in reaching a happy healthy old age He explains precisely why some people turn out to be more resilient than others the complicated effects of marriage and divorce negative personality changes and how to live a more fulfilling satisfying and rewarding life in the later years He shows why a person's background has less to do with their eventual happiness than the specific lifestyle choices they make And he offers step by step advice about how each of us can change our lifestyles and age successfully Sure to be debated on talk shows and in living rooms Vaillant's definitive and inspiring book is the new classic account of how we live and how we can live better It will receive massive media attention and with good reason we have never seen anything like it and what it has to tell us will make all the difference in the world A respected researcher offers suggestions for successful and happy aging Highly recommended Library Journal Astonishing observations *Aging Well* provides the only available longitudinal assessment of the factors that will permit us to age well New England Journal of
